Brunswick
PHONOGRAPHS AND RECORDS

A Size and Style for Every Home

FROM the simplest and most inexpensive cabinet to the magnificent period models, The Brunswick comes in a range of prices, sizes and finishes.

All are Brunswick-built—the creations of a famous organization of wood craftsmen. No finer cabinets are to be found. The carving and the finish are superb.

But all this—while important—is secondary. The Brunswick Method of Reproduction is the chief attraction. For tone is what one buys in a phonograph.

Brunswick tone is infinitely better because of the several improvements included in the Brunswick Method of Reproduction.

First, there is the Ultona, an all-record reproducer. At a turn of the hand it presents the proper needle and proper diaphragm to each type of record. No attachment is necessary. The Ultona brings the finest reproduction, playing each make of record exactly as intended and bringing out its finest shadings.

Another feature is the Brunswick Tone Amplifier, built entirely of wood. There is no cast-metal throat.

This amplifier is built to conform to acoustic laws. Tone waves vibrate properly, unconfined. So foreign noises are absent.

These are but two of the superiorities of the Brunswick Method of Reproduction. But the tone betterments are apparent the instant you hear The Brunswick, whether you know the features or not.

Come in today and hear this super-phonograph. You've never heard such phonographic music before. It will be a revelation.
