**Ralph De Palma Heads French Team**

(Continued from Page Nine)

"blew out enough tires to put him in the poorhouse," and in the sprint championship he blew just one tire—but that was enough to cost him his chance of getting away with the honors.

**Others In Running**

Tommy Milton, Jimmy Murphy and Gaston Chevrolet, the remaining members of the quartet who are still in the running for the championship, are all getting in some hard ticks in an endeavor to add just a few more miles per hour to their cars. The rivalry for the championship is more intense this year than it has ever been, even more heated than it was that celebrated season in which Dario Resta, Johnny Aitken and Eddie Niekennacker came out to the coast to battle for the title on the boulevards at Santa Monica.

There seems to be a determination on the part of every man in the race to beat Jimmy Murphy's present record of 103 miles an hour for 250 miles, even though it is made with a car with almost twice the engine capacity of the present midgets. The majority of the drivers believe that they are going to be able to knock off the distance in better time than Murphy made in the spring.

**Sanitation Improving Dominican Republic**

WASHINGTON, Nov. 12.—Development of sanitation in the Dominican republic was shown to have made rapid strides in the past year of American occupation, in a report submitted to the navy department by Commander Reynolds Hayden, of the navy medical corps, aid on the staff of the military governor. Since the creation last January of a national department of "sanitation and beneficence," headed by a cabinet officer charged with administration of all public health activities, there have been constructed five large charity hospitals, a national insane asylum and a new leper colony. The report showed, involving expenditures of approximately \$1,000,000.

While most of the administrative positions are held by natives, the department is temporarily headed by a medical officer of the navy.

Although comparative statistics are lacking, disease among the natives was said to have been enormously reduced as a result of the new organization.

Women are employed as helpers cleaners and polishers in garages in New York city.

**HOAGLAND TO HANDLE BUICK**

The Buick car has always been a favorite in Klamath and Lake counties and this popularity is due primarily to the local representatives who first introduced it in this territory, and later to their successors. This popularity is not going to wane by reason of the change that has just occurred in the appointment of Louis Hoagland as the new representative in this county. Mr. Hoagland is the personification of energy. He needs no self-starter to get him going, for he is on the job early and late and the success that has attended his efforts while handling other cars will undoubtedly follow him in his new life.

"The Buick is not going to lose any of its prestige in this territory," said Mr. Hoagland yesterday. "If I can help it. It is a good car, as everyone knows, and I am going to try and make it the car of this county." Mr. Hoagland is planning the erection of a garage in the early spring. It is even possible that work will start on it this fall, if weather conditions remain favorable. One thing certain, he is going to be as lively as a cricket in the automobile family of Klamath Falls.

**MAKING A MAGNET**

It is possible to magnetize a file by taking about a dozen turns of a strand of cord to which a lighted electric bulb is attached. This will give enough magnetism to the file to permit of its use for picking up small parts, screws, nuts, etc., that have fallen into inaccessible places.

**RANCHER GIVES UP HORSE FOR FARM TRACTOR**

The day of horses on the farm is gone according to C. E. Hurton a rancher of Worden. My six horses have given way to a more modern method—the gas tractor. In the old days I was up before sunrise and worked till dark—today with modern machinery on the farm the farmer finds time to enjoy some of the pleasures which heretofore has been denied him.

Mr. Hurton uses an International 8-16 farm tractor of which he says:

I use my International in the spring for plowing—such plowing as would be impossible with horses. I am able if occasion demands to plow the hardest ground to a depth of ten inches, where with horses on the same ground would be impossible. Mr. Hurton reclaimed some swamp land on his place by diking it to a height of four feet using a Martin ditcher hooked to his tractor. When irrigating time comes he attaches his tractor to a Fairbanks Morse centrifugal pump which supplies more water than he can use.

In the fall he harvested his grain, thrashes it and carries it to the warehouse all with the International.

Mr. Hurton's ranch contains 240 acres all in grain.

Louisiana now has two women notaries.
