NEWS OF INTEREST TO KLAMATH LUMBERMEN

## CONFERENCE RATE ON LUMBER ENDS; TRADE RACE IS ON

PORTLAND, Feb. 10.—The conference rate on lumber from the Pacific Northwest to Atlanta has smashed and the race is on for Eastern business on the competitive basis. The conference rate which stood until this morning, was \$18 on parcels and \$17 on full cargoes. Coupled with the announcement of the crash in the conference rate comes the statement that Charles R. McCormick had closed contracts for New York delivery of large shipments that will run better than 30,000,000 feet a month for several months.

Heavy demand for lumber at California ports has added to the steam schooner fleet now engaged in the coastwise business. Sudden & Christensen, who recently placed the steamer Edna in the freight business between Portland and San Francisco, announce the addition of the Santa Alicia, Santa Barbara, Carmel and Yellowstone. This fleet will load in the river and make San Francisco

only until the lumber shortage has been made up.

Steamers of the McCormick fleet have been going principally to San Pedro and loading largely on Gray's Harbor. The Multnomah is loading this trip at St. Helens and will sail tomorrow afternoon.

The lumber demand on the West coast is better and the steamship Derby of the General Steamship corporation, due in Portland tomorrow, will leave here with a heavy shipment for the West coast. Oriental shipments are holding big but the advance in the price of lumber and the unsettled conditions in Japan have cut down on future orders.

For Australia by J. J. Moore & Co., and Balfour, Guthrie & Co., the steamship West Henshaw of the General Steamship corporation, cleared this morning with part cargo. She had on board at Portland 1,354,312 feet of lumber valued at \$23,158.86, 100,000 bundles of lath valued at \$307.50. She also carried 50 boxes of phosphate rock valued at \$200.

## FIGURES IN THE MOVIE MURDER MYSTERY

Edna Purviance (left), leading woman in Chaplin comedies, telephoned the news of William D. Taylor's death to Mary Miles Minter when his valet ran to her home to notify her of the movie director's murder. Miss Minter (center) hurried to the Taylor home with her mother. Mabel Normand visited Taylor on business the evening of his death. Taylor was a captain in the Canadian air force during the world war.

Mrs. Nettie Ellis of this city left for Pine Ridge this morning where she expects to remain for several days.

### MAIL SERVICE IN RUSSIA IMPROVING RAPIDLY

MOSCOW, Feb. 9.—The mail service of Russia is improving, and new letters and money-orders sent to points within Russia are reasonably certain of delivery. Also letters from abroad are delivered.

Letters sent from the United States reach the person to whom they are addressed after a month, or six weeks. The delay is due to the censorship. There's nothing secret about the work of the censors. It is perfectly apparent that they have opened letters because they wish to know the contents. The letters are steamed and during the process the United States stamp and the mutilage of the flap comes off.

After the censor has examined the contents the letter goes out for delivery. The delivery service is so good that a letter will follow the addressee about for weeks, from address to address, until he is found.

### Society Finds Home for Stray Dogs and Coyotes

CHICAGO, Feb. 10.—Many of Chicago's stray dogs of the streets, unhappy and sometimes dangerous in a friendless environment, were placed on farms through Illinois last year by the Anti-Cruelty Society. John J. Abbott, its president, told the society's annual meeting here recently. The demand for dogs, he said, was greater than the society could fill.

Three coyotes also found home through the society last year, he added. Dogs passing through its refuge in 1921 numbered 2,752 and cats 2,548.

A notable feature of 1921 was the humane day held in the public schools. Mr. Abbott continued: "With the co-operation of Superintendent of Schools Mortenson we arranged for a humane day when special exercises urging kindness to animals were held in every room of every school in Chicago," he said.

Mr. Abbott is one of Chicago's leading bankers. He is the man who negotiated a \$5,000,000 loan to China.

## SPORTS

### TWO BASKETBALL GAMES IN K. A. A. GYMNASIUM TONIGHT

Tonight at eight o'clock, Klamath Falls basketball enthusiasts congregating in the K. A. A. gymnasium will again have the opportunity to enjoy an evening of their favorite sport, when the local high school quintet line up against the Merrill high school five, and when teams from the Agency and Bonanza contend for the county championship and the possession of a silver loving cup.

Although the game between the Klamath Falls boys and Merrill is not such an important contest, and is staged as a preliminary to the main event, it promises to be as fast and as interesting a game as the other.

The big event of the evening, however, will be the Agency-Bonanza game. The teams are playing off a tie on a neutral floor tonight, and each backed by a large contingent of rooters is here to win and to carry away that cup.

The trophy is one well worth playing for. It is a silver loving cup some 18 inches in height which was originally intended as a prize to the winning team in the city baseball league last summer. When the baseball league failed to complete its schedule, the donors gave the cup to the county high schools as a prize to the basketball team winning most games in the county association.

The cup will be on display tonight at the gymnasium and immediately after the final whistle has blown, will be presented to the victorious team by A. F. Glover.

The lineup for tonight's games is: Merrill K. C. H. S. K. Riger F. C. Grove E. Kiger F. C. Shriver F. Pope C. R. Hoegs B. Balla G. C. Hogue W. Hill G. P. Montgomery

Bonanza Agency R. Grisez F. Baker R. Chaney F. C. Welsh C. Ball L. Horton G. Hicks A. Copperfield G.

# Neal Hart IN "Hell's Oasis"

Out in the west somewhere once stood a bad town—a town where the people's God was drinking and gambling. Then one fine day Fate brought to this village a good little girl, with her only weapons, a smile and a Bible. She came to reform this hell-spot. What chance had this girl alongside of these "brute men of the West and guns?" Did she win out? What is the climax to this blood-curdling tale of the West?

### WIRELESS AIDS MEXICAN GOVERNMENT IN KEEPING ORDER

MEXICO CITY, Feb. 10.—Wireless telegraphy has contributed to keeping down revolution in Mexico, and the government, recognizing its value, is establishing stations in every large city in the republic.

Officials assert that by using the wireless they are able to communicate immediately and directly with the military headquarters, and thus are able to head off many incipient uprisings which might grow into serious revolutions if not promptly checked.

In the old days the first thing a band of rebels did was to cut all telegraph and telephone wires, thus isolating the region of revolt.

In its station at Chapultepec Park here the Mexican government has one of the largest and best equipped plants on the continent. Dur-

ing the Carranza administration the station was practically idle, but during the past few months it has been used daily by the government in sending official news letters to Central and South American countries and in keeping its ministers and consuls informed of affairs at home.

It has been announced that the government expects to open the station shortly for commercial work.

It has also been found that the station here can be used as a supplement for the land wires throughout the republic and congestion on the latter is often relieved by the Chapultepec plant.

Ignacio Galindo, who for many years has been identified with wireless activity in Mexico, will represent the republic at the radio-telegraph convention to be held in Rome next month.
