

AIRPLANES TO CRUISE WIND SWEEP FOREST

SEATTLE, Wash. Mar. 22.—Airplanes soon will be circling over the Olympic Peninsula, a vast stretch of wild timbered country in the far north western corner of Washington. In an effort to determine accurately the damage wrought by a seventy minute tornado which on January 29, caused what officials say was the greatest timber disaster in the history of the country.

Eight billion feet of lumber was splintered or crashed to the ground by the storm, according to estimates made by state officials, government foresters and lumbermen who visited the Olympic country with Governor L. F. Hart after the storm. The financial loss, they say, may be estimated at between \$100,000,000 and \$150,000,000. State Land Commissioner Carl Savidge, a member of the governor's party estimated that 25 per cent of the trees on state holdings had fallen.

Timber remaining on the peninsula constitutes the greatest fire menace in the United States today. Mr. Savidge declared in a report. One cigarette stub, he said, might be enough to start a fire that would sweep the area. "If fire comes," he said, "the damage that has already been done will be puny and insignificant beside that which will result."

Plans for salvaging the fallen timber and that left standing await the result of the airplane survey before completion. The federal government has been asked to provide a means of entry into the district and state officials expect that some use will be made of the railroad by the United States Spruce Corporation during the war, running from Fort Angelus on the edge of the storm area, into the interior of the peninsula. Present plans contemplate giving Governor Louis F. Hart wide latitude in directing the work of fire prevention and opening up roads and trails. Proposals for burning over the entire area in the early spring while brush and foliage are wet thus removing the menace of drying undergrowth have been discussed.

No lives were lost in the storm, although a number of the settlers had almost miraculous escapes. Many barns and dwellings were destroyed and between twenty and thirty families rendered homeless. Horses and cattle were killed. A power plant at Forks, in the center of the storm area, was razed, and six houses in the Indian village of La Push, near the Pacific Ocean, were blown away. Settlers have taken a measure of comfort from the statement that any two of the giant trees uprooted would more than furnish enough lumber to replace every building damaged by the wind.

Of 150 miles of rangers' trail and 150 miles of telephone line, not a trace remains. The Olympic highway, a scenic route, was blocked for miles by uprooted trees. Roads and trails were obliterated by trees piled many feet high in the most open places.

Reports reaching State Game Commissioner L. H. Darwin indicated that the destruction of elk, thousands of which roamed the peninsula, protected by the law, was not as great as was first reported. Hundreds of them were imprisoned by fallen trees blocking their trails, however. Mr. Darwin said, and unless a way is found to release them, they may starve to death.

Spruce and Hemlock.

It is not difficult to distinguish between spruce and hemlock in the forest, when one learns to notice the following points: The spruce has stiff pointed leaves (or short needles), its bark scales are never bright red, and the cones—smaller than those of the pines—hang down on the branches. The hemlock, on the other hand, has soft flat needles, often two-ranked, that is, growing on two sides of the stem, so that the sprig has a flattened appearance; hemlock bark scales look red, when broken off, and the dainty little cones stand erect on their branches, falling apart soon after ripening, so that no old cones long remain on or under the trees where they grew. Lumber from the two trees may be distinguished by remembering that that of the spruce is white in color, while hemlock wood retains its faint reddish tint.

A trout lays a thousand eggs for each pound of her weight. But hardly three in a hundred hatch out, for the rest of the inhabitants of the stream are waiting to devour them.

SEVENTY IS INDEPENDENT AGE SAYS DR. JORDAN.

SAN FRANCISCO, Mar. 22.—Seventy is just the age of independence,

Outbursts of Everett True By Condon

ALASKA PULP IS FINE GRADE

JUNEAU, Alaska, Mar. 22.—Alaska paper pulp is as of "fine a grade of pulp as ever came to San Francisco," according to a cablegram C. W. Callahan, California paper company official sent to Juneau recently when he received samples of the first pulp manufactured in the territory.

Manufacture of pulp in Alaska is expected to become an industry which soon will rival fishing and mining in the north. One mill, already operating on the Speel River, south of here, sent the first shipments to the outside recently, and other plants are being planned. The thousands of acres of timber and the great undeveloped water power supply will be used to develop the industry.

Samples sent to Mr. Callahan were from the first day's run at the Speel plant, which is owned by the Alaska Pulp and Paper Co. The plant has increased its output until it is now producing an average of five tons of pulp a day. The pulp is shipped direct from the mill to Seattle. About thirty men are working at the plant, in addition to the loggers getting out the timber.

Another plant is being planned for Humpback Bay, on the mainland near Wrangell, Alaska. Application for a waterpower permit for Humpback has been made to the government by the Alaska Development and Mineral Company, which, it is understood, is a subsidiary organization of the Kennecott Copper Corporation, a Guggenheim company.

Dr. David Starr Jordan, chancellor and former president of Stanford University declared in a talk here recently. A man of seventy is just in his prime, he declared.

Dr. Jordan, who has just celebrated his seventieth birthday, said the greatest need of a man of seventy is a wife.

U. OF C. LEADS ATTENDANCE

BERKELEY, Cal., Mar. 22.—Numerically, the University of California leads the thirty largest universities in the United States and probably in the world in full time regular enrollment and probably in the total number of persons instructed, according to figures received here from Raymond Walters of Lehigh University, secretary of the American Association of Collegiate Registrars.

In his statistics of registration of thirty American universities for 1920 Mr. Walters gave first place to California with a registration of full-time regular students of 11,971, a grand total of resident students of 16,379 and a final sum total of all persons instructed of 36,904 persons. Columbia University, New York, was given second place with 8,488 full-time students.

