A bogus, humorously worded sale bill put out by an Iowa paper and posted in the office of the stockyards company at St. Joseph, Mo., has attracted a great deal of attention and evoked many hearty laughs from those who read it. It reads: Losing Out Public Sale

FINANCIAL REPORT OF PHONE COMPANY SHOWS BIG EARNINGS

The consolidated Bell system income statement, which represents the business of the American Telephone and Telegraph company and its associated companies, shows total operating revenues of \$197,088,233, an increase of \$47,646,118 over the previous year. The total operating expenses were \$163,687,282, an increase of \$16,867,666. Taxes amounted to \$24,512,479, an increase of \$6,671,145. There was paid \$26,773,998 in interest and \$17,848,394 in dividends, leaving a balance for surplus of \$19,576,289.

The report shows that the American Telephone and Telegraph Company after meeting all operating charges and making adequate provision for depreciation and obsolescence, and for federal and other taxes had available for interest and dividends \$73,526,900.81. The interest charges were \$19,524,197.09, an increase of \$658,508.65 over similar charges for 1920, and dividends paid to stockholders at the rate of \$8.00 per share per year for the first quarter and \$9.00 per share per year for the last three-quarters of 1921, amounted to \$42,674,402.00. Of the resulting balance, there was appropriated for contingencies \$3,000,000, and the remainder (\$8,328,300.72) was carried to the surplus account.

In the American Telephone and Telegraph company the number of shareholders of record on December 31, 1921, was 186,342, an increase of 46,894 during the year. The average number of shares held was 29 and there were more women shareholders than men. Of the total number of shareholders, approximately 25,700 are employees of the Bell System.

Of all American corporations this company is first in the number of holders of its stock and has the widest distribution of ownership.

The funds supplied by these investors have been used for the building and extension of telephone plants in every section of the United States.

The expansion of the telephone business in the United States has been enormously greater than the growth of population or general business. In twenty years the population has increased 45 per cent, while the number of telephones has increased about 900 per cent.

At the end of the year there were over 13,380,000 owned and connected stations in the Bell system, two-thirds of all the telephones in the world. Any one of these telephones may be connected with any other telephone in the Bell system. During 1921, alone, the net gain in owned and connected telephones was 778,284 and viewed from the standpoint of the value of the service to user, this means that from each telephone connected with the Bell system, it was possible at the end of 1921 to reach over three-quarters of a million more homes and places of business than at the beginning of the year.

Mount Ranier Bears Refuse to Hibernates

TACOMA, Wash., March 2—Seven bears on Mount Ranier, a snow-capped peak near here, refused to follow their instincts and hibernate this winter. Instead they made an inn, high on the mountain, their headquarters, depending upon the forest tangers, guides and caretakers for their food.

Avalanche Lily, one of the bears, started the colony, following her experience of a year ago when she awoke prematurely from her winter sleep and was fed by a caretaker at the inn. In the spring six other bears were advised of her "find", and this winter they refused to go to sleep.

The bears have become quite tame in fact so tame that they do not hesitate to break into buildings in search of food. This winter the show is up on the fourth floor of the inn, where the bears broke so many windows that barricades had to be built against them.

The bears are tolerated because in the summer they prove a great attraction to the thousands of tourists who visit the Rainier National Park, of which the mountain is the feature.

Our starting whistle will blow tomorrow morning at 7:30. Applications for employment will be received at office or by foreman on the job.
