

Oakland Six Has Two New Features

"Two drops in three months in the 'Oakland Sensible Six' is more than keeping up with the period which all say points to 'normalcy', yet there has been no substitution in the materials nor has there been any deduction in the beauty of serviceable qualities of the car in this price reduction," was the assertion made by Ray Anderson of the R. R. R. garage when discussing the merits of the car he sells, to the auto gossip who inquired what price the Oakland was selling for here.

"If you want to see something that will interest you, step over here and take a look at these new appliances on this late model Oakland," and with that he led the writer over to a Sedan car and lifted the hood. "See that hot air stove on the manifold?" he inquired. "That is the latest improvement on the Oakland and the service that it performs is to heat the gasoline so that better combustion is obtained and less carbon to bother with, not to count increased power! Look at that plate class on the back certifies that that touring car over there," pointing to the rear peeps. "There is another improvement over the 1921 style which I found on the last carload of cars that came in," Anderson continued. "I do not anticipate any further reductions at present in the Oakland prices. As to the situation from the sales standpoint, I feel that by the time the crops are in, farm products and livestock prices will give the farmers a chance to have money to buy a car with. Buyers now are certainly demanding a car that will give them mileage as well as small upkeep."

"You know, of course, that the Oakland Six covered 1709 miles in a 48-hour, non-stop run on May 27 on the Sunnyvale—Los Altos highway south of San Francisco? No stops were made nor tires changed, yet a record of 20.1 miles per gallon was made," Anderson closed his discussion to wait upon a prospect who came in just then.

PUMP PRECAUTION

Motorists who use one of the hand pumps will do well to give the pump a few strokes before attaching it to the valve. This blows out any grit or other foreign matter that may be clinging to the pump valve, preventing their finding their way into the inner tube.

WIRELESS TO TRAP AUTO THIEF

Arrangements are now being completed by the State Bureau of Criminal Identification and Investigation, working in conjunction with peace officers in California and adjoining states to use the wireless telegraph in the apprehension of the automobile thief.

Every highway leading to and from the state is now open to traffic. Upon nearly everyone of these highways and situated near the State line is located an amateur or government wireless station.

It is proposed that reports and descriptions of all stolen automobiles received at the bureau during the day be dispatched at a specified hour to these outlying stations, from a central wireless station, located at Sacramento.

Willard Service Man Benefitted By Trip

A. W. Stevens of the Link River Battery station proprietor of the local Willard Storage Battery Service station, was attending the convention of all Willard operators of this vicinity in Portland, returning home Wednesday, much benefitted by the visit.

Sales Manager, H. S. Gardner, Advertising Manager S. E. Baldwin and Assistant to the General Manager, S. W. Rolph of the main offices of the Willard company of Cleveland were there, holding one of a series of meetings which are planned for 26 of the larger cities of the United States and Canada. Two months will be required for the completion of the entire trip, after which every Willard man will have had the opportunity to discuss the plans and policies of this company with these officials in person and to hear the newest and most approved ideas on battery manufacture and service.

FLOODING OF CARBURER.

Flooding of the carburetor is caused by several possible troubles. A needle valve may be held open or be leaking. Dirt may have collected on the seat of the valve, preventing its closing, or the following may be the causes: Imperfect or worn needle valve or seat; mechanism stuck; a too heavy or leaking float, which would sink too deep, holding the needle valve open; level too high; loose spray nozzle.

Dodge Mileage Is Raised 100 Per Cent

"Dodge cars are today priced the same as they were in the pre-war period, as the manufacturers made one big slice in the price at a time when it was practically unnoticed by the buying public. People were busy with their troubles in finding reasonable living quarters and keeping the larder supplied," stated H. E. Wakefield, agent for the Dodge in Klamath County, yesterday, when asked how the Dodge measured up with the decline in all standard makes of cars.

"This fact is more evident to the dealers than anyone else for they keep a close tab on the movements of cars, and especially prices, than the average person. But one feature where the Dodge car now makes a hit with the buyers is that the tires on the new cars have been changed from size 32 x 3 1/2 fabrics to 32 x 4 cord tires."

"Do you know that with this departure a Dodge car will now have a tire mileage approximately over a 100 per cent greater than at first. If you will remember, the mileage on the Dodge ran anywhere from 5,000 to 7,000 at the most. With this new tire base, a car will go from 10,000 to 13,000 miles. That is one big saving that has been effected with this move. In the back curtains now, glass has been installed and this gives the car an added trim which it did not have before. In fact this coming year, the purchaser of a Dodge car will certainly get a "run for his money," plus satisfaction," was the final remark that Mr. Wakefield used in describing the car that sells.

IS HANDY FOR TOURISTS

A device made in sections that can be combined to form a chair, a bed or a table has been invented by a Californian for use by automobile tourists.

NEW STREET CLEANING TRUCK

The power is applied to the third wheel, which is in the rear of a new street cleaning truck, the engine also revolving a cylindrical broom, while a snow plow can be mounted in front if desired.

RADIATOR NEAR REAR AXLE

The motor and radiator of a new French automobile are mounted close to the rear axle, the inventor claiming this arrangement permits the use of smaller and lighter bodies.

Take John McCormack With You

When you are out in the woods, on the banks of a stream or lake or camping alongside the highway, what a joy it would be to have the music you love! Well,

Here Is Your Chance

... the Famous ...

CIROLA PHONOGRAPH

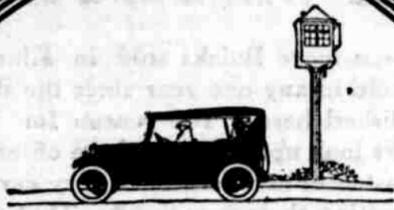

It folds up like a suitcase will play all records and will bring the greatest amount of pleasure to your campfire at night when you gather around for an evening of singing. It has just exactly as much volume as the large instrument and the tone is not surpassed by any phonograph on the market. It can be had for the small sum of \$50, and no camping trip is complete without one.

We carry a complete line of camping necessities—such as auto goggles and sun glasses, field glasses and binoculars, drinking cups and auto clocks. (And we repair your auto clock, if it has gotten out of order.) For the lunch box we have thermos bottles of all kinds and the great STANLEY THERMOS, the one that is guaranteed unbreakable.

Have You Tried This Automobile Oil?

There are two ways to tell how good any lubricating oil is. One way is to make a test in the laboratory. The other way is to put it in your car and try it out under actual service conditions.

We know that Veedol will increase your mileage and save anywhere from \$50 to \$115 a year in operating expense.

Prove that out for yourself. Here's how you can do it. Clean out your automobile crankcase. Fill with kerosene. Run your motor about thirty seconds under its own power. Drain out all kerosene and refill with Veedol.

Then make a test run over a familiar road including steep hills and straight level stretches. You will find your motor has acquired new pick-up and hill-climbing ability. It will have less vibration and will give greater gasoline mileage.

Veedol will cost you more than the average oil. With a few gallons of Veedol you can drive 2000 to 5000 miles. That will give you ample opportunity to compare operating costs. It will prove the superiority of Veedol as emphatically as have laboratory tests.

Maybe you don't believe me
Maybe you think I lie,
But you come 'round to my shop
And you'll think the same as I.

In fact you will know what real, quick, efficient service is. "Charley's Quality Service" is what I call it and I am sure you will, too, if you try it once.

I carry Fisk and Lee Tires—you know there are none better—together with a full line of tubes and auto accessories.
