

Yosemite Cafeteria Declared Success

YOSEMITE, Cal., Oct. 28. — A cafeteria in the Yosemite National Park, miles from the big cities where tray carriers generally are found, this year apparently solved a problem of furnishing food at medium prices for tourists far from a railroad. During the last five months, approximately 280,000 meals were served at an average cost of about 48 cents each.

The cafeteria was the first ever established in any national park and it has been so successful that other parks have written for details of its operations. It is probable that the idea will be copied.

Secretary Fall of the Department of the Interior, while here this summer, became a tray carrier at the cafeteria and declared he thought the establishment was a step in the right direction to provide good accommodations at the lowest possible prices.

Food served in the cafeteria is the same quality as that served in Yosemite's American plan resorts charging as high as \$7.50 and \$10 per day. The prices differ little from those in cafeterias in San Francisco and Los Angeles. The food is sold at cost, as employees of the National Park company make up about half the cafeteria's patrons.

Scores of campers came to Yosemite this year, pitched their tents along the Merced river and took their meals at the cafeteria.

Three Organizations Will Compete for the Hockey Trophy

VANCOUVER, B. C., Oct. 28. — A three-cornered battle for the Stanley Cup, emblematic of the professional hockey championship of the world, has been virtually assured, according to advices received here.

Heretofore only the National Hockey League, of Eastern Canadian teams, and the Pacific Coast Hockey League have fought for the cup. At a recent meeting of representatives of the two leagues, Frank Patrick, president of the Pacific Coast organizations was authorized to negotiate with the Alberta Hockey League, for inclusion in the series.

The first game of the series, it was decided, will be played March 15, 1922.

CALIFORNIA NEWS

OROVILLE—The three Indian tribes residing on Feather river watershed in this district, gathered at the annual Indian burning at Bald Rock Peak. The Modoc, Bald Rock and Cherokee Indians were those represented.

SACRAMENTO—The two Sacramento breweries, the Ruhstaller and Buffalo, will resume the making of real beer, for prescription use, under the new regulations of the Treasury Department when formal notice has been received from Federal officials. This was the statement today of Frank Ruhstaller, head of both institutions.

CHICO—Telephone service in Chico is being protested to the State Railroad Commission by Dr. E. L. Meyers. He blames the service of the Pacific Telephone and Telegraph Company here for the death of the 2-year-old infant of Mr. and Mrs. Oscar Dinnell, who was killed last week by swallowing nineteen strychnine tablets. Dr. Meyers claims that the telephone operator cut him off while Mrs. Dinnell was telling him about the child and asking for his aid.

Hot Water Each Morning Puts Roses in Your Cheeks

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a certain amount of incombustible material in the form of ashes, so the food and drink taken each day leave in the alimentary organs a certain amount of indigestible material, which if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment to sustain the body. If you want to see the glow of healthy bloom in your cheeks, to see your skin get clearer and clearer, you are told to drink every morning upon arising, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waste material and toxins from the stomach, liver, kidneys and bowels, thus cleansing, sweetening and purifying the entire alimentary tract, before putting more food into the stomach. Girls and women with sallow skins, liver spots, pimples or pallid complexion, also those who wake up with a coated tongue, bad taste, nasty breath, leaves behind a certain amount of incombustible material in the form of ashes, so the food and drink taken each day leave in the alimentary organs a certain amount of indigestible material, which if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment to sustain the body. A quarter pound of limestone phosphate costs very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshens the skin on the outside, so hot water and limestone phosphate act on the inside organs. We must always consider that internal sanitation is vastly more important than outside cleanliness, because the skin pores do not absorb impurities into the blood, while the bowels pores do. Women who desire to enhance the beauty of their complexion should just try this for a week and notice results.

From Fifth Avenue

New York's fast-growing prestige as a fashion center is justified in the advance glimpse of fall fashions by Hickson, Fifth Avenue. The street costume is of brick wool velour trimmed in bands of skunk. A novel skirt is curved upward in front and at the back center. The skirt and the large bell sleeves—also curved—are outlined by two rows of skunk. The "chocker" collar is also of this fur which is used to catch the snash effect at the sides. The large black velvet hat, slightly turned back in front, is outlined with jet at the edge. A large black jet ornament falls to the right shoulder from beneath the brim.

Geologists agree that England was once a part of continental Europe.
