KLAMATH FALLS, OREGON, SATURDAY, JULY 8, 1922.

PRICE FIVE CENTS

SCHOOL BOY IS RESCUED FROM BURNING STAKE

Torture Inflicted by Irate Youngsters Jealous of Young Visitor

KINGSVILLE, Ontario, July 8.—Eddie Sanderson, a school boy of Bellingham, Washington, was rescued yesterday while being burned at a stake in the woods near this city by irate youngsters who resented the attention he was receiving from a popular Kingsville young girl.

Eddie is visiting here and upon his arrival he promptly became popular with the girls, walking with them and visiting ice-cream parlors with the girl in question, showing her an ideal good time.

Three boys between 10 and 12 who, liked the girl became displeased with Eddie's progress and planned to end his visit. Men passing in the woods heard the boy's cries and smelled smoke. They rushed to the scene and found Eddie tied to a stake, the fire eating its way up his legs.

Eddie at first refused to tell what had happened but finally said the boys had chased him and carried him into the woods where they tied him to the stake and kindled the fire. He was not burned seriously.

JURY HARD TO OBTAIN

Panel of 36 Exhausted in Trial of Wm. Lewis on Murder Charge

A jury was obtained in the Lewis case late this afternoon and the taking of testimony started.

Selection of a jury in the trial of Walter Lewis colored on trial in the circuit court for the killing of Geo. J. Nichols on the night of May 1, was still in progress at 1:30 today, with a panel of 36 jurors having been exhausted and 11 tentative jurors accepted. Judge Leavitt issued a special venire for six additional jurors at noon, and it is expected that a jury will be obtained during the afternoon.

On stipulation and agreement of counsel for the defense late last evening, the court issued an order providing that the jury might separate during recesses, which could only be done in the discretion of the court where the defendant did not object, as otherwise a jury in a case of this nature is kept together at all times during the trial for first degree murder.

SPORTSMEN TO MEET

Association Will Make Preparations for Arrival of Commission

Preparations for the arrival of the fish and game commission, expected here the latter part of next week, will be made at a regular meeting of the Klamath Sportsmen's association in the chamber of commerce rooms at 8 o'clock Monday evening. Recommendations that the association contemplates making to the commission and other business will be discussed and the executive committee has requested a large attendance.

The association points to great accomplishments during the past year but hopes to accomplish even more during the next year, and to this end will urge the commission to undertake certain contemplated projects.

WEATHER PROBABILITIES

The Cyclo-Stormograph at Underwood's Pharmacy shows a slightly lower pressure during the last 24 hour period bringing cooler weather in its wake. However the fall has not been very extensive and no marked change in weather is to be expected.

Forecast for next 24 hours:
Continued fair and warm.
The Tycos recording thermometer has registered maximum and minimum temperatures today as follows:
High 81
Low 51

First Woman to Be Nominated For Senate by a Major Party

MRS. ANNA DICKIE OLSEN AND HER DAUGHTER, MARY, MARKETING FOR DINNER

By ROY GIBBONS

CLOQUET, Minn., July 6.—The Democratic nominee for United States senator from Minnesota cooks the best ham and cabbage I ever tasted. To make election certain all she has to do is to invite the voters to dinner.

That's the kind of a woman Mrs. Anna Dickie Olsen is. And up here they say she's as good a politician as she is a cook.

She's the first woman to receive a senatorial nomination from a major party, and her friends are willing to bet this year's crop and the family flourer that she'll be the first woman to sit in the senate at Washington.

"I'm running because I see great wrongs inflicted on the plain people," she said. "I'm a plain person myself."

Her Own Housekeeper

She is. She keeps house, does the family washing herself, goes to market, darning her husband's socks, and makes her own clothes and the clothes of her 15-year-old daughter, Mary Winifred.

Her husband is Peter Olsen, superintendent of the Cloquet schools. She met him when he came to her door as a book agent—and she says she loved him at first sight.

Mrs. Olsen was born in a log cabin on a farm at Cordova, Minn. She is 37 and tiny; she weighs 100 pounds. Her hair is brown and her eyes gray. Poverty and sorrow have left their print in her face, which even her cheery smile doesn't hide.

"Half my heart lies in the cemetery where my first-born is buried," she said.

"My jewels are my little daughter and my husband. It is to help them and others like them—for we are all of one big family—that I want to go to the senate."

Live in Double House

The Olsens live in a five-room half of a double house, upstairs.

"We pay \$30 a month," she said.

"Rents are terrible up here!"

She meant it, too. She said her girlhood's chief fear was that the mortgage on the farm would be foreclosed. Everything that the Olsens have now was bought with money saved penny by penny. In her campaign she spent less than \$500, and it was saved out of the household money.

Mrs. Olsen says she has three vices—lemon pop, chewing gum and tea.

"When I get to Washington," she says, "most likely I'll be a social failure. I simply detest playing cards, though I've no objection to them. And 10 o'clock is the latest I like to be up."

