THE HOUSE OF MERIT

If the Wood Dealer Sold Service

We do not sell current; we sell service. That sounds odd doesn't it?

Well, suppose the wood dealer sold service instead of wood, he would tend to your furnace and your range, take away the ash and clean the flues. You would buy so much heat.

Now you buy so much light, although you pay according to the current you consume. But the service is performed for you by this company at the substations and power plants.

That is what we want to give you—efficient service. It is the aim of this company to have none but satisfied customers. No matter what it is, if you have a grievance, or are dissatisfied about your bill or do not understand our rates, please come in and see us or write us about it.

If you have any suggestions to make, we will gladly avail ourselves of them as our aim is constantly to improve our service to you as fast as the development of science and human ability permit.

California-Oregon Power Company

WOULD CUT DUAL CITIZENSHIP TIES

HONOLULU, T. H., Aug. 14. (By Mail).—A treaty or an agreement of some sort between the United States and Japan to do away with difficulties of dual citizenship is the suggestion of C. Yada, new Japanese consul general here.

Yada's proposal followed his refusal to forward to Japan the applications of 200 Hawaiian-born Japanese children for exemption from Japanese dual citizenship laws until the applications are accompanied by the nine official forms required by the Tokyo government. When these forms are filled out, said Mr. Yada, he will be glad to send them on to Japan.

American and Japanese citizenship laws constantly are in conflict, said the consul general. He pointed out that under the United States law a

child born of American parents anywhere in the world is held to be an American citizen, while a child born of alien parents in America also is eligible for citizenship rights. The Japanese law, said Mr. Yada, works practically along the same lines and the two are bound to conflict.

The Japanese representative denied reports that Japanese born in America who refuse to return to Japan for military service bring down punishment on the heads of their relatives in Japan.

NEW MEXICAN LEGION CONVENES SEPTEMBER 2-4

ROSWELL, N. M., Aug. 30.—New Mexico's American Legion convention will be held here September 2-4. Herman G. Baca, Roswell, state commander, has announced. The convention will elect delegates to the national convention at Columbus, O., September 27.

HALO DUE TO MISCONCEPTION

Explanation of Luminous Circle About the Heads of Saints is Somewhat Humorous.

For centuries it has been an almost universal practice among artists to paint halos above the heads of the saints in their pictures. Some characters have been so depicted, even though not officially canonized or previous to that ceremony, when the artist wished to indicate special spiritual qualities or holiness, as, for instance, in the case of Joan of Arc.

During the eleventh and twelfth centuries there was a great activity in the building of churches and cathedrals, and it was a common practice to erect around the outside of the buildings statues of the saints, which were placed just under the eaves. As the images became discolored by the rain which fell upon the roofs and then poured over them, the authorities, as a means of protection, placed over the heads of the figures wooden disks of a size sufficient to protect them. Glitter, the great artist, began to paint holy pictures when only a country boy, and in his ignorance assumed that the disks were essential parts of the images of the saints. Hence his earliest paintings represent each sacred figure wearing over the head something that looks like the bottom of a tub. Later on he idealized this into a mere circle, dark at first, but growing more luminous with each production, until finally he developed the circle of light that has come down unchanged through generations of painters as the badge of sanctity.—New York Post.

DREW LAUGHTER FROM GRANT

Witty Remarks of Mark Twain Broke Down Reserve Characteristic of the Famous Soldier.

Responding to the toast of "Babies" at the memorable Chicago banquet in honor of Gen. Grant in 1879, Mark Twain concluded with a sentence that set the gathering in an uproar. In his inimitable drawing voice he said:

"In his cradle, somewhere under the flag, the future illustrious commander-in-chief of the American armies is so little burdened with his approaching grandeur and responsibilities as to be giving his whole strategic mind, at this moment, to trying to find some way to get his own big toe into his mouth, an achievement which (meaning no disrespect) the illustrious guest of this evening also turned his attention to some fifty-six years ago. And if the child is but the father of the man, there are mighty few who will doubt that he succeeded."

At that conclusion the audience broke into cheers and roars of laughter in which even the reserved Grant joined.

Have Broad Matrimonial Views.

Present-day Maoris are nominally Christians, but there are many old chiefs who are still fond of their ancient totem poles. Their religion is that of nature-worship combined with the veneration of ancestors. A peculiar and interesting detail of their religion is the belief that the soul dwells in each human being's left eye.

The Maoris were enthusiastic cannibals in by-gone days, their favorite dish being roasted hearts. Eating the hearts of their enemies was supposed to give them strength, especially in the pursuit of war-time activities.

As for the Maoris' marriage laws, they seem to have none. But they believe very strongly that man should have absolute power over woman. Even today they have very broad views on the subject of matrimony, and each man generally takes unto himself as many wives as he can afford to maintain.

Joke 5,000 Years Old.

