

The Office Cat

BY JUNIUS

Finger Prints

Lives of bank clerks off remind us if we flee like common crooks...

One reason, perhaps that Friend Farmer is having a harder time each year to make the old eighty pay is changing styles in farm hands...

Exempt Firemen

"Fire from the tub caught on the outside of the building, but was put out before any considerable damage could be done by the Volunteer fire department."

Incubus

"Marrying a little wouldn't be so bad." "Hah?" "It's the specimen who goes with it that jars a girl."

Household Hints

A little glue added to jelly will make it stiffer. Hard-boiled eggs will not scorch or burn if stirred now and then.

Observations of Oldest Inhabitant I kin remember when the "infant industries" that interested most folks was raising babies.

Short Story of Gay White Way The gate's ajar The gate ajar.

T. H. M.

A Plutocrat—a man wealthy enough to pay both his fine and his lawyer—Nashville Tennessean.

Clara Smith Hamon, in marrying a film director, should easily succeed now in becoming a reel heroine.

A chap out in San Francisco claims that one drink of hooch enables him to figure in trigonometry. That's nothing. One drink here enables folks to do tricks in trigonometry.

Also when the divorce suit is filed it is strong circumstantial evidence that the honeymoon has ended.

Two swallows don't make one summer, but three or four swallows make a man think twice before he speaks too hastily, says Luke Walker.

Suggestion

"Suggestion is the latest thing in training children." "I've tried it. But the children don't behave as well when I merely suggest that they may get a licking."

Heart balm of \$50,000 is little enough for any woman. A broken heart ought to be worth that amount any day—if the man in the case has it.

The Power of the Press (From the Hammond Ind. Times) Want ads get results.

Mrs. Charles Kasson, 30 Webb St., lost her dog. She placed an advertisement in the Times yesterday. Half an hour after the paper was out the dog came home.

Try a Times Want Ad.

Lloyd DeLap when asked yesterday what he thought about a man who deceives his wife constantly, replied, "I'll say he's a WONDER!"

Prosperity brings many friends, but hard luck separates the wheat from the chaff.

Ask Dave!

Will Hays, postmaster general, after a personal investigation, as shown above, is convinced that "Ask Dave, he knows everything."

OREGON BREVITIES

PORTLAND—More refrigerator cars bearing fruit products of the Pacific coast moved eastward over the Union Pacific railroad last month than during any September in history...

McClmonds said that a total of approximately 19,000 cars moved eastward, or 630 cars a day.

PORTLAND—Sergeant Geegan and the morals squad made 308 arrests during the month of September and brought a total of \$2061 revenue to the city in fines. Prisoners convicted in the municipal court on the testimony of the morals squad received 442 days in jail.

SALEM—A. T. Marshall, chairman of the Oregon state industrial accident commission, has returned to Salem after a week passed in the lower Columbia river district. He visited a number of sawmills and logging camps and delivered a series of addresses on the benefits that were being derived from the accident prevention movement.

UNIVERSITY OF OREGON—The nine girls who were held out of the Gamma Phi Beta sorority because of the penalty imposed upon that organization for violation of rushing rules have been allowed to live in the Gamma Phi house as "boarding guests."

The reason that the ban was removed was that the girls were unable to find suitable living quarters.

BEND—Despite actions taken at a mass meeting of citizens here when the dismissal of S. W. Moore, city school superintendent, was demanded the school situation continues to improve.

PORTLAND—Beware of the itinerant peddler who would entice small sums from the householder for some trifling gewgaw advertising the 1926 exposition. This warning is voiced by Julius L. Meier, chairman of the exposition committee.

UNIVERSITY OF OREGON—Four hundred and seventy-five students in the university are training for army service in case of war, and some of this number will no doubt get commissions in the reserve corps.

The work of the university reserve officers' training corps this year promises to be the best since it was organized. Major Raymond C. Baird, commandant, has been in the service for 14 years in the Philippines, in Japan and in the late war.

Model City Will Be Built by U. S. Reclamation Service

AMERICAN FALLS, Idaho., Oct. 7.—The new American Falls is to be a city "built to order." According to plans announced recently by the United States reclamation service, the rebuilding of the city on another site, necessitated by the fact that the present location will be submerged through the construction of a large irrigation storage reservoir, will be in accordance with the latest principles of city planning.

Typographical, climatic and industrial considerations will be taken into account in the building of the new city, it is indicated. The streets of the city will run northeast and southwest, to permit the sun to shine upon all sides of the buildings. The industrial section will lie in relation to the residence districts in such a direction that the prevailing winds will carry the smoke, dirt and odor away and not toward them.

The only portion of the present town will remain a part of the new city in the Knob Hill section. The present high school building is expected to be left in the location it now occupies.

No receptacle has ever been made with sufficient strength to resist the bursting power of frozen water.

Hot Water Each Morning Puts Roses in Your Cheeks

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a certain amount of incandescent material in the form of ashes, so the food and drink taken each day leave in the alimentary organs a certain amount of indigestible material, which if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment to sustain the body.
