

URGES DECREASE IN EXPENSES OF GOVERNMENT

FRESNO, Oct. 22.—Plea for reorganization and simplification of the California state government in order to cut down expenses were made by State Controller John S. Chambers in a talk here yesterday at a meeting of state inheritance tax appraisers.

Cost of state government in California has increased greatly in the past ten years, Mr. Chambers said. In 1910 the per capita cost was \$7.89, in 1919 \$15.93 and in 1929 \$19.46. The 1931 legislature, he said, probably will appropriate about \$90,000,000.

Mr. Chambers reviewed past efforts to cut down state expense. He quoted briefly from messages of governors to the legislatures, from Governor Gage to Governor Stephens to show how each had protested against waste and lack of efficiency. Despite the protests, he added, the government had drifted along from bad to worse.

No governor, the controller declared, had ever made a continuous and earnest campaign to remedy this condition of affairs. All contented themselves with paragraphs in messages to their legislatures, he said.

People are beginning to think more definitely about governmental affairs, and particularly about taxation and the high cost of living. "If out of this mess into which we have been plunged would come better government, then we might look back upon the sorrows and tribulations of the past few years with more equanimity," Chambers said.

Mr. Chambers said he wished to impress upon his hearers the duty of the individual to the government and the duty of the whole people to the government. If people failed to take an intelligent and active interest in government, they had no one but themselves to blame, he declared, for waste of effort, time and money, such as characterized state government in California.

About \$1,000,000 a year could be saved in reorganization of the state government through doing away with useless units, Mr. Chambers asserted. "This sum, compared to the grand total of expenditures, might look small, but it should be borne in mind that the amount referred only to the operating expenses of the state government," he said. "That is the only place, at present where economy can be brought about."

If reorganization were made and if the people "would cease asking for this frill and that frill and would quit voting bonds for any old purpose and hold government down to as nearly business like lines as government can be held down," a tremendous relief would come to the California tax payers, he concluded.

HAMMOND BUYS REGISTERED EWEN

W. E. Hammond, a stockman of the Merrill country, has just received a shipment of five registered Ramboulet ewes from the famous Bulard herd of Woodland, California. A purchase price of \$50 a head was paid by Mr. Hammond for these fine sheep with which he plans on improving his flocks.

Franklin county, Florida, has a woman county commissioner.

COLLEGES NEED MORE MONEY

NEW YORK, Oct. 22.—American youths entering college have increased in numbers at a record rate during the past six years and if the proportionate growth is continued to 1950 there will be 1,138,000 students in 210 institutions where 294,000 were enrolled last year. These figures, compiled by the institute for public service, have raised the question of where the money needed to educate these larger groups will come from.

Julius H. Barnes, chairman of the institute, found in a study of the figures compiled that "this year's increase each year, a report of the institute states. But, if they grow at the average percentage rate of the last six years, they will have 659,000 students in 1930 and 1,138,000 20 years later.

Taking the lower estimate for 1950, it "means finding facilities for more than three times the total for 1920 at six or seven times the salary cost," said the report. "It means adding 844,000 students, or 200 colleges the size of Yale last year.

The institute asks, "will the money to provide education for the increased number of students come from taxation, endowment, private gifts and larger fees? Must present universities grow or more universities be built?"

In numbers, the largest increase in six years is credited to the college of the city of New York with a growth of 6,800, followed by the University of California with 6200 increase and Boston university with 4700. Yale was one of four institutions which had fewer students than six years ago, its decrease being \$1, the institute reported.

Concluding his observations, Mr. Barnes said there is "reason to believe that in any future democratizing of opportunities for higher education, afternoon and night classes at colleges and extension classes away from colleges will be needed to give the elasticity which the demand requires."

Big Reduction in Used Cars

- 1—1918 Ford touring, in good condition. Old price \$500. Sale price \$400.
- 1—1917 Ford touring. Good running order. Old price \$450. Sale price \$300.
- 1—Ford Speedster with factory body. Old price \$400. Sale price \$275.
- 1—1918 Ford chassis. Just rebuilt. Price \$250.
- 1—1918 Maxwell touring. A-1 condition. New rear tires. Old price \$550. Sale price \$500.

AT THE THEATERS

Harry Carey can always be depended upon for a strong, virile photo-drama of the great outdoors. His last two productions, "Marked Men" and "Overland Red," are still pleasantly remembered, and his newest feature, "Bullet Proof," written by John Frederick and directed by Lynn Reynolds, will be shown at the Liberty theatre tonight.

Ethel Barrymore, known here and abroad as America's foremost actress, had added fresh laurels to her

already long list of successes in her latest screen play, "The Divorcee," a Metro production which will be the attraction at the Liberty theatre on Saturday.

Tom Mix, the "daredevil of the screen," will exhibit his daring theatre next Sunday when William Fox presents him in his latest picture, "3 Gold Coins," a thrilling western drama by H. H. Van Loan.

A Herald Want Ad will call it.

OLD BATTLESHIPS WILL BE TARGET

PHILADELPHIA, Oct. 22.—The battleship Massachusetts, which fought in the battle of Santiago in 1898, will be towed from the Philadelphia navy yard to Pensacola, Fla., to serve as a target in a trial of the nation's coast defense artillery against an armored warship, it is announced.

The old warship's armor plate is 18 inches thick. Her protection nearly equals that of present day

warships. The ship will be anchored off shore at a range of three miles from the bombarding battery.

In her eightieth year, Mrs. H. J. Lutchter of Orange, Texas, recently completed more than 200,000 miles of automobile touring.

FIRE SOCIAL

A Hollowe'en Pie Social will be held at the Pine Grove School house Friday evening, Oct. 29. Everyone is invited to come and the candidates are especially invited to come and speak. \$1-\$2