Planned by the ancient Egyptians over 5,000 years ago, a joke just came to fruition, writes Prof. Flinders Petrie, the noted archeologist. "While we were trying to find a way into a queen's pyramid," he says, "we discovered on a rock face a door which was so beautifully and exactly fitted that it was difficult to see the joints. We immediately set to work on this, thinking that we had found at last an entrance to the inner chamber. After a considerable amount of work we removed the door and found—solid rock! It was a carefully arranged blind to balk anyone who wanted to find the entrance into the royal tomb, and had been made about 5,000 B. C. by someone with a sense of humor."

Humidity in Surgery.

Investigations made in several Boston hospitals by Dr. Ellsworth Huntington seem to indicate that for surgical operations, the best condition of the atmosphere is high humidity, 80 per cent or more, directly after operations, and moderate humidity, about 50 per cent, at a temperature of 64 degrees Fahrenheit, a few days later. Doctor Huntington points out that, if these results are accepted, there is no reason why the optimum conditions of temperature and humidity should not be produced artificially in hospitals, causing a probable improvement in not less than 20 per cent in the results of operations.

Clear Field.

"Ah, here is a letter from the old folk!"
"What does it say?"
"Come home your tailor is dead!"—Pearson's Weekly.

THE UNIVERSITY OF OREGON
—is maintained by the state in order that the young people of Oregon may receive, without cost, the benefits of a liberal education.

The University includes the College of Literature, Science and the Arts, the Graduate School, the School of Physical Education, and the professional Schools of Law, Medicine (at Portland), Architecture, Commerce, Journalism, Education and Music.

High standards of scholarship are made possible by an able faculty, well equipped laboratories and a library of nearly 100,000 volumes.

Supervised athletics are encouraged and every attention given the health and welfare of the students.

With a heightened confidence gained by the recent expansion of public support, the University is now entering upon an era of large development and extended usefulness.

"BEN" FRANKLIN NOT FIRST

Contention Made That New Hampshire Had the Earliest Periodical in the United States.

I claim that the oldest periodical in the United States is the New Hampshire Gazette, published weekly at Portsmouth and founded in 1756, the next in age being the Weekly Mercury, published at Newport, R. I., and founded in 1758. "Benjamin Franklin did not found the Saturday Evening Post or any other paper in 1728. The Pennsylvania Gazette was founded in 1728 by Samuel Keimer, who did not make a financial success of it and sold it to Franklin. It was first called The Universal Instructor in All Arts and Sciences and Pennsylvania Gazette. In his autobiography Franklin says of Keimer and the Gazette: "He began his paper, however, and after carrying it on three-quarters of a year, with at most ninety subscribers, he offered it to me for a trifle; and I, having been ready for some time to go on with it, took it in hand directly; and it proved in a few years extremely profitable to me."

Samuel Atkinson and Charles Alexander combined the subscription lists of the Pennsylvania Gazette and the Bee and issued the first number of the Saturday Evening Post on August 1, 1821, and the Gazette and the Bee went out of existence forever. Thomas Cottrell Clarke was the first editor of the Post. All old newspaper directories give 1821 as the year the Post was established.

BOSSY HAD DELIRIOUS "JAG"

Results of Imbibing Barrel of Home Brew Disastrous to Morals of Sedate Old Cow.

Milk, that mild and healthful beverage beloved of the young, usually held in light esteem by the antiprohibitionist, but—

It happened not long ago—since Jan. 16—in the mining camp of Sand Coulee, Montana. A "Bohunk" miner's wife, apparently seeking to keep her lord and master in good humor, mixed a barrel of home brew guaranteed to develop a real kick, and set it out in the yard to ferment. A neighbor's cow happened along and tasted.

One taste led to another, and finally the barrel was empty. But not so the cow. She was most decidedly and satisfactorily "full." Anyway, bossy was fighting drunk, and she started out to clean up that mining camp, and succeeded almost completely. But she met her Wellington in Deputy Sheriff Adolphson. The cow charged the sheriff, who dodged.

Then bossy suffered from the hallucination that has afflicted humans under similar circumstances. She gave evidence of seeing a multitude of Sheriff Adolphsons, and finally tiring herself with aimless charges fell down and asleep. When she awoke next day her "jag" was over. But it is reported that her milk sold at a premium for several days among the strong men of the camp.—Wall Street Journal.

Ammonia by New Process.

An enterprising American has secured from the Italian government a concession for the utilization of 800 horsepower of the Marmore cascades near Terni, about seventy miles from Rome, and maintains that he can turn out nitrogenous plant food for the Italian farmer at a cost as low as 1 lira per kilo (equivalent to \$0.088 per pound, with the lira taken at its par exchange value of \$0.196). It is said that the falls are capable of generating not less than 150,000 horsepower. These are the cascades over which Byron waxed so eloquent in "Childe Harold's Pilgrimage." Alfred P. Dennis, commercial attaché of the United States embassy in Rome, reports to the department of commerce that the only ingredients in the ammonia are water, air and electric energy.

A classified Ad will call it.