Figures used by Mr. Walters were based on enrollment data to November 1, 1920, only. James Sinton, recorder of the faculties here, said later figures have brought the total number of regular students here to 12,315 persons.

Mr. Walters said California was first in enrollment in liberal arts and in number of women students. In the total of men students it is third, being exceeded by Harvard and Michigan, and in its law school it is fourth in size. The California summer school is the second largest in the country.

FIRST FLOUR MILL IS BUILT AT FAIRBANKS.

FAIRBANKS, Alaska, Mar. 22.—Interior Alaska soon will be using, exclusively, home grown and home ground grain, a flour mill having been established here. Wheat from the several farms in the Tanana Valley will be brought to the mill and the flour will be sold at inland points.

Spring Hats Will Be Small and Bright

Here are three of the prettiest and most practical of the new spring hats. All colors are bright, more brilliant, even, than during preceding springs. Jade green, copper and the new "sunset glow" are among the most popular shades. The first hat, a flowered turban, is elaborate enough for wear with afternoon frocks as well as suits. It is made of shaded geranium blossoms, with a row or two of the straw braid of which the hat is made showing next the face. The next two hats are designed along strictly utility lines. The one with the brim is made of taffeta, the under side being a self-colored braid. A perky little bow of the silk at the back adds much to this hat's smartness, while the wreath of tiny bright red cherries and their leaves softens the line about the face. The draped straw-cloth toque is relieved with unattached grapes and leaves of velvet.

OUCH! BACKACHE! RUB LUMBAGO OR STIFFNESS AWAY

Rub Pain From Back With Small Trial Bottle of Old "St. Jacobs Oil."

When your back is sore and lame or lumbago, sciatica or rheumatism has you stiffened up, don't suffer! Get a small trial bottle of old, honest "St. Jacobs Oil" at any drug store, pour a little in your hand and rub it right on your aching back, and by the time you count 50, the soreness and lameness is gone.

Don't stay crippled! This soothing, penetrating oil needs to be used only once. It takes the pain right out and ends the misery. It is magical, yet absolutely harmless and doesn't burn the skin. Nothing else stops lumbago, sciatica, backache or rheumatism so promptly. It never disappoints! —Adv.

Diamond Dye It Like New Again

Each package of "Diamond Dyes" contains simple directions to dye old, faded, shabby materials whether wool, silk, linen, cotton or mixed goods, any new, rich, fadeless color. Buy no other dye.

SAGE TEA KEEPS YOUR HAIR DARK

When Mixed With Sulphur It Brings Back Its Beautiful Lustre At Once

Gray hair, however handsome, denotes advancing age. We all know the advantages of a youthful appearance. Your hair is your charm. It makes or mars the face. When it fades, turns gray, and looks streaked, just a few applications of Sage Tea and Sulphur enhances its appearance a hundredfold.

Don't stay gray! Look young! Either prepare the recipe at home or get from any drug store a bottle of "Wyeth's Sage and Sulphur Compound," which is merely the old-time recipe improved by the addition of other ingredients. Thousands of folks recommend this ready-to-use preparation, because it darkens the hair beautifully; besides, no one can possibly tell, as it darkens so naturally and evenly. You moisten a sponge or soft brush with it, drawing this through the hair, taking one small strand at a time. By morning the gray hair disappears; after another application or two its natural color is restored, and it becomes thick, glossy and lustrous, and you appear years younger. —Adv.

IF BACK HURTS BEGIN ON SALTS

Flush Your Kidneys Occasionally If You Eat Meat Regularly

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which clogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, constipation, dizziness, sleeplessness, bladder disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, get about four ounces of

Jad Salts from any reliable pharmacy and take, a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia and has been used for generations to flush clogged kidneys and stimulate them to activity, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder disorders. Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which all regular meat eaters should take now and then to keep the kidneys clean and the blood pure, thereby avoiding serious kidney complication. —Adv.

NOSE CLOGGED FROM A COLD OR CATARRH

Apply Cream in Nostrils To Open Up Air Passages. Ah! What relief! Your clogged nostrils open right up, the air passages of your head are clear and you can breathe freely. No more hawking, snuffling, mucous discharge, headache, dryness—no struggling for breath at night, your cold or catarrh is gone. Don't stay stuffed up! Get a small bottle of Ely's Cream Balm from

your druggist now. Apply a little of this fragrant, antiseptic cream in every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, giving you instant relief. Ely's Cream Balm is just what every cold and catarrh sufferer has been seeking. It's just splendid.

TAKES PAIN OUT OF RHEUMATISM

Keep Sloan's handy for backache strains and sprains, too. SLOAN'S Liniment has been sold for 39 years. Today it is more popular than ever. There can be but one answer—Sloan's produces results. Applied without rubbing, it penetrates to the afflicted part, bringing relief from rheumatic twinges, sciatica, stiff, strained muscles; backache, sprains, and other external pains, often the result of exposure. It leaves no unsightly, skin stain or clogged pores. Get a large bottle for greater economy. Keep it handy for use when needed. Your druggist has it. Three sizes—35c, 70c, \$1.40.

Kill That Cold With HILL'S CASCARA QUININE FOR Colds, Coughs AND La Grippe

Neglected Colds are Dangerous. Take no chances. Keep this standard remedy handy for the first attack. Breaks up a cold in 24 hours—Relieves Grippe in 3 days—Eliminates Headache. Quinine in this form does not affect the heart—Cascara is best Tonic Laxative—No Opium in Hill's.

ALL DRUGGISTS SELL IT

The 'Other Fellow's Bank Account

PERHAPS you think patronizing home industry benefits someone else more than it does YOU! But, on the other hand who should have consideration when the 'other fellow' does the buying? Everything which builds up good business here in Klamath Falls contributes its share to the prosperity of everybody in this community.
