

Drivers Like Mack Trucks

There are other reasons in addition to mechanical and structural superiorities that cause drivers to like MACK Trucks. They like them because they are dependable; they do not falter when called upon to do the unusual; they do not quit in an emergency; they keep right on going when other trucks fall down on the job; they finish what they start.

THEY LIKE THE MACK IDEAS

Drivers appreciate MACK facilities for inspection; the ports in the crankcase side; the magneto and pump in front of the engine; the removable bottom of the gearbox; the external brake adjustments; the lack of need for clutch adjustment; the small number and accessibility of the grease cups; the wonderful simplicity of the truck as a whole.

You, too, will like a MACK.

AMERICAN NEWS IS DISTORTED BY FOREIGNERS

NEW YORK, Sept. 5.—The need for a more reliable distribution of American news to foreign papers is strikingly evidenced by the misinformation about this country constantly reported in the foreign press. Murders, robberies and disturbances of all kinds are given prominence; while important and favorable news is omitted or distorted. Such a situation reacts most unfavorably on American foreign trade.

The chief foreign press agencies, says the National Foreign Trade Council, are operated semi-officially, and with strong national bias. If their distortions of American news are not intentional, it is certain that little attempt is made to circulate information that is worth while, accurate or fair to the United States.

A recent example is found in the active hostility aroused in Australia and South America by false reports on the operation of the Webb Law. It was reported that all American manufacturers had banded together under this law to dump their products abroad and to dominate foreign markets through unfair methods of competition. As a matter of fact, less than half of one per cent of American manufacturers are operating under this law; and the Federal Trade Commission is empowered by this law to prosecute any American foreign trader in any part of the world who employs unfair practices in his business.

Such misstatements of fact prove infinitely harmful to American foreign trade, and lend emphasis to the need for improved American systems of communications by cable and radio which will permit the direct and uninfluenced dissemination abroad of accurate American news.

An English scientist has taken an X-ray picture of the hand of an Egyptian princess of the Second Dynasty (about 4500 B. C.), taken through the wrappings of her mummified remains, showing all the bones with great clearness, and a ring on the third finger.

EQUIPPED TO RULE OCEAN

Monster That Lived 100,000 Years Ago Must Have Been a Terror to Other Fishes.

In the National museum at Washington is exhibited the skeleton of a Zeuglodon—a monster which in life was seventy feet long and which must have been ruler of the seas during a bygone epoch. There is good reason to believe that this alarming creature dates back fewer than 100,000 years, says a bulletin.

With an enormously long tail and powerful swimming paddles, the Zeuglodon must have been able to swim at the speed of an express train, and its great alligatorlike head was armed with huge carnivorous teeth.

It was manifestly a ferocious and predatory brute and presumably fed on fishes and porpoise. The head was four feet long and in the front part of each jaw were eight teeth for seizing and tearing, which were supplemented by a series of saw edged cutting teeth at the back.

The Zeuglodon was mammals, related to modern whales. They must in their time have been very numerous, judging from the quantities of their bones dug up in Mississippi and Alabama, where in places there are so many as to interfere with plowing. Farm walls are built of them.

Apparently the creatures, which are denizens of warm seas, died and were washed up into shallow waters that afterward became dry land. Drifting sands covered their bones, preserving the latter to some extent. Their teeth (loose in the jaws like those of alligators) are found scattered about in the neighborhood of the bones.

ERROR COST LAWYER CLIENT

Addressed as "Three-Fourths" Smith, Man Proved to Be All There in His Anger.

One gathers from Judge Shute's book, "The Real Diary of the Worst Farmer," that a lawyer turned farmer has some difficulties in giving the necessary attention to his legal work. For instance:

"I was much grieved to lose a client in a most curious way. I have recently installed a new typewriting machine in my office. The presiding goddess of the machine had written a letter from dictation to a Mr. J. Smith, a gentleman who in early life had suffered the loss of one leg at the hip, and who is, not unaturally, very sensitive about his misfortune. The young lady was unused to the new machine and struck the figure 4 instead of the initial 'J,' both in the address in the letter and on the envelope.

"I had been absorbed in working out a decision in the peas question, and when the letter was brought to me for signature did not notice the error and the letter was sent, bearing my sign manual, directed

Mr. 4 Smith,

N. H. "Today I received a letter from the maddest man in the United States, and containing material calculated to curl my hair and bring out goose pimples all over me. I explained as well as I could, but I feel sure he will never believe I did not do it intentionally.—New York Evening Post.

Ventilation.

Through persistent education the why and wherefore of this great health necessity has been explained; still to the many, air is air, and that is all there is to it.

