

Harding as Washington's Double

The above photographs showing the remarkable likeness of Senator Warren G. Harding, the Republican candidate for president, and George Washington, the first president of the United States, were published in a recent issue of the Boston Evening Transcript. The large picture in the oval and the smaller picture of Senator Harding on the right were made from the same photograph. The face has not been touched up in any way but merely framed in the Washington headgear and dress. The Boston Evening Transcript reproduced these pictures after receiving a number of letters calling attention to the similarity between the first president and Senator Harding. Reproduced by permission of the Boston Evening Transcript.

RESEMBLES THE HUMAN HAND

Skin of Bat's Wing Stretches From the Finger Tips to Ends of Toes and Nails.

The wing of a bat is a most wonderful instance of adaptation to a special end, for it is nothing but a greatly modified forelimb or hand.

If you spread out your hand and imagine the four fingers grown enormously long, while the thumb remains short and stumpy and that the skin between the fingers has also been stretched until it extends from tip to tip of the fingers and on along the side of the body to join the hind foot, you will have a good idea of the structure of a bat's wing; it is simply a much exaggerated hand.

The elongated bones serve, like the ribs of an umbrella, to keep the skin stretched and taut when the owner is in flight.

When the bat alights it doubles up its "hands," the skin falls in wrinkly folds and using its thumb joints as forefeet it is able to run about almost as quickly as a mouse.

The skin of the wings not only joins the hind limbs but extends from them to the tail, thus making the rudder with which the bat can steer when flying, and, when the tail is brought up beneath the body, forms a bag or receptacle which is of use to its owner.

CREDITS TREES WITH SENSE

Scientist Declares They Possess at Least Three Which Also Belong to Human Race.

The curator of the British Guiana museum, James Rodway, who is an eminent botanist, declares that plants possess at least three of our five senses—feeling, taste and smell—and that certain tropical trees smell water from a distance, and will move straight toward it.

But trees not in the tropics can do as well. A resident of an old Scotch mansion found the waste pipe from the house repeatedly choked. Lifting the slabs in the basement paving, he discovered that the pipe was completely encircled by poplar roots. They belonged to a tree that grew some thirty yards away on the opposite side of the house.

Thus the roots had moved steadily toward the house, and had penetrated below the foundation and across the basement until they reached their goal, the waste pipe, 150 feet away. Then they had pierced a cement joint and had worked their way in long, tapering lengths inside the pipe for a considerable distance beyond the house. There seems something almost human in such unerring instinct and perseverance in surmounting obstacles.—New York Post.

Sheep-Raising Industry.

Sheep raising is perhaps the oldest of all industries, for it was practiced even before agriculture. Wool is a product of cultivation or domestication, for there are no wild animals which closely resemble the wool bearing sheep. Floyd W. Parsons, in the Saturday Evening Post, says that with the discovery that cloth could be made from wool came an effort to improve the fleece by selection and breeding. The early Romans were most successful in this pursuit, and their endeavors along this line resulted in developing a fleece of great fineness. After the conquest of the Iberian peninsula Roman sheep were introduced into Spain, where they so greatly improved the native stocks that even during Roman supremacy Spanish wool led the world's markets, a prestige held for many centuries.

Telltale Faces.

"Nature seems to decide in advance, by face and gesture, what many people are best fitted for." That is the theory of Dr. Henry Chellow, who holds that by studying the faces of children, parents and teachers may obtain valuable guidance as to their future careers. The following list is a brief summary of some of his deductions: Triangular full face—Essentially a mental type. Unromantic, strenuous, eats little; thinks much. Feels little, sleeps little. Usually makes good accountant or engineer. Round full face—Essentially a vital character. Sentimental, easy-going; sleeps and eats all the time, does little work. Makes usually a good mathematician. Pointed profile (such as the Chamberlain family)—Uncompromising, inclined to procrastination.

In Old New York.

