Rehearing of the Churchill Land Litigation Ordered

The state supreme court, according to a notice just received by Robert T. McKisick, deputy attorney general, has granted the application for a rehearing in the cases of Robert B. Reynolds and W. B. Franklin against the Churchill company, says the Sacramento Bee.

The issue in the suits, which has been before the courts for years, involves the character of and the

title to several thousand acres of land adjacent to Lower Klamath lake in Siskiyou county. Recently, the third district court of appeal handed down a decision denying a rehearing of the cases, and McKisick at that time announced the supreme court would be asked to grant a rehearing by administration officials charged with the management of public lands, irrespective of what action was taken by the other litigants.

The principal issue involved is whether the lands in question should be properly classified as

"recession" or swamp and overflowed lands in the meaning of the statutes. He stated the state is interested to the extent of about 20,000 acres.

"Kismet" is coming soon.

Are You Waiting For Rents to Come Down?

Are you one of the millions who are patiently paying rents that are from 20 per cent to 50 per cent too high?

If you are, do you know the facts?

Do you know that Klamath Falls is short 250 homes; that experts estimate the United States to be four years behind in building requirements?

The law of supply and demand always fixes prices. So long as there is a home shortage landlords will demand high rents and tenants will be forced to pay them.

The one way out is to become a home owner yourself.

You can build now cheaper than at any time in the past five years, and almost as cheaply, we believe as at any time in the next five years.

Lumber and building materials have taken a tremendous drop. The complete cessation of building has caught manufacturers with big stocks which they have been forced to sell almost at cost.

If you buy now you can take advantage of their situation. If you wait, you will buy when everyone else is buying, and you will find the increasing demand forcing prices upward.

In our opinion, right now is a good time to build.

You owe it to yourself to investigate thoroughly.

Call and see us, or a letter or phone call will bring us to you at once.

Build now and use
