**FIND MAMMOTH RELIC**  
LOS ANGELES, Cal., April 9.—A pelvic bone of immense size and believed to have been part of a skeleton of a gigantic pre-historic animal, has been found during excavations at Torrance, near here. The excavations were made in lime deposits and have uncovered a great variety of bone, shell and rock deposits. Dr. C. L. Edward, head of the nature study department of Los Angeles schools, inspected the find and declared the animal to which it once belonged was probably the greatest in size that ever walked the earth.

### VETERAN RETIRES

SAN FRANCISCO, April 9.—Joseph B. Lauck, adjutant-general of California under Governor George C. Pardee and James N. Gillette, has been placed on the retired list by the pension board of the Southern Pacific railroad, by whom he was employed as special passenger agent.

## TENDENCY IS TO CROWD COLLEGES

BOSTON, Mass., April 7.—When a liberal arts college reaches an enrollment of 500 it ought to stop and organize a new college unit, with separate faculty, and a dean independent of the other, in the opinion of President Lemuel H. Murlin of Boston University. His statement was made in connection with the action of several colleges in limiting the number of students.

"My conception of the ideal liberal arts college is one having a faculty of 50 and a student body of not more than 500," said President Murlin. "When the numbers exceed these the organization is too large, and it would be better to divide it into units. Separate colleges ought to be established, with separate faculties and deans acting independently of each other."

"The interest of the college officials will focus on the entering class in the fall of 1932," said President Murlin. "It is doubtful if the enrollment will then show anything but the normal increase. There will probably be a reduction rather than an increase in the entering classes all over the country."

"The abnormal increases in enrollment during the past three years have been due to the delay caused in the education of hundreds of young men by the war, and the general prosperity. Then, too, the efficiency of the college graduate in the war has caused a widespread appreciation of the benefits of a college education."

"It is improbable that the great increases will be sustained. I do not

anticipate as large increases in the next three years as in the last three. The high peak of the rush to the colleges was reached in the fall of 1919, and we shall have to wait until this class graduates in 1923 to see what the normal students enrollments of the colleges will be in the future."

## If the Wood Dealer Sold Service

Do do not sell current; we sell service. That sounds odd doesn't it?

Well, suppose the wood dealer sold service instead of wood, he would tend to your furnace and your range, take away the ashes and clean the flues. You would buy so much heat.

Now you buy so much light, although you pay according to the current you consume. But the service is performed for you by this company at the substations and power plants.

That is what we want to give you—efficiency service. It is the aim of this company to have none but satisfied customers. No matter what it is, if you have a grievance, or are dissatisfied about your bill or do not understand our rates, please come and see us or write us about it.

If you have any suggestions to make, we will gladly avail ourselves of them as our aim is constantly to improve our service to you as fast as the development of science and human ability permit.
