

## NORTHCLIFFE IS GOLF FAN

HONOLULU, T. H., Sept. 15.—(By mail.)—Lord Northcliffe, the British newspaper owner, is a strong devotee of golf, as was evidenced by the fact that when he stopped over in Honolulu on his way to Australia recently while the vessel on which he was traveling was in port for one day, the publicist dodged all public receptions, luncheons and other gatherings that had been planned in his honor, in order that he might indulge in a round of his favorite sport.

Lack of time prevented Lord Northcliffe and his foursome from playing more than five holes and no score was kept, but it is very likely that the publisher will remember those five short holes longer than some other more extended and more spirited matches.

From the second tee, Lord Northcliffe sliced his drive and the ball described a beautiful curve, landing off the course in rough. His lordship carefully addressed his ball for the second shot, with deep silence prevailing in the gallery. Just as he drew his club above his shoulder for the shot, there came an interruption from a motion picture camera man who was following the match.

"Hold it. Hold it. That's a peach," the cameraman shouted. Lord Northcliffe dropped his club turned around and started at the photographer with amazement. "With remarkable selfcontrol," as the other members of the foursome expressed it, he talked to the photographer.

"I say, young man, have you ever played golf?" he asked.

"No, not much," replied Lord Northcliffe, and returned to his second shot, which also went off the fairway.

As the British publisher was about to drive the next tee, the motion picture man stood directly in front of him calmly cranking his machine. Lord Northcliffe gazed at him, a moment and then spoke benevolently:

"Young man, I feel it my Christian duty to inform you that when I drive a golf ball the safest place for a spectator is behind me."

The photographer remained in the background throughout the rest of the match.

### Opening Alaskan Wilds with Roads

ANCHORAGE, Alaska, Oct. 21.—Territory on both sides of the United States government railroad built between Seward and Fairbanks, Alaska, is being penetrated by wagon roads and trails which will serve as feeder lines for the railroad, according to Col. James G. Steese, chairman of the Alaska Road Commission.

During the past year \$206,654.82 has been spent on road work in a strip of 100 miles wide along the railroad. Several quartz districts have been opened, as a result of the road construction and, eventually, the mines will provide tonnage for the railroad, it is thought. Colonel Steese has recommended that the government adopt a ten-year road-building program which will tap every producing district in the railroad area and through connections reach sections in other parts of Alaska distant from the road.

OYSTER BAY, N. Y., Oct. 21.—A reproduction of Elkhorn, the North Dakota ranch house in which Theodore Roosevelt for three years lived the life of a cowboy, is being planned by Boy Scouts of America as their contribution to Roosevelt Memorial Park.

If the project develops scout troops from all over the country will supply the wood and the house will be built under the direction of "Bill" Sewall, Roosevelt's friend, guide and fellow ranchman.

It is proposed to have the original cornerstones of the ranch house carried by relays of scouts from Little Missouri River to Oyster Bay.
