A temporary office is going up and sales handled as usual. None of the lumber stock was burned, except what was inside the building. REAL TURK NOT MONEY MAD

Recognizes There Are Higher Things in Life Than Practicing Buying and Selling.

The real Turk, unlike the so-called mongrel Turk, does not have to impress his sense of superiority on others. And, although the latter is always eager to do business with you, according to Mr. Herbert Gibbons in Asia, the real Turk is often quite indifferent.

Some real Anatolian Turks are merchants and sit in the bazars. But they will not go out of their way to make a sale, and they really do not care whether you buy or not. Often they ignore strangers; sometimes they rebuff them. When you meet with this type in the bazars where all the Jews and Gentiles are hard after your money, it is like a dash of cold water in your face.

Once in a little open shop I saw a rug that attracted me. I started to enter, but the crouched figure on the mat put out a long-fingered left hand, grasped firmly my ankle, and removed my foot outside the threshold. I thought there must be some superstition about which foot went first; so I tried the other. The same left hand proved again its strength. All the while the merchant did not speak or look up. His right hand was stringing beads, and he was smoking a nargile.

He simply did not want to bother with me, and my shoe told him that I was a franga (European). Later I got to know that old bird, and we laughed over stories together. But he never asked me to buy anything, and I did not want to risk his friendship by making a second try for the rug. There are more important things in life than buying and selling.

"SQUEEZE" POPULAR IN CHINA

What the Western World Calls "Graft" Is Practiced by All Classes in That Country.

One trait firmly imbedded in the Chinese character which the foreign business man and the housewife both have to contend with is the weakness for "squeeze." It is said by foreigners that the Chinese merchant, coolie, politician, fisherman, chauffeur and beggar would rather make \$1 by "squeeze" than \$10 by the same amount of brain work or manual labor.

Squeeze is Chinese for graft. It is a word in that international Far Eastern tongue known as pidgin-English. But squeeze is something more than graft. Its political phase might be termed graft, and that form of squeeze is what makes the military governors of the provinces and the politicians of Peking and Canton so fat. Most Chinese politicians would have been acceptable in the eyes of Julius Caesar, and squeeze is the reason for some of the corpulence in China.

Squeeze is the Chinese translation of "as much as the traffic will bear." It is a factor in Chinese business, as much as supply and demand, or profit and loss.

Getting Action.

A doctor received a note asking him to go at once to a case of smallpox, but to his surprise, on arriving at the patient's bedside he found that it was merely a case of rheumatism.

"But this is very plainly not smallpox," he said.

"Well, doctor," replied the man, as he shuffled one foot over the other, "to tell you the truth, we knew it was rheumatism, but nobody in the house could spell the word, and we thought smallpox would do just as well until you came, and probably bring you quicker."

The original recipe for the famous perfume, eau-de-cologne, was discovered by an Italian living in Cologne.

School Children's Sight

You are responsible for the sight of your child and should take steps to see that he is not handicapped in school work by defective vision.

Backwardness in study, especially, should be taken as an indication of possible eye trouble—while even the clever scholar who frowns while working, or who suffers from frequent headaches, may be suffering from eye strain.

The eyes of every child should be examined to make quite sure whether glasses are needed or not.
