

ORANG FEARED THE CAMERA

Photographer's Presence of Mind Probably Saved Him From Death or Fearful Injury.

As a rule orangutangs, the fiercest of the apes, are caught young and tamed before they are shipped to Europe and the United States.

The man entered the orang's cage as he had entered many others. He had not exposed many plates before he saw that the animal was intent on mischief.

The man's only chance was to use the camera as a weapon. Making a sign to the keeper to keep silent, the photographer pointed his hand camera at the orang and with slow and steady step approached him.

The door was slammed to and he was safe.

COMPLETE WORK OF TODAY

Unfinished Tasks Simply Mean That One Has Placed a Mortgage on His Tomorrow.

Leave today's work undone and you mortgage tomorrow. And tomorrow may bring the big opportunity you have been looking for so long.

Try to keep tomorrow for yourself. Try to keep it free. Don't load it up with work that should be done when you leave your desk tonight.

You never know what it may bring. You never know what chances there may be tomorrow—if you have it clear—to show somebody who can pay a big salary what you can do.

Your days are important, every one of them. Each has its own work that must be done.

Start every day with a clean sheet. Say: "This is the work that is to be done today—that must be done today."

Then do that work, and do not leave any of it hanging over into the next day.

Once fall behind in your work and your tomorrow will soon be mortgaged for a long way ahead. That means wage slavery. It means lack of a chance to seize opportunity—or to make opportunity.

Look forward to your tomorrows as days of achievement—days in which to plan and do new tasks—not to finish old ones.

You will be glad, to see them then. You will be glad of the fresh eight hours that can be employed in something that is valuable and interesting.

Burro Saw the Point.

One who knows says that some people claim that animals can't reason, but if they were around burros while like he was when he ran a burro train up in Colorado they'd change their minds.

One of the burros fell down in crossing a stream and he was loaded with sugar, and it took about fifteen minutes to get him on his feet and his load didn't weigh more than half as much when they started out again.

For months afterward that critter always contrived to fall down when crossing a stream of water.

It didn't lighten his load any, for the driver never trusted him with sugar any more, but he still had hopes until they happened to load him with sponges one day.

That cured him. —Los Angeles Times.

Arab Puta Comfort First.

The beautiful villas that remain in Algeria are Moorish villas, for the Arab does not care for things artistic and comfortable that other races of the earth demand. If he were given a house he would first remove the doors and burn them; he would next drive a hook into the facade to hitch his mule to, and then he would abandon the chimney-place inside the house and build his fire in the middle of the room, defiling all the walls with smoke. His personal ideas of comfort come first.

The Algerians are not like the French. They are different in manners, customs, habits and morals, says Charles Divin in the Century. Even the Arab remarks it, and calls all people who come from France "Parisian Romans."

Novel Idea of Aviation.

A certain Francis Lana, some two centuries ago, worked out to his own satisfaction that a vessel, with its air supply exhausted would sustain itself suspended in the atmosphere. He produced such a vessel but there is no evidence to show that his scheme was ever attempted as an air-machine.

Now women and children can fly through the air, and that so simply that the children make pictures of their flight, and think no more of it than they do of going by train, or by boat.
