

OREGON BREVITIES

LAKEVIEW, Jan. 17.—Mrs. Josephine Pratt, widow of the late Christopher C. Pratt, died at her home here, at the age of 81. She had lived in Lake county since 1871.

LAKEVIEW, Jan. 17.—Preliminary steps have been taken looking to the formation of an irrigation district in the Willow ranch section. Last week the Modoc development board of Alturas filed on 20,000 acre feet of water to be taken from Lassen and Willow creeks. It is proposed to build the reservoir in the lower end of Fandango valley.

A SPLENDID POLICY

If you were offered a life insurance policy that did not absorb any part of your premium, in a company that was safe and sound, it is not likely that you would refuse it. In fact the agent offering such a policy would be swamped with business. Well, that is practically what W. A. Bullock, of this city is doing. He is selling a policy in the Occidental Life Insurance Co. of Los Angeles, Calif., that does this very thing. Here is how it is done:

He will write you a policy on the 20 year endowment plan guaranteeing you that in the event of death to return all deposits made by you in addition to the full face of your policy.

Should you become totally disabled from sickness or accident, the company have made special provision whereby you will have no further payments to make and will pay \$10 per month on each thousand dollars of insurance you carry which is not deducted from your policy at death. Besides, your policy matures the same as though you had made the payments yourself.

This is one of the best policies ever offered by any legal reserve company and has other special features just as remarkable as those outlined above. Before you buy that insurance you are thinking about. If you will call Mr. Bullock, 43-W or drop a card to 1405 Oregon Ave. He will be mighty glad to tell you all about it.—Adv.

Let Us Do Your Collecting

A number of business houses are saving the time of their bookkeepers and individual collectors by letting us collect their monthly bills. It is the modern method. It cuts down your overhead. Get your bills ready and we will do the rest.

LAND SUPPLIED FOR NEW PLANT

LAKEVIEW, Ore., Jan. 17.—Part of the machinery for the Pennsylvania Door and Sash company has already arrived in Lakeview, and it is likely the company will get busy in installing its machinery as early as possible in the spring. Market conditions are still unsettled, with a tendency to lower prices, and consequently the company will not purchase its entire equipment until the last moment, or at least until prices have reached what is considered the bottom.

The committee appointed at a recent meeting of the chamber of commerce to solicit subscriptions from the city property owners for the purchase of the site west and north of the Standard Oil company's plant, desired by the Pennsylvania Sash and Door company, is now collecting the amounts subscribed. A check from J. A. Cheyne, president of the company, for \$1000 was received this week. This represents the company's share of the purchase price of the land. Chairman Fred Reynolds, of the committee appointed by the Round-Up association, is also collecting the sum of \$500 from each of the ten local residents who volunteered to loan this amount to the association in order that the latter might acquire title to the remaining portion of the Guerrez property, taking in return a mortgage on the land and other property of the Round-Up association.

SULPHUR CLEARS A PIMPLY SKIN

Apply Sulphur as Told When Your Skin Breaks Out

Any breaking out of the skin on face, neck, arms or body is overcome quickest by applying Mentho-Sulphur. The pimples seem to dry right up and go away, declares a noted skin specialist.

Nothing has even been found to take the place of sulphur as a pimple remover. It is harmless and inexpensive. Just ask any druggist for a small jar of Mentho-Sulphur and use it like cold cream.—Adv.

PUBLIC HEALTH

(By DR. A. A. SOULE)

Having vaccinated about 60 people at Fort Klamath for small pox, and as more will be vaccinated when more virus comes, I have promised, through The Herald, to give a few facts about vaccination.

The cow can have smallpox about the same as the human by being inoculated with human smallpox virus. But it exists in a different type known as cowpox, manifested by pustules on the udder and teats. Smallpox, modified by passing through a cow, and the virus collected will, when given to the human, prevent the human from having small pox for at least five to seven years, and is a life protection from a malignant fatal form of the disease.

That the cow contracts smallpox is not to be wondered at, for it is common knowledge that she has tuberculosis. Ten per cent of tuberculosis in children is the bovine type.

The cow being heir to some of our diseases shows again our kinship to the animal kingdom. The snake that goes hissing across our path, the fish in our aquariums, the birds that sing, and the horse that carries our burdens, are undeniable brothers built on the same creative plan.

In 1798, Dr. Edward Jenner discovered the efficacy of vaccination. Since then countless lives have been saved. As an evidence of the virulence or fatality of smallpox I may mention that in Iceland in 1707, 18,000 perished out of a population of 50,000. And, again, about the same period, three and a half millions were smitten in Mexico.

The smallpox germ has never been discovered, but the virus is contained in the liquid matter and dried scab of the vaccination sore, or in those of the disease.

The original preparation of vaccine has been modified considerably. At first it was transferred from the virus of cows to people, then came the method of transferring from one person to another, then from that of a person to a calf and back to a person. Fresh virus or scabs were used first, then virus dried on splints, and then virus in 50% of glycerine.

The present method of production is:

First—Fresh virus from a healthy person is inoculated into a calf.

Second—The calf virus is inoculated into a rabbit.

Third—The rabbit virus is transferred to a calf, and the virus thus produced is that distributed for the vaccinating of human beings.

The object of passing the virus through three animals, one of which is a rabbit, makes it inconceivable that any human germs can survive.

After the virus is collected it is mixed with four times its bulk of a solution containing 50 per cent glycerine, 49 per cent water and one per cent carbolic acid. It is allowed to stand five weeks, then submitted to careful laboratory tests, attention being given to eliminate foreign bacilli, especially tetanus and blood poisoning.

The precautions result is a vaccine free from every bacteria known, and this is the vaccine that is being used at Fort Klamath.

The next article will explain the reactions and the course of vaccination.

Everybody Is or Should Be Talking of Building, Now---

"Let HER dream of a new home come true this year! Start planning now, so that as soon as the weather permits you can get the work under way, and have the new home completed in time to plant the flowers and garden."

The days of "high cost of lumber" are past. Recent price readjustments, covering a number of months, have brought lumber prices back "to earth." In fact, Lumber was the first of all great living commodities to come back to anywhere near a normal basis.

EASY TO BUILD—Made So by "Big Basin" Service

We have established a reputation in this community as an authority on lumber and its products, and how to use them.

Years of experience in the building and material business, and a special study of the different kinds of wood, enable us to give you practical advice as to the varieties and grades of material best suited for each particular purpose.

Our experience saves you money and mistakes. We take a personal interest in your building problems, helping you plan the arrangements and construction, making estimates, securing competent workmen, and helping you in every way we can.

That this service is appreciated is evidenced by our growing list of Satisfied Customers, who insist on telling their neighbors and friends about us, intimating that the "BIG BASIN" is a good place to go when buying lumber.
