

The Office Cat

BY JUNIUS

Hens His Application "Here's a Swiss named Egg who lives in New York, petitioning to have his name changed."

"He and his wife have four children, and his family is constantly referred to as 'the half-dozen Eggs.' He claims his yoke is too heavy to be borne."

"Why doesn't he lay for his tormentors?"

"It appears that he did once and got beaten—whipped to a froth. Poor Egg could hardly scramble home."

Our Ad Man's Ode

If nightingales didn't sing, most people would never know about them or care. It is the nightingale's way of advertising itself.

We know the value of this bird from the beauty of its song.

Let us imitate the beautiful; let us sway the public mind through the goodness there is in it; let us do it through good advertising.

What's Wrong?

Little Bobby came in the other day crying and rubbing the several "butts," or rather several places where the butts administered by a pet shoop had landed.

"Why, Bobbie, what's the matter?" asked his mother.

"My sheep, he knocked me down," sobbed Bobbie.

"Why didn't you run away from him? his mother asked.

WHEAT GROWERS CLAIM CONTROL OF 1921 PRICES

WICHITA, Kan., Dec. 30.—The Wheat Growers' Association of America, which has been conducting a campaign to induce growers to withhold their wheat from the market until prices are higher, plans to have midwestern states so well organized within the next six months that the growers will be able to control the price paid for the 1921 wheat crop, according to W. H. McGreevy, secretary and treasurer.

The association now has a membership of approximately 100,000 in the states of Texas, Oklahoma, Kansas and Nebraska, according to Mr. McGreevy, who has his headquarters here. The organization will be extended, he said, to Minnesota, North Dakota and South Dakota.

"The purpose of the National Wheat Growers' association is to control the distribution and marketing of wheat through financial and selling agencies of its own selection at a price based upon cost, plus a fair and reasonable profit," said Secretary McGreevy.

"Not only the wheat growers of our association, but the wheat growers in general are refusing to sell any wheat at present prices except in cases where financial conditions force the sale. For more than thirty days we have withheld our wheat from the market until now a large number of flour mills are idle and the local and terminal elevators are nearly empty. Wheat growers feel that he has practically accomplished what seemed at first impossible, and is now encouraged to continue withholding his wheat from market in order that a price which is fair and just shall be paid him for his labor and money invested."

Mr. McGreevy objects to the use of the term "wheat strike" in referring to the action of the wheat growers.

"Our growers are not striking as is commonly meant by the term," he said. "We are still sowing and attending to the many arduous duties of the farm. We are only holding our wheat to be marketed at any time the producer may think it at a fair price."

The organization was formed about a year and a half ago in southern Kansas and northern Oklahoma. Mr. A. Slaughter of Manchester, Okla., was the originator and early promoter. According to its promoters its growth in the first six months was slow but in the last few months it has been rapid until the membership has spread to every wheat growing county in the four states organized.

The four states now organized (Nebraska, Kansas, Oklahoma and Texas) in which a membership of 100,000 is claimed, have 220,506 wheat growers, according to Kansas board of agriculture statistics.

185 audiences tried it this way

MOST people know that the musical enjoyment which they get out of a phonograph depends upon one thing. That thing is the phonograph's realism.

This picture shows the best way to test a phonograph's realism. Miss Betsy Lane Shepherd, the famous soprano, is standing beside the New Edison, and singing in direct comparison with the New Edison's RE-CREATION of her voice.

185 audiences, aggregating more than 100,000 people, have actually heard this comparison. None could distinguish between her living voice and its RE-CREATION.

This is one of the phenomenal records of realism. The New Edison holds all other records of realism, too, because no other phonograph attempts this comparison-test—or could sustain it.
