

**Auto Show Will Be a Hummer**

(Continued from Page Nine)

The features aside from the auto and auto accessories and parts display, arrangements having been made for excellent music, dancing, and other diversions. Appropriate decorations will add attractiveness to the exhibit.

The first dates selected for the show were March 14, 15, and 16, but the expressed inability of some of the exhibitors to have their cars on the ground at that time, may make it necessary to postpone the show one week, probably opening on March 21. One thing is sure, and that is that the show is going to be a hummer. It will be a medium for the display of the most serviceable cars made, and the thousand and one little devices and accessories that are making cars handier, more convenient and comfortable, and attractive, too, will be there in abundance.

get through if any car could lead them to go on. Relieving the stage driver of the mail for Big Bear, the party started on.

At numerous points along the road they encountered cars whose drivers had given up the attempt to get through and were returning. Despite repeated warnings of this character the party kept on until the top of Johnson's grade was reached where more than three feet of snow was encountered. From this point on it was impossible to go owing to the heavy snow. Leaving the car at this point, the farthest reached by any machine, the party set out to walk to Baldwin Lake, where the mail entrusted to them by the stage driver was delivered.

Unusually good shooting was found on the lake and a total of 26 fine canvasbacks were bagged.

**DEMOUNTABLE RIM IN 2 PARTS**

An Englishman is the inventor of a demountable rim for automobile wheels that is made in two parts, which are locked together with five bolts and a nut.

Cars of all models—they'll be there. Where? At the auto show to be held here in March.

**MODERN CRANK CASE SERVICE A CONVENIENCE**

"The average motorist," said Mr. C. M. Harris Jr., district sales manager of the Standard Oil company, "knows that he should have his crankcase cleaned every so often, but he doesn't know exactly why. It's not the most pleasant job, and he lets it go, usually, as long as he can. After all, the reasons for keeping an automobile crankcase clean are simple, and mighty convincing.

"Lubricating systems of automobiles are almost universally of the circulating type. The amount of oil pumped always exceeds the actual amount required for lubrication by the bearing surfaces. The surplus flows back to the main reservoir to be again circulated by the pump. As the oil circulates, and as it rests in the crankcase, it becomes contaminated by fuel that works past the pistons, by carbon that forms on and falls from the under side of the piston heads, by road dust that is sucked in through the breather pipe, by water, a product of combustion, which may work past the pistons and mix with oil and metallic particles which are the result of the wear and tear of operation. With the first movement of the engine the process of oil contamination begins and it increases as operation continues until the oil becomes charged with dirt and loses its lubrication value.

"To keep the engine running at its best, change the oil in the crankcase as often as the manufacturer's instruction book says it should be changed. However, it is not sufficient to simply drain out the old oil, for that leaves deposits of dirt and badly contaminated oil in the crankcase to impair immediately the efficiency of the new supply of oil when it is poured into the crankcase. The whole operation must be most thorough.

"Cleaning the crankcase is a troublesome job to the average motorist. For this reason regular cleaning of the crankcase was often neglected.

"To remedy this condition and to add to the efficiency and life of automobile engines, the Standard Oil company is sponsoring a new crank-

**Zero Cold Test Oil Will Correct Your Lubrication Troubles**

"If the oil in your engine will congeal or thicken excessively, at 15 degrees above zero, you should hardly expect it to splash and flow freely at 12 degrees above zero," said Louis Hoagland, Buick sales agent.

"Yet some motorists wonder why it takes so long to get the engine to run freely these cold mornings. The cold engine, not getting sufficient lubrication, is subject to excessive and damaging friction. The oil pump cannot circulate congealed oil, so there will be an insufficient supply thrown upon the cylinder walls—until the struggling motor has warmed up the oil so it will flow more freely.

"A zero cold test oil flows freely at all temperatures down to zero, that's why it is called a zero cold test oil. Zerolene medium is a zero cold test oil. It is correctly refined from selected California crude oil and flows freely and splashes properly at all temperatures down to zero. This zero cold test oil gives the same correct lubrication to your engine during these cold days that you are used to getting during the summer months."

**ONLY ONE IN THE COUNTY**

A magnet charging outfit for recharging and testing all kinds of magneto magnets has arrived at the Reed Auto Supply company. This is an innovation here, being the only one in the county, according to reliable information.

case cleaning service, cooperating with high class garages throughout the Pacific coast. This new service is indicated on the sign that identifies garages where this service is to be had—modern crankcase cleaning service. The service is simple, but according to our lubrication experts it is most thorough and exceedingly efficient. Just three operations are necessary to give this service; drain off the old, diluted oil, flush out the crankcase with Calol flushing oil, and refill the crankcase with fresh oil of the correct grade for the engine. It's a while-you-wait service, too.

"Modern crankcase cleaning service is a new step toward keeping engines fit for steady service; it means, obviously, better engine performance and longer engine life."

Let Your Money Earn

**8% Interest**

While You Wait

There are going to be more Ford Cars sold in this county this year than ever before. That is why you had better have yours reserved for you now. We will make delivery on any date you designate and will pay you 8 per cent interest on your deposit money. In this way you are absolutely sure of your car, and while you are waiting to take it out we will pay you 8 per cent interest on your money.

There are no strings to this offer.

DANNER-PATTY MOTOR COMPANY Eighth and Klamath

P. S.—If you change your mind before delivery is made, or if for any other reason whatever you find you cannot complete the sale, we shall cheerfully refund you your money with the 8 per cent interest added just the same as if you had taken the car. There will be no charge for storage until the car is delivered.
