PUBLIC HEALTH

By Dr. A. A. Soule.

Health of the people is the city's big business and while in the past we have had thousands for railroads and payrolls, in the future at least some little money and time will be given to public health matters...

The health board of your city turns the reins over to newer and hence more enthusiastic members, being scarred by the ravages of two flu epidemics, by smallpox, and measles, and by being broke, absolutely broke.

The future promises the Mills addition sewer that we started; the garbage ordinance perfected and garbage hauling a part of the city's business and not allowed to run on as it is—leaving the town dirty, charging big fees, and hauling only such stuff that will fatten hogs.

I could easily tell how to do a good many things. Doing it is harder. The price of health and happiness is eternal vigilance. Good health does not live by good intentions but by a little work and money.

You will all admit that good health is a mighty nice thing to have. It is the keystone in the arch of efficiency. But it does not come free like air and water. It takes a town with spinal stamnia and visceral vim to get busy and do something for the welfare of its citizenship in the way of conservation of public health.
