Putting new shirt on Jonah, new ropes on the vessel and enlarging the whales mouth 2.65
Putting new leaves on Adam and Eve 32

Blessings of Nature

It was a good thing Monday night was not a night in the middle of summer, for if it had been a night in the middle of the summer, we would have had to sleep on the sleeping porch, and we surely'd have hated to sleep on the sleeping porch Monday night.

The Proper Use

W. C. Davenport says the time to buy a used car is just before you move, so people in the new neighborhood will think you are the one who used it.

FARM POINTERS

Heavy Kale Plants for Seed

The best kale plants to save for seed are the large ones, with many branches and thick, medium-sized leaves. Tall plants winter kill, plants with heavy branches break down, while large leaves break off. Kale is easy to select and build up for better yields.

Back to the Soil

Get the young chicks out on the ground as soon as possible, even if the weather is bad. Continued cold and rainy weather, cause some poultrymen to keep the chicks shut in houses. In spite of the weather, however, it is best to get them out on the ground by the time they are a week old at least, and before if possible. Otherwise they are hard to train to go out and are also likely to develop leg weakness and to go off feed.

Grain Uses Phosphorus

Soils which have been cropped, especially to grain, in western Oregon respond well to phosphate fertilizers. Three fourths of the phosphorus used by a crop goes into the seed, which is usually sold from the farm. Years of this practice has caused many of the soils to become depleted in this important element.

Hay With Spring Pasture

Give the dairy cows some hay even after turning them out on spring pasture. It pays to give them all they will clean up once a

day for at least a month after the pasture is good. Grain for spring fresh cows should consist mostly of fattening feeds such as corn and barley. Protein or milk stimulating feeds are abundantly supplied in the fresh grass. Fattening feeds will keep up the reserve flesh in the spring, then later in the summer the protein feeds, such as oil meal and cottonseed meal can be fed.

Mrs. Mary A. Spencer, of Watertown, N. Y., aged 75, who declares she has gained fifteen pounds on Tanlac and feels just fine all the time. Was in badly run-down condition.

"Just think of it, at seventy-five years of age to be made well and strong again and gain twelve pounds in weight, but this is exactly what I did after taking Tanlac. Not only that, I feel years younger," said Mrs. Mary A. Spencer, East St., life-long resident of Watertown, N. Y.

"For over a year I was in a terribly run-down condition and I was so nervous and restless that many a

night I would hear the clock strike every hour. I was able to eat very little and lost strength right along, finally becoming so weak I could hardly walk from one room to the other.

"On account of my age I thought my declining health was natural, but Tanlac has proved that I was mistaken. I can do all my own housework now, I sleep all night long, wake up in the morning feeling refreshed and just feel fine all the day long. Tanlac can't be praised too much."