Ventilation does not simply mean "open wide the windows," but it should be done scientifically, especially in a sick room. To properly ventilate, the air must be kept in motion. The entrance opening for fresh air should be larger than the one for exit. If these openings are directly opposite, the motion will take place without doing the room any good. If there are two windows in the room, one should be opened from the top and the other from the bottom. For the general daytime room the temperature should be 68 degrees and at night 65. A bathroom should be kept at 70. For the sick room of pneumonia patients and several other diseases, of course, the temperature should be kept as low as possible without having the patient in a draught.

Worse Than Modern Drill.

In ancient China a man suffering from toothache proceeded in this wise: He repaired to the Chinese doctor, who was armed with a lot of sharp needles of various sizes and lengths, and his method of treatment was and still is known as acupuncture. This operation consisted of the insertion of these needles into various parts of the body, the choice points of selection being 26 for toothache and six others for inflammation of the gums. The depth to which the needles were inserted is said to have been an important point in the operation. This puncturing was associated with cauterization.

Bee Swifter Than Pigeons.

There is a story to the effect that a farmer in Westphalia laid a wager that 12 bees of his, released at a distance of three miles from their hive, would travel as rapidly as a like number of pigeons over the same course. The first bee, properly powdered for purposes of identification, did, as a matter of fact, arrive at its hive a quarter of a minute before the coming of the first pigeon to its cot; and there were three other bees that came in before the second pigeon arrived.

Will you do this?

Ask for your favorite kind of music—instrumental or vocal. Seat yourself with your back to the New Edison. Close your eyes. In short, let us give you Mr. Edison's

Realism Test

This makes an actual musical experience out of a demonstration of the New Edison. It brings back your previous musical experiences. You compare the present experience with your musical memories, and determine how listening to the New Edison compares with listening to the living artist.

Let us tell you, at the same time, about our Budget Plan—a "better business" way of paying for your New Edison. (Note: the New Edison has advanced in price less than 15% since 1914. This includes War Tax.)

KLAMATH FALLS MUSIC HOUSE

Geo. A. Wirtz, Prop.

Sixth Street between Main and Klamath

Comfort—Cleanliness—Reasonable Rates

The Central Hotel

New Throughout

IN THESE DAYS OF HIGH PRICES THE AVERAGE CITIZEN WILL BE GLAD TO FIND A PLACE TO LIVE THAT IS WITHIN HIS REACH AND WHICH FURNISHES EVERYTHING THAT HE COULD WISH FOR—A GOOD BED, A CLEAN ROOM, PERFECT VENTILATION. THESE YOU WILL FIND AT THE CENTRAL HOTEL. SEVENTY ROOMS IN THIS GREAT HOSTELRY ARE NOW READY AND THIS NUMBER IS BEING ADDED TO AS FAST AS THEY CAN BE FINISHED AND FURNISHED.

SPECIAL RATES MADE TO PERMANENT ROOMERS. NO BETTER SPRINGS, MATTRESS OR BEDDING ARE MADE THAN THOSE FOUND AT THE CENTRAL HOTEL.

J. J. KELLER, Manager.

IDAHO MAN AND LOCAL WOMAN ARE MARRIED HERE

Len Richardson of Cascade, Idaho, and Mrs. Hattie Lowe were married at 7:30 o'clock last evening by the Rev. E. P. Lawrence at the Presbyterian manse. The bride has been a resident of this city for the past 18 months.

The wedding ceremony was witnessed by Mrs. Edith Rean and Norman Gere of Medford.

A massive chair, made of copper, which natives believe was given by the late Queen Victoria to an Ashanti chieftain and used by him as a throne, has been discovered in the midst of a jungle far from human habitation in the Gold Coast Colony of Africa.

A Herald Want Ad will sell it.

WEATHER RECORD

Hereafter the Herald will publish the mean and maximum temperatures and precipitation record as taken by the U. S. Reclamation service station. Publication will cover the day previous to the paper's issue, up to 5 o'clock of that day.

	Max.	Min.	Precipitation
Sept. 1.....	88	49	—
Sept. 2.....	89	55	—
Sept. 3.....	90	54	—
Sept. 4.....	85	49	—
Sept. 5.....	83	44	—
Sept. 6.....	80	43	—
Sept. 7.....	82	47	—
Sept. 8.....	75	42	—

The North Sea will not be totally free from mines till next summer, it is stated.

They're Just Right

Crisp enough, brown enough, salted just enough—with their "right out of the oven" flavor—Snow Flakes are delicious. And they're made from the finest, purest ingredients to be found! You'll like them.

Don't ask for crackers —say SNOW FLAKES
