CHILOQUIN MAN BESTS PAIR OF S. F. HOLDUPS

(By Associated Press)
SAN FRANCISCO, Jan. 28.—W. Green of Chiloquin, Ore., after a thrilling fight with two holdups who robbed him of his life and bank book led the police to a crowd of citizens in a long chase through the downtown district early today, resulting in the capture of the thugs. Green's wallet containing \$110 and his bank book were found upon the man, who gave his name as Harry Roto. Green's watch, which had been thrown away by the robber in flight, was found later. The other robber was arrested in Kearny street hotel. He gave his name as Serafino Ceres. Green was roughly handled and kicked by the bandit pair but was seriously injured.

MUSIC LOVERS TREATED TO A ROYAL CONCERT

Scandinavian hall proved to be hardly inadequate to seat the big crowd which gathered last night to hear Leopold Godowsky, pianist, in a wonderful interpretation of the works of pianoforte, and in original compositions. The acoustic properties of the hall also were inadequate, but despite this handicap, a master pianist demonstrated that a musical critic of the world have heard him upon a piano fully justified by his marvelous ability. The following tribute to his genius and to the wonderful success of his night's recital, was contributed by a member of the Sacred Heart academy's musical department: Admiration of Mendelssohn's polished elegance, heard again with delight the lyrics of their favorite, and ended with rapid attention to a master's exquisite interpretation of his mad, vigorous, baritone melody in minor expressing nobility courage and mainly strength. The mysterious murmur of his recital "On Wings of Song," and a happy little song of the maiden singing above the monotonous drone of her wheel in the "Spinning Song" showed in striking contrast, giving audience an evidence of his wonderful control of tone power. It is no secret that Godowsky's recital is that great genius of the piano, his fellow countryman, Chopin, naturally therefore, the performance will appear at his best in the Chopin selections culminating in the Polonaise Op. 53, which from its martial opening fanfare to its pensive climax held the audience rapt.

Godowsky gave three marks from his own pen which delighted his audience and displayed his originality. The final numbers from Liszt furnished a fitting close, calling forth the most finished technique from the city tripping in the "Danse of the Hours" to the masterful chord effects in the Polonaise.

Klamath Falls has been asked to take part in the conference of the national council of the chamber of commerce of the United States, to be held in Washington, January 27-28, when the formulation of a constructive national program for relief of the housing shortage will be undertaken.

Response to the invitations sent out by the national chamber indicate that there is great interest in the housing shortage, and a very definite willingness on the part of business men everywhere to join hands in an effort to work out a plan for its solution. The actual shortage of dwelling houses is estimated to be more than 1,250,000.

The program arranged for the conference takes up the various phases of the housing problem. The subject will be discussed under three main headings, construction, finance, and industrial housing, with the social and civic side of the question running through the entire conference.

COUNCIL IN CRISIS OVER AMOUNT OF GERMAN PAYMENT

(By Associated Press)
PARIS, Jan. 28.—A divergence of views of members of the allied supreme council regarding German reparations caused an interruption of the conference today.

In some quarters the conference was regarded as being in danger of a general breaking up.

The crisis came during the investigation of the total amount of reparations due from Germany and the methods of payment. Lloyd George was unable to agree, he stated, to any of the proposals under discussion.

An agreement on the reparations issue is forecast by French officials if Lloyd George accepts the Belgian proposal that Germany be compelled to make payments of six million gold marks annually as a maximum or three million marks as a minimum amount.

BILL TO KILL PINE BEETLE

Representative H. J. Overturf has advised the chamber of commerce that he has been endeavoring to have the state legislature pass a resolution asking congress to make an appropriation for a campaign against the pine beetle, which has been making extensive inroads in the forests of this state, much valuable timber having been destroyed by these insects. This country has suffered a great deal from this source. A bill carrying an appropriation of \$25,000 for the prosecution of this work was killed in the house after passing the senate, but Senator McNary has also advised the chamber of commerce that he is now working for the passage of another bill for the same purpose. It is believed that by working through the forestry and Indian departments that effective steps to eradicate these pine beetles will be assured. Timbermen, generally, believe that the surest way to remedy the evil is to cut down the trees affected, and thus destroy the nests from which myriads of beetles emerge and find homes in sound trees, thus continuing the work of destruction.

According to the fire chief's version of the trouble, Thompson was given employment by the fire department upon the representation that he had had experience in the Portland fire department. A letter to the Portland fire department, according to the chief, brought the information that Thompson had not been employed there in any capacity. The latter is said to have nursed a grudge against Delaney, and after entering the chief's office engaged in a one-sided argument, finally hitting the chief a stinging blow on the left eye. His arrest and trial followed.
