

ASSERTS IRISH WRONGS MUST BE MADE RIGHT

WASHINGTON, Dec. 11.—American aid for Irish independence can best be exerted through "efforts to gain the truth about actual conditions." Miss Mary MacSwiney, sister of the late lord mayor of Cork, so declared before the commission of the committee of One Hundred investigating the Irish question.

Miss MacSwiney was the first witness called when the commission resumed its hearings. She told the commission she felt most Americans were uninformed as to real conditions.

Outside of Ireland, Miss MacSwiney said, an impression prevails that the move for Irish independence is fostered entirely by the Catholics. This she denied, asserting that Protestants and Catholics were equally represented in the movement.

The system of education established in Ireland by the British was criticized by Miss MacSwiney, who declared that "most of the people of Ireland do not know how to express themselves."

These conditions with respect to education have made it possible for anti-Irish groups in England to say that the Irish citizens do not want independence. The difficulty is that long years of British domination have not permitted the Irish as a people to develop mentally.

Miss MacSwiney gave an historical account of the development of the Sinn Fein and what she described as attempts of the British officials to destroy the sentiment.

The Sinn Fein, she said, has been wrongfully interpreted in some places outside of Ireland.

"It is simply a phrase meaning 'ourselves,'" she explained.

"It is a policy just as you have your republican or democratic policies."

Miss MacSwiney told of the activities of her brother, the lord mayor, in aiding the development of Irish industries. She said he founded the original industrial development league.

Miss MacSwiney declared America "has not made the world 'safe for democracy,'" but has "made it safe only for a short time, and especially for the British empire."

"You sheathed the sword when England got what she wanted," Miss MacSwiney declared. "The world has been made safe for a little while, but when England gets control of all coal, oil and all else that she wants, there will be other troubles."

Miss MacSwiney told the commission that she strongly protested "against the insinuations that my fellow republicans in Ireland did anything to secure the aid of central powers" during the war.

They did not, she said, but if they had been able to do so they would have done so, adding that France was glad to get English gold to help her in the war and that England was equally glad to obtain American gold to aid her.

"Wild-Catters" Busy In San Joaquin

VISALIA, Cal., Dec. 11.—"Wild-cat" derricks have begun to make their appearance in Tulare county and scouting parties are firm in the belief that oil lies somewhere beneath the surface.

Derricks are going up east of Lindsay, in the Round valley county, where one Los Angeles and Pasadena syndicate has taken up 13,000 acres on a lease. Near Pixley, which lies due south of Tulare, another wild-cating expedition is about to start, while wells have already been started in the Alpaugh section and gas in large quantities has been found.

These expeditions follow expert testing which has been going on for the past two years. Drilling is about to begin, also, near Richgrove and Delano.

CARIBOU MIGRATING

VANCOUVER, B. C., Dec. 11.—Herds containing millions of caribou are completing their annual crossing on the Yukon river in their migration south, according to reports received from the north. One story said there were so many crossing the river, when the ice first began to form, that three men, trying to get down the stream, were held up three hours waiting for the animals to pass.

THERE WAN'T ANY JULIUS

CHICAGO, Dec. 11.—Torn fragments of several \$20, \$5 and \$1 bills were sent to the treasury department for redemption by Isaac Hirsh, with an affidavit that his dog "Julius" had made a meal off the money. Hirsh was held for the federal grand jury when secret service men testified he didn't even have a dog.

MEDFORD SPORTSMEN BAG MALIN GESENE AND DUCKS

MALIN, Dec. 11.—The superior wild fowl shooting on the Tule lake shore near here has induced F. C. Reimer and O. A. Manning to come here from Medford to hunt. They have been getting much sport and quite a number of geese.

Mr. Reimer is the director of the Southern Oregon branch experiment station at Talent and Mr. Manning is a farmer near Medford.

GLASS OF SALTS CLEANS KIDNEYS

If Your Back Hurts or Bladder Bothers You, drink Lots of Water.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.—Adv.