Chelsea, in the neighborhood of Twenty-third street and North river, New York city, was the home of Clement C. Moore, who wrote the childhood classic, "Twas the Night Before Christmas." One of the admirable old houses of Chelsea is that where dwelt Edwin Forrest, the actor. It is at 485 West Twenty-second street, a substantial-looking square fronted house, with a door of a great single panel. On the spot where the New York city hall stands, George Washington paraded his little army on a July day in 1776, and with grave solemnity a document was read to them that had just been received from Philadelphia, and which was forever to be known as the Declaration of Independence.

Largest Bible.

The largest Bible in the world is more than five feet two inches high and three feet six inches wide. When opened it measures seven feet ten inches square. It is intended for use in special buildings.

Cool, Clean and Sanitary

These words fully describe what the condition of every meat market should be, and it describes ours to a nicety. Our cold storage and other equipment, and our ambition to maintain perfect sanitary conditions in our market, blend perfectly. Consequently, we can sell you meats of all kinds that retain their freshness and wholesomeness long after they leave our shop. All our meats are handled under glass and with extreme care. We overlook nothing which will assist us to carry out our sanitation policies.

BIG REFORESTRATION PROJECT LAUNCHED

MISSOULA, Mont., Aug. 20.—Six thousand bushels of white pine cones will be collected in the Bitter Root district and several hundred bushels each of Douglas fir, spruce and larch will be gathered in the Lolo forests by officials of the forest service nursery at Savenac, near Haugen, Mont., to be used in reforestation work. The forest service has its own extraction mills which will take the seeds from the cones.

A Classified Ad will sell it.

BETTER DAIRYING

SASKATOON, Sask., Aug. 20.—As a measure for encouraging the developing of the dairying industry in the province, the Saskatchewan government is purchasing 100 good young grade dairy cows and heifers in eastern Canada at an estimated cost of \$10,000, for resale on easy terms to bona fide dairy farmers in the various dairy centers of the province.

One factory in Philadelphia produces 9,000,000 saws a year.

Heavyweights will figure in the feature event of the next show of the Armory A. A. of Jersey City, August the New York battler. It will be the entertainment are Frank Moran, the Pittsburg heavy, and Al Reich, the New York battler. I will be Reich's first appearance in the ring for several months.

It should be understood that timber is sold from the National Forests of Alaska only for immediate and continuous operation, and that the general policy or form of contract does not permit the acquisition of timber on a speculative basis.

Hours—10 A. M. to 9 P. M.

Five dollars is the charge for the shortest taxi ride in Berlin.

FINDS LOST TREASURE

HARLEM, Mont., Aug. 20.—While fishing recently along the banks of the Milk river, "Dad" Minugh poled in some Bourbon whisky which he lost on the same spot 23 years ago. In 1897, Minugh says, he lost 100 quarts of whisky in the river, when a flood overturned one of his wagons. The quart he fished up, he believes, is undoubtedly part of the original supply.

20 MILLION TROUT PLANTED, MONTANA

ANACONDA, Mont., Aug. 20.—When the work ceases for this season, approximately 25,000,000 trout fry will have been planted in the streams of Montana during the present year, according to J. H. Brunson, superintendent of fish hatcheries at Anaconda, Somers, Emigrant and at the Madison river. The trout planted this summer have been of five species—grayling, brook trout, natives, rainbow and fingerlings.

Louis Bogaah, the Bridgeport fighter, will meet the most formidable opponent he has yet faced when he hooks up with Champion Jack Britton. The two are matched for a 12-round bout at Bridgeport on the night of August 23.

WOMEN ARE GOOD SAVERS

GENERALLY speaking, perhaps the most thrifty class of depositors at the First National Bank are the women.

Wherever the men of the family leave the banking end of the household to their wives, there is usually a tidy sum tucked away in the bank for the 'rainy-day'.

If YOU can't save, why not open an account for your wife and let HER do it?
