

You Can Build Four Rooms Now for What Two Would Cost a Year Ago

IF YOU DO THE WORK YOURSELF AND BUY THE MATERIALS FROM US. BRING US A PLAN OF WHAT YOU WOULD LIKE TO BUILD, AND WE WILL PROVE IT.

When building activity really starts again, present stocks will soon be exhausted, and prices will go up again to considerably above their present low level. We believe that will be this fall, perhaps sooner. It is predicted that lumber will not be as low again in the next ten years, for as soon as a few start to build, everybody will want to start. This condition exists not only in Klamath Falls, but in every city in the United States.

Whether it's a shack or a bungalow or a backyard fence, you can build it cheaper now than in the past four years or in the next ten years.

We have cut the prices on everything from fence posts to window glass. We are trying to make it an object to everybody to
