

# BUILD YOUR OWN HOME

For specifications and prices on these beautiful homes, consult with the advertisers on this page.

There are many young people in Klamath Falls today who are making this mistake. Instead of starting that home today, they are putting it off for tomorrow. They are refusing to make the sacrifice that will bring such rich reward later. Instead of doing this, they should be buying a lot, even if they have to buy it for a little down and a month. On this a start for a home should be made, no matter how humble that start may be. It will not be long before the trees and roses, and shrubs—the real setting for a home—will make a showing that will cause you and everyone else to forget the modest little cottage and only see the greater and more glorious jewel that shines so resplendent in its wonderful setting—the home.

### THE HOME

It is a whole lot better to have your money invested in a home than it is to have it tied up in a bunch of rent receipts. Too often young folks, when they start out after marriage, decide to postpone

the day on which they want to start buying a home. A dozen and one excuses will be advanced against the move, and very few for it. One of the chief is that it "ties us down too much." As years roll by and this same couple starts down the hill of time they look back upon the day when they

decided to "wait a while" as being the one big mistake of their lives. In the first place, they were not "tied down," and they paid enough to the railroad companies to build and furnish a nice comfortable home. They moved from place to place, denying themselves the comforts of a real home and a circle of

friends who would extend a helping hand in the hours of affliction and sickness. They came and they went, looking, seeking for that which they should have started in their youth—a home.

## Your Carpenter or Contractor

Will probably buy your windows, doors and mill work from us. (Most of them do.)

But to make sure he uses "MADE IN KLAMATH FALLS PRODUCTS" in your work, have it in your contract and building specifications.

If he tells you that they will cost him more; tell him that we will meet any prices which he can get in Portland or elsewhere. Tell him that the only firm that undersold us, recently went bankrupt. (A well-known Portland outfit.)

If he says our products are not as good, we will give you a list of hundreds of satisfied customers to refer to. Tell him that we guarantee the quality of both material and workmanship to be the best of its grade, and are always glad to make good our guarantee. Tell him we give BETTER PRODUCTS, BETTER PRICES AND BETTER SERVICE than he can get anywhere else.
