

"Wild Man" of Swamps

This is the first picture ever taken of Albert Parsons, the "wild man of the Mississippi swamps," who, with his wife and child, fled from the jungles of Leaf River, near Lux, Miss., because of high water. For years there have been reports of a "wild man" in the swamps. Parsons says he caught his wife in a steel trap many years ago. She lost one eye in a fight with a wild cat. When they appeared the child was naked and Parsons and his wife wore crude, torn garments they had used for years. This picture was taken at the Ellisville (Miss.) infirmary after they had been given new clothes.

PRINCE LEARNS ABOUT MAKING OF NEWSPAPER

LONDON, Jan. 19.—(By Mail)—The prince of Wales has just been initiated into the complexities of modern newspaper production by visiting the offices of the Times and following a piece of copy from an editor's desk through the composing, proof-reading and stereotyping room. Then he pressed the starting button of a mammoth octuple press and saw the article reproduced in print. The first folded paper which came from the roaring machine was handed the royal visitor who smiled as he saw on the front page a picture of himself with a caption stating that he had started the machinery which printed it. Throughout his inspection of the many departments of the great newspaper office, the Prince kept up a rapid-fire of questions which showed his keen interest in the art of newspaper making.

The difference between various kinds of automatic typesetting machines, the amount of time saved by their substitution for the old hand-setting method, why cylindrical moulds of the original type forms are placed on the presses instead of the flat chases of type themselves, the spread of the presses and the length of a roll of newspaper paper were among the points on which the Prince was curious. He marveled at the ability of "make-up men to read type upside down and failed to recognize a three-column "cut" of himself in the form he was endeavoring to read. In the composing room he picked up a slug of type as it came from a monotype machine, but found it too hot to hold.

John Walter, chairman of The Times, and Wickam Stead, editor, served as guides to the Prince. The directors of the newspaper, several departmental heads and a small number of visitors invited for the occasion, were presented to him. With each he chatted a short time, discussing individual avocations, business, sport and travel, in his usual simplicity of manner.

The Prince is the second heir to the throne to visit Printing House Square. In 1863, the late King Edward, then Prince of Wales, made a similar inspection of The Times' plant.

Australia Provides Educational Fund For War Orphans

MELBOURNE, Jan. 17. (By Mail).—The Australian government has undertaken to educate the children of Australian soldiers killed or totally incapacitated in the world war. At least 12,000 children are expected to benefit.

The plan covers the whole range of the educational curriculum, in industrial, agricultural and professional courses, together, where necessary, with periods of apprenticeship and a subsidy by way of sustenance while undergoing such training. A fund of approximately \$6,500,000 is on hand, which includes a deficit from the Federal Government of \$4,000,000 and a transfer from the Repatriation Trust Fund of approximately \$650,000. Large contributions are assured from other sources.

Claims of ex-Service Men on Government Will Be Investigated

A flying squadron, formed for the purpose of canvassing the state in the interest of ex-service men who have claims against the government will visit this city within a short time, according to Adjutant Roy Fouch of the local American Legion post. Questionnaires have been received by the adjutant, and the latter requests service men to return them as soon as possible after distribution, in order to hasten the work of the squadron when it arrives.

Matters relative to vocational training, insurance and compensation, and other things vital to the ex-service man, will be adjusted, and it is stated also that the matter of competent doctors will be taken up.

Unsettled claims for back pay, bonuses and travel pay, will be given particular attention.

A large relief map of the world, showing all known physical conditions of the globe, is being prepared by the U. S. shipping board.

SAVE FORESTS SAYS GREELEY

WASHINGTON, D. C., Feb. 7.—Need for public action to save the remaining forests of the United States from devastation and to provide for timber production on land already laid waste was strongly urged by Col. W. B. Greeley, chief of the forest service, United States department of agriculture, at the hearings before the house agricultural committee on the Snell bill.

The bill authorizes and directs lands from fire, reforesting denuded operation with the various states or other suitable agencies, to recommend the requirements essential for protecting timbered and cut-over lands from fire, reforesting denuded lands, and cutting and removing timber crops so that continuous production of timber will be promoted. To bring into effect these requirements, and with a view to furnishing a continuous supply of timber for the use and necessities of the public, cooperation between the federal government and the states is authorized, on such conditions as the secretary of agriculture may determine to be fair and reasonable.

Federal expenditures under cooperative agreements with states would, under the bill, have to be at least equaled by state expenditures derived either from general taxation or from owners of forest lands under state requirements. The bill also provides for a survey of the forest resources and requirements of the country, for experiments and investigations in reforesting and methods of cutting and utilizing timber, for enlarged purchases of lands for federal administration as national forests, and for various other features of a national program of forestry.

\$2,000,000 WORTH OF BOOZE SEIZED IN MONTANA, 1920

BUTTE, Mont., Feb. 7.—Internal revenue taxes, amounting to \$111,000, were assessed in Butte in 1920 against liquor that was seized in this locality, according to statistics. The total assessment for the state of Montana was about \$200,000, it is said, which would indicate that about one-half of the liquor violators of the state were arrested in Butte.

