

# The Lumber Industry

NEWS OF INTEREST TO KLAMATH LUMBERMEN

## FIRM STARTS LOGGING

Packett Brothers Open Camps Near Chiloquin; Men Shipped

Packett Brothers, widely known loggers, today shipped men north to their camps near Chiloquin and will start logging at once.

An early revival of logging is seen in the activities of logging concerns, several of which are reported to be preparing for spring operations. The Sprague River Lumber company, operating on the Sprague river above Chiloquin, has been operating for some weeks and is reported to have had the most successful season in the company's history. The success is due in great part to ideal logging conditions. An early frost followed by a light snow brought good sleighing and made it possible to bring in big loads. One load brought in contained 8,000 feet, it was reported. Lumbermen formerly of Minnesota, Wisconsin, Michigan and the other middle-west states are promised the nearest reproduction of "Eastern" logging ever seen here in the operations of the Sprague river company.

## LUMBER INDUSTRY AT WILLAPA HARBOR ACTIVE

RAYMOND, Wash., Jan. 24.—Activity of the lumber industry of Willapa harbor shows a healthful trend and the total number of employees engaged at the lumber, shingle and veneer plants at present is 1991. With the resumption of the Ek Shingle company of South Bend, which is closed at present on account of the shortage of logs, and the increased number of help of mills in Raymond, which is contemplated for the future, the mill employment will total 1990.

## COMPANY TO TURN OUT LATH, BROOM HANDLES

EUGENE, Jan. 24.—Preparations to manufacture lath and broom handles from slabs which are usually used for fuel is being made by the Walters-Parks Lumber company here. Lath and broom handle machines are being installed. The company has just erected a plant to mill rough lumber into the finished product in transit. The plant will buy cants from the smaller mills and plans to utilize all the waste of the mill for fuel and by-products.

## WOOD WORKING PLANT BEING BUILT AT KELSEO

KELSEO, Wash., Jan. 24.—The Kelso Manufacturing company has been organized by C. C. Bashor and A. L. Bashor of this city. The company is installing a lath and wood-working plant at the site of the former McLane mill and will be ready to commence manufacturing at an early date. The equipment from the old Stoneman plant in West Kelso is being used for the mill. Lath and handle stock and similar wood products will be manufactured.

## Predicts Prosperous Year For Industry

ABERDEEN, Wash., Jan. 24.—That the Pacific Coast lumber business may experience an exceptionally good year, from present indications, is the opinion of Fred Hart, president of the Quinault Lumber company of Raymond, who was here from his

home in Portland a few days this week.

"The Japanese orders promise to keep many of our mills busy, though an increase in freights and a possible increase in lumber prices may check trade somewhat," said Mr. Hart. "But the outlook is splendid generally and there is a great deal of postponed building to be done."

"I firmly believe that the Pacific Coast will have a banner year, not only in lumber, but in everything that goes toward making this section of the country prosperous."

## Forest Service to Compile Statistics

PORTLAND, Jan. 24.—The bureau of census and the forest service have entered into a co-operative agreement under which the forest service will undertake the collection of the statistics of lumber and timber products for Oregon and Washington for the calendar year 1921, as a part of the census of manufacturers.

According to W. H. Gibbons in charge of the office of forest products here, this agreement contemplates the utilization of the forest service organization in Oregon and Washington and other western states. A sufficient number of forest service men will be sworn in as agents of the bureau of census and will conduct the canvass from the district office of the forest service here in these two states, acting under the authority of the census law. By this means it is intended to save lumbermen unnecessary annoyance, to avoid duplicate inquiries to sawmill operators, and other manufacturers of forest products, to expedite the collection of census data, and to economize upon the cost of the canvass.

Early publication of forest statistics in western states is planned if manufacturers co-operate by making their returns promptly. The office of forest products here has been collecting somewhat similar data for several years for these two states, which have proved of great value to the lumber industry itself, according to W. H. Gibbons.

## PERSONAL MENTION

Mrs. E. S. Henry left this morning for St. Louis for a visit with friends.

Mrs. E. T. Givan was a passenger on this morning's train for Salem, where she will visit her mother for several weeks.

# ANNOUNCING

the opening of

## A NEW QUIBB SECTION

THE other day we heard of a druggist who paid so little attention to the sale of drugs and so much attention to the sale of other things that his store ceased to look like a drug store and he had to put up a big sign reading "This is a Drug Store."

You often hear people say today that many druggists are neglecting the pharmaceutical end of their business. This tendency makes it hard sometimes to get pure and reliable drugs, unless you choose your druggist carefully.

We specialize first and last in compounding prescriptions and in pure drugs, chemicals and toilet preparations of the highest quality. Our customers know this well. In line with our policy of giving them the very best pharmaceutical products we announce the opening of a special Quibb Section in our store.

You will find here in original packages the many household products and toilet preparations for which the House of Quibb is famous the world over.

Quibb's Sodium Bicarbonate—free from the bitter taste of the commercial product and purified for medicinal use.

Quibb's Castor Oil—refined by a special process for medicinal use and almost free from the disagreeable taste of ordinary castor oils.

Quibb's Milk Sugar—for infant feeding. Free from all impurities that disturb the delicate stomach. A fine powder sold only in sealed tin containers to insure purity.

Quibb's Sterate of Zinc—the best known dusting powder to protect the delicate skin from irritation due to body excretions.

Quibb's Epsom Salts—purified for medicinal use. Clean and almost free from the bitterness usually found in the ordinary salts.

Quibb's Talcum Powder—the purest of Italian talcs, specially purified to free it from the soluble matter likely to irritate the tender skin. Carnation, Violet, Boudoir and Unscented.

Quibb's Magnesia Dental Cream—a dental cream made from Quibb's Milk of Magnesia. Cleans and preserves the teeth and gums and tends to maintain the normal alkaline condition in the mouth. Contains no soap, acids, or other deleterious substances.

We promise you a prompt and efficient service on all your drug needs, whether you call in person or send your order by telephone. May we serve you?
