## At the Theaters

### THE STAR

The appearance of Conway Tearle as a Selznick star is the feature at the Star tonight.

"The Road to Ambition" is an ideal vehicle for Mr. Tearle, as it gives him an opportunity to display his talents in a role that has great latitude. He is first seen as Bill Matthews, a husky young foreman in a steel mill. Bill is ambitious, and knows how to use his brain as well as his brawn, although he is sadly handicapped by lack of education. He evolves a method of using waste material and turning it into a valuable by-product, and thus takes his first step on "the road of ambition." Overcoming, by dint of study and application, his ignorance, he then becomes a powerful factor in the field of endeavor. There is a pretty love theme running throughout the story.

### THE MONDALE

The Mondale picture offerings include a sensational western picture featuring Neal Hart, the screen's greatest exponent of western characterizations. This is positively the most thrilling and sensational picture ever made. It does not seem possible that any human being could do the stunts that Mr. Hart does in this picture and live. There will also be a two-reel Mack Sennett comedy that will send you away with your sides aching from laughter.

A jazzical mixup of prohibition reformers, old maids, bootleggers, and pretty girls—that's "What Happened to Jones," which shows at the Star Wednesday. Bryant Washburn is the star. You know his fun-making powers in light comedy roles. He's at his best in this picture.

A Roman battle standard and a Roman general's folding camp chair, antiquities dug up in Essex a century ago, two of Great Britain's most ancient military trophies, were recently sold at a London auction room for 200 pounds.

Argentina is manufacturing paper from a species of bog grass called "paja brava." The grass grows during the entire year and in swampy sections it has been considered a nuisance.

## Present Prices

are below normal—are below the cost of production in many lines. Wholesalers and retailers alike have been over-stocked and are now in temporary need of cash, and to stimulate buying during the dull season, prices have been slashed to below replacement costs in many instances.

This applies especially to LUMBER AND BUILDING MATERIALS. Profits have been eliminated in order to turn surplus stocks into cash.

BUY NOW—BUILD NOW. Prices are certain to be higher. As the season advances money will be more plentiful and the demand greater. Whenever you buy,
