

# FILM WILL SHOW STUDEBAKER CAR IN THE MAKING

What is declared to be the most remarkable industrial film ever taken will be exhibited here June 21 at the Star Theatre. It shows the complete manufacture of the Studebaker Light-Six in the newest and most modern automobile plant in the world. Arrangements to show this famous movie have been made by Dunham Auto Co., the Studebaker distributor.

Although of an industrial nature, this movie abounds in human interest, with plenty of action and in some cases real excitement. It shows the making of Studebaker cars from the raw material down to the finished car.

One of the unusual features of this film is that special lighting and coloring effects were used in many of the scenes, making them realistic to a striking degree. Veritable miracles are performed by automatic and other ultra-modern devices that do nearly everything but talk.

A view of this movie is in some ways more interesting and inspiring than a trip through an automobile plant itself, because many details and operations which escape the eye on such a journey are caught by the camera.

The numerous inspections through which each part passes to insure its accuracy and quality are vividly pictured, and throughout the picture an impressive feature is the speed and efficiency with which results are secured, as well as the high type of men to whom the various tasks are allotted. All operations shown are performed in the Studebaker plant at South Bend, where the New Light Six is manufactured complete.
