A "Dry Rhyme"

Whatever else may happen Now that the country's dry (7) The sailor still will have his port. The farmer have his rye. The cotton still has got its gin. The seacoast has its bar. And each of us will have a bier. No matter where we are.

Earthquakes Will Be Predicted By New Govt. Bureau

PASADENA, Cal., Sept. 7—An information service on earthquakes, similar to the weather bureau's work in its field, is being considered by scientists, engineers and business men in California.

The undertaking aims at perfecting an instrument sensitive enough to record the slightest tremors of the earth and so make possible the prediction of approaching movements of its surface.

The men in charge of the project are students of vibrations, who assisted in the development of submarine detectors and other similar instruments used during the war. They have the cooperation of local educational institutions, the United States Geodetic Survey, and the United States Geological Survey. Responsibility has been assumed by the Carnegie Institution of Washington.

Direction of the work is in the hands of an advisory committee consisting of Dr. Arthur L. Day, director of the Carnegie Geophysical Laboratory, Washington, D. C., chairman; Dr. John A. Anderson of the Mt. Wilson Solar Observatory; Dr. Robert A. Millikan, physicist, of the California Institute of Technology; Dr. Harry Fielding Reid, professor of geology at Johns Hopkins University; Dr. Bailey Willis, professor of geology at Leland Stanford, Jr. University; Dr. Ralph Arnold, geologist and petroleum engineer, of Los Angeles, and Dr. Andrew C. Lawson, professor of geology at the University of California.
