### A Series of Human Interest Talks on Insurance

#### How Much Insurance Should a Man Have When He is Married?

This question is getting more and more attention every day. One man said: "When you hear I am married you will know I am carrying at least \$15,000 life insurance." Another said: "I figure that a man should provide an income for his family of at least \$1500 per year. That is 4% on \$25,000. I expect to carry that amount." My work for Oregon Life Insurance Company is not to give you all the insurance I possibly can, but to work with you to decide how you can obtain maximum protection at a cost proportionate to your income.

This may mean a \$1000 \$25,000 policy. Think it over and talk with