Revenue agents here have stated, however, that a great portion of this assessment cannot be collected because the law violators apprehended had little or no property that could be confiscated. The assessments include also penalties for making liquor illegally.

Prohibition enforcement officers,

Be Good to the Birds

Uncle Sam and the American Forestry Association ask all boys and girls in the country to build birdhouses—right away—so they'll be ready for spring newcomers. Children down in Washington are doing it with a vim. This picture shows a birdhouse that won a blue ribbon in Washington school contests being mounted in a tree by its builders. Inset is Peggy Baker, daughter of War Secretary Baker, with the birdhouse her brother Jack built for her.

It is stated, have confiscated 59 automobiles, used by alleged whisky runners, having a total valuation of \$50,000.

CO-OPERATIVE MARKETING

REGINA, Sask., Feb. 7.—A campaign for the development of cooperative livestock shipping in the province will open shortly, it has been announced here. It is planned to send speakers out to assist with the organization of cooperative livestock associations.

FAMOUS PAINTING SOLD

VIENNA, Jan. 12. (By Mail).—The painting entitled "Reichstag," a canvas by the Pole, Matejko, has been sold to the Polish government by Austria, not primarily to bring

some money into the Austrian treasury but to satisfy Polish national pride.

It pictures the scene in Warsaw, in 1766, when the Poles, under the force of Russian pressure, renounced their right to have their own parliament.

The ten invaded departments of France have produced this year 500,000 tons of wheat and one-fourth the country's oat crop.

Because salmon are taken largely during the spawning season, it is believed they will soon be extinct unless artificial propagation is resorted to.

Notification of an increase in rent is not legal if sent by mail in Chicago.

AN INSIDE BATH MAKES YOU LOOK AND FEEL FRESH

Says a glass of hot water with phosphate before breakfast, keeps illness away.

Physicians the world over recommend the inside bath, declaring this is of vastly more importance than outside cleanliness, because the skin pores do not absorb impurities into the blood, causing ill health, while the pores in the ten yards of bowels do.

Men and women are urged to drink each morning, before breakfast, a glass of hot water with a teaspoonful of limestone phosphate in it, as a harmless means of helping to wash from the stomach, liver, kidneys and bowels the previous day's indigestible material, poisons, sour bile and toxins; thus cleansing, sweetening and purifying the alimentary canal before eating more food.

Those who wake up with bad breath, coated tongue, nasty taste or have a dull, aching head, sallow complexion, acid stomach; others who have bilious attacks or constipation, should obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to show the value of inside bathing.

No Sunday Blue Laws For Dutchmen

THE HAGUE, Jan. 14. (By Mail).—An indictment of "blue Sunday" advocates was returned in the report of a committee of the second chamber of the Dutch parliament on a bill proposing to forbid amusements, curtail train service, etc., on Sundays.

"The Sabbath was made for man, not man for the Sabbath," said the report, killing the bill. "The closing of the theaters and the prohibition of games would lead many to seek amusement in a less innocent way. The reduction of passenger traffic on Sundays would prevent people who were shut up in close homes and narrow streets all the week from enjoying fresh air and nature on the Sabbath."

Plan to Fly Into Northern Oil Dist.

VANCOUVER, B. C., Feb. 7.—A syndicate of Vancouver citizens has organized to journey to the oil fields of Fort Norman by airplane, and preparations are being made for the trip. The local pilots who will compete with those aviators who have been engaged by the Imperial Oil company, and with other expeditions in the flight to the far north are Captain J. W. Hobbs and Lieut. R. L. Horie. Lieut. Horie will act as field engineer of the expedition. J. B. Estey, local engineer, who is interested in the project and is familiar with the country to be traversed, stated that the attempt to reach Fort Norman would not be made until the opening of navigation. The party will enter by way of Edmonton and Fort McMurray. Seaplanes have been decided upon as the most suitable type of aircraft for the trip. Extremely cold weather is holding back people who wish to go by the land route.

FARM BUREAU MEMBERS WAR ON MALNUTRITION

SPOKANE, Feb. 7.—Interested in the problem of malnutrition among their children, the farm bureau women of Spokane county recently weighed and measured rural children, and found that 40 per cent of those measured were 7 per cent, or more, underweight. "Malnutrition" is cited as the most probable cause of the condition discovered. Parents, school boards, and teachers in rural Spokane county have been induced to cooperate in providing hot lunch for the school children during the present winter. A few weeks after the hot lunch was started, many of the children attained normal weight.

Java furnishes the larger part of the world's supply of quinine.

LIFER PARDONED

MARY LUCAS

The final official act of Governor Sleeper of Michigan, before his term ended, was to sign a pardon for Mrs. Mary Lucas, 74, who was serving a life term in the Detroit House of Correction for the murder of her husband in 1913.
