THE WOMEN'S STORE

### NEW ORGANDIE DRESSES AT RIGHT PRICES

Organdie dresses are very popular this summer, and we have made arrangements to have them shipped to us fresh each week. By doing so we do not overload but turn our stock so often that we can handle them for less profit than others can afford to sell them for. See our line first. Prices \$10.00, \$12.50, \$15.00

# MILLIONS

HAVE BEEN MADE DURING  
Oil Excitements  
By People Who Didn't  
Have a Dime

If there is oil in Klamath, we believe it will be **STRUCK THIS SUMMER**. Experts say we have a wonderful chance to strike it in our well No. 1.

Oil has already been struck in the Siemens well. A little more drilling will demonstrate the quantity. The farther the drill goes down the greater the gas pressure becomes.

**EXPERTS PREDICT THAT THE SIEMENS WELL WILL BE A GUSHER.**

There is no stock for sale in the Siemens company. The time will come when there will be no stock for sale in our company, either.

People who are well informed and who have real knowledge of Oil Prospects in Klamath are borrowing every dollar they can raise to put into oil development. Men of sound, cool judgment are sacrificing other interests to get money to put into Oil Stock in Klamath.

**THEY ARE TAKING A CHANCE TO BE SURE.**

**BUT THE MEN WHO TAKE CHANCES ARE THE MEN WHO MAKE MILLIONS.**

Ten dollars invested now will make you more money than a hundred invested after oil is struck.

## SMALL PART OF POWER IN USE

Records in Office of State Engineer Show Not More Than 5 Per Cent of Total Has Been Developed.

Herald Salem Bureau  
SALEM, Ore., May 27.—(Special) records on file in the office of Percy A. Cupper, state engineer, show that not more than 5 per cent, and probably less than that amount, of Oregon's water power possibility is actually developed and in use. The latest biennial report of the state engineer in general figures says it is estimated that Oregon streams, including those on the boundaries, are capable of producing between 3,000,000 and 4,000,000-horse power, and that less than 200,000 has been developed, while the ultimate development of sites at which power is now being used is less than 50,000-horse power. Using specific figures, other records on file in the engineer's office place the total horse power at 3,441,437. Of this tremendous amount 2,662,350-horse power represents undeveloped projects that have been investigated by the state, 291,900-horse power represents other power possibilities that have not been investigated, and 487,187-horse power represents developed and partially developed projects. Developed projects of less than 200-horse power have not been listed. Undeveloped proposed projects which have been investigated by the

state and the estimated power for eight months of the year when the water is high, are as follows in Klamath county, Ore.:

**Rogue River**  
Devil's Star project—Continuous horsepower, 30,000; river discharge 1350 second feet minimum; head, 100 feet.

Horseshoe Bend project—Continuous horsepower, 30,000; river discharge, 1350 second feet minimum; head, 110 feet.

**Klamath River**  
Klamath Falls project—Continuous horsepower, 70,000; river discharge, 1160 second feet minimum; head, 700 feet.

Total of above listed projects, 2,662,350 continuous horsepower.

Other power possibilities which have not been investigated by the state are listed as follows:

Clackamas river—Flow, 1000 second feet; number of sites, 1; horsepower, 11,700.

McKenzie river—Flow, 600 second feet; number of sites, 4; horsepower 195,000.

Umpqua river—Flow, 1000 second feet; number of sites, 2; horsepower 32,700.

Santiam river—Flow, 500 to 750 second feet; number of sites, 4; horsepower, 52,500.

Total horsepower, 291,900.

### WEATHER PROBABILITIES

The Cyclo-Stormograph at Underwood's Pharmacy has recorded a decided drop in the barometric pressure since the hour of 5:30 this morning. As this is but a continuation of the lowering pressure for the last three days the indications are favorable for a change in weather conditions, or a brisk wind tonight, or tomorrow.

Forecast for next 24 hours:  
Increasing cloudiness, followed by unsettled weather.

### WILL MEET SON

Mr. and Mrs. James H. Driscoll will leave Sunday morning by auto for Marysville, where they will meet their son, who has been attending Santa Clara University. He is traveling north with friends.

### PASS BUDGET BILL

WASHINGTON, May 27.—The passage of the federal budget bill was completed by the house on adoption of the conference report. It now goes to the President.

### TORNADO DOES DAMAGE

MASON CITY, Ia., May 27.—The buildings on half a dozen farms were blown away and at least one killed in a tornado which late yesterday swept a mile and a quarter wide path between Plymouth and Manly.

### WEATHER REPORT

OREGON, May 27.—Tonight and Saturday fair, heavy frost in the early morning except near the coast. Warmer Saturday.