CAL. TO CAST VOTE JAN. 10 FOR HARDING

HANFORD, Cal., Dec. 11.—Creation of a reservoir 14 feet deep and covering an entire township, in which can be stored 300,000 acre feet of water, is the plan of the newly created Tulare lake irrigation district. The district has before the state water commission an application for authority to impound the flood waters of the Kern, Kings, Tule, and Kaweah rivers during high water periods, to be used in the irrigation of practically the entire agricultural lands of Kings county.

The proposed reservoir would be built in what is now the bed of Tulare lake which, except in years of very high water, is hardly more than covered with water. Storage of this water would leave the reservoir practically free from danger of surrounding waters, it is claimed.

The scheme, one of the biggest ever projected in irrigation problems of the state, has the favorable opinion of some of the leading engineers in the west and, if permission is granted by the water commission, actual work can be started at an early date.

Annually many thousands of acre feet of water from these four streams are wasted, in Tulare lake. This water, the proponents of the new district maintain, can be stored during the high water periods from January to July each year, to be used during the dry months of August and September, thus bringing under cultivation close to 50,000 acres of valuable agricultural land which have heretofore been idle or used chiefly as grazing land.

Over 25,000 acres of rich grain lands will be positively safeguarded for future cultivation in the event the proposed district is successful, in the opinion of lake bottom ranchers and engineers who have been studying the plan.

These rich bottom lands have been planted year after year to grain by those willing to accept the chance of spring freshets filling the lake to an unusually high mark. In low water years fortunes have been made in a single season's plant on the lake bottom thus left dry. If spring rains brought the snows down from the high Sierras in a rush these grain gamblers lost fortunes by the inundation of their lands.

LOS ANGELES, Dec. 11.—Work will be started about January 1, 1921, on a dam 400 feet high in Pacoima canyon, 25 miles northwest of this city, to impound flood waters, according to an announcement recently made by J. W. Reagan, chief engineer of the Los Angeles county flood control district. The impounding project, Mr. Reagan said, had been approved by Arthur P. Davis, chief of the United States reclamation service.

The dam, Mr. Reagan said, will store 12,000 feet of water, sufficient to irrigate 5000 acres of land in the San Fernando valley, half a mile away. A lake two and a half or three miles long will be created by the structure, he added. The work, it is estimated will cost \$1,500,000 of which one third will be paid by state one third by the flood control district and one third by San Fernando valley communities.

CHINCH BUGS ON WARPATH

LAWRENCE, Kas. Dec. 11.—Chinch bugs, ancient enemy of the Kansas farmer, are getting ready to go on the warpath, according to State Entomologist S. J. Hunter. Many corn fields in the southern part of the state are infested, he says, and unless the winter is cold enough to kill the bugs off, they will undoubtedly play hob with the crops next season.

WORLD'S FATTEST MAN DIES AT SACRAMENTO

SACRAMENTO, Cal. Dec. 11.—Joseph B. Krebeck, 45, known as "Sacramento Joe," died here while being made ready for an operation to remove 100 pounds of fat in order to prolong his life. Krebeck, formerly a restaurant man, weighed at the time of his death 640 pounds. He traveled with the Foley and Burk circus and appeared with several carnivals when he topped the scales at 600 pounds, but recently increasing obesity, Krebeck spent 20 hours a day sleeping at his home.

Krebeck claimed the title of champion fat man of the world.

If the Wood Dealer Sold Service

We do not sell current; we sell service. That sounds odd doesn't it?

Well, suppose the wood dealer sold service instead of wood, he would tend to your furnace and your range, take away the ashes and clean the flues. You would buy so much heat.

Now you buy so much light, although you pay according to the current you consume. But the service is performed for you by this company at the substations and power plants.

That is what we want to give you—efficient service. It is the aim of this company to have none but satisfied customers. No matter what it is, if you have a grievance, or are dissatisfied about your bill or do not understand our rates, please come in and see us or write us about it.

If you have any suggestions to make, we will gladly avail ourselves of them as our aim is constantly to improve our service to you as fast as the development of science and human ability permit.
