INVESTIGATING MOUNT LASSEN'S ERUPTIONS

RED BLUFF, Cal., June 9. — An effort to determine what causes the eruptions of Lassen Peak, 47 miles east of Red Bluff, and the only live volcano in the United States, will be made this summer by Dr. J. S. Diller of the United States Geological Survey.

Dr. Miller, who arrived recently from Washington, D. C., to pursue his investigations, has been connected with the geological survey thirty-eight years. In that time he has spent a portion of every summer, except in 1893 and in 1920, in California investigating Lassen Peak and its eruptions.

According to Dr. Diller's records, there have been 600 eruptions from Lassen, in 1883, Dr. Diller ascended to the peak of the volcano, which attains an altitude of 10,250 feet.

It is the scientist's intention to investigate hot springs at the base of the mountain in an effort to determine the source of heat for the springs. Many of the springs have been hot for years, while others, especially those connected with recent eruptions, are hot only at times.

The most intensive eruption of Lassen was that of May 22, 1915, which resulted in the formation of a remarkable mushroom shaped cloud, rising to an altitude of 25,000 feet above the summit.

FOREIGN ATTACHES MAY HAVE TO PAY POLL TAX

SACRAMENTO, Cal., June 9. — Governor Stephens' office has received numerous letters from foreign consuls in America asking if the recently approved alien poll tax law of California applies to consular officers and attaches. The question has not yet been decided.

The law, which has been described as stringent and providing few loopholes for possible evasion of its provisions, requires every male alien over the age of 21 to register within three days after entering the state. For aliens already resident in the state the time for registration is stated. Registrations must be completed by July 31. A penalty of fifty per cent of the poll tax is provided for delinquency.
