Regulating Receipts and Disbursements

THERE'S no better way to do that than by having one of those 'nationalized' accounts at the First National. Being WILLING to save is not all that's necessary. You must have the means of guarding incoming money—and guiding outgoing money.

Our Membership in the Federal Reserve System is not the LEAST of the advantages in banking here.

Is It A Gamble?

The financial backers and promoters of the oil companies now engaged in actual drilling and development work in Klamath Valley are not gamblers. They are the safest, sanest, hardest headed kind of business men. They are your neighbors. You have watched their rise in the business world. You have seen their ventures succeed. They take chances, to be sure. Chances have to be taken in all business ventures.

Are you not willing to take the same chances they have taken?

Are you too timid to invest your money in a business venture with the best business men in Klamath Falls?

If it looks good to bankers and business men to invest their money in Klamath Oil Stocks, doesn't it look good to you too?

We cannot and do not guarantee that we will strike oil. But we can and do guarantee that we are going to drill an oil well; and that your dollars will be honestly and economically spent in actual drilling and development work, and that the more dollars we get the deeper we will drill, and that the faster these dollars come in the faster we will drill.