Student of Bible

Mrs. Olsen went to high school and had one year of university work, but she says most of her education came from studying the Bible. She carries it on her campaign tours.

MRS. ANNA DICKIE OLSEN

Mrs. Olsen came into prominence during the war by lecturing before Minnesota women's organizations. She has been vice president of the Minnesota Federation of Women's clubs, and was a delegate to the Democratic national convention at San Francisco in 1920.

OIL MEN HOPE TO DISCOVER OIL IN PAYING QUANTITY

Existence Declared Established by Present Showing; Drill Reaches Depth of 1800 Feet

Is this great inland basin to become an oil producing area? J. W. Siemens and those associated with him in putting down the test well about 10 miles southeast of Klamath Falls believe that oil in paying quantities underlies the Klamath basin.

That some oil does exist here is not speculation but is an established fact as shown by the product taken from the well yesterday when a party of Klamath men visited the drilling plant.

The drilling under direction of Neil Campbell has reached a depth of 1800 feet, working under difficult conditions and with an inadequate outfit, and the work ahead is to complete the casing and then seal the well against the inflow of water.

Water drawn from the bottom of the well carries a heavy emulsion of black oil which quickly separates when the water is emptied into a vat and allowed to quiet. The contention of those who are studying the possibilities of the well is that the great water pressure, which exceeds 700 pounds to the square inch, prevents the inflow of oil in large quantities. When this is relieved a rush of oil is expected. Some of the more enthusiastic members of the organization have strong hopes of a gusher.

Today the reaming out of the hole to the bottom will be completed and then will follow work on completing the casing and getting the "mud hog" pump installed. This "mud hog" is a powerful pump which is made to force clay into oil wells and check the water flow. The clay comes up around the casing effectively holding back the water. The lower end is then cemented to make the sealing permanent.

The bottom of the well is now the third strata of oil bearing sand which has been reached, according to Driller Campbell. The other two were not considered to be heavily enough impregnated with oil to justify stopping drilling. At one time in the drilling a strata of high grade anthracite coal was passed through, it was said. No evidence of volcanic action was found below the 1450 foot depth.

WORDEN STAY DENIED

Man Convicted on Statutory Charge Must Serve Three-Year Term

Motion filed by counsel for Dave Worden asking for a stay of execution was denied by Judge Leavitt and commitment was issued to the sheriff providing for transfer to Salem to commence serving the three-year sentence pronounced Wednesday by Judge Leavitt.

FOREST FIRES CAUSE SEVERE LOSS IN NORTH

Damage on Vancouver Will Run High; Flames Checked in Spokane Region

VICTORIA, B. C., July 8.—Several forest fires raging during the past week on Vancouver island have caused hundreds of thousands of dollars damage. The fires are reported to be under control, but owing to demoralization of communication it has been impossible to secure accurate information. Fresh fires have been reported from various points.

SPOKANE, July 8.—Rainfall last night in eastern Washington and northern Idaho enable fire fighters to check all threatening blazes.

RAIL DISORDERS MANY

Probe Planned by Attorney General; Troops Asked in Springfield

WASHINGTON, July 8.—Advice were received today by the department of justice concerning disorders in various railroad centers in the middle west, resulting interference with the mails, caused acting Attorney General Goff to begin preparations late today to report the situation to be laid before Attorney General Daugherty.

CHICAGO, July 8.—The Chicago Burlington & Quincy today sought to obtain a federal injunction restraining striking employees from interfering in the operation of shops.

SPRINGFIELD, July 8.—A critical situation exists in Clinton this afternoon following an outbreak between striking shopmen and imported workers. Troops were requested at once.

HAMILTON FUNERAL SUNDAY

Funeral services for D. L. Hamilton, who died yesterday of injuries received when his truck overturned on the Swan lake road, will be conducted in the Whitlock chapel at 10 a. m. Sunday by the Rev. A. L. Rice.

MRS. ENDERS' FLOAT WINS

ASHLAND, July 8.—Mrs. John Enders of Klamath Falls was awarded first prize for the best float entered from outside towns in the Ford and Fourth parade.

BOIL DRINKING WATER

The drilling of a new well near the pump-house has allowed a communication between the surface water and the pure water below, causing a contamination of the city supply. This new hole has been cemented off and it is hoped that further contamination will be impossible. Until it is determined by further tests whether or not this cementing process is successful the public is advised to continue to boil water for drinking purposes.

DR. H. D. L. STEWART,
City Health Officer.

FRENCH CHAMPION DEFENDS TITLE IN TENNIS TOURNAY

American Aspirant Is Defeated in Brilliant Exhibition; Hoover Wins Diamond Sculls

WIMBLEDON, England, July 8.—Suzanne Lenglen of France, today successfully defended her title as world's woman tennis champion, defeating Molla Bjurstedt Mallory, American champion, in the final round of the international grass court tennis tournament. Score 6-2, 6-0.

Lenglen's victory came after a brief tense struggle marked by coolness in which the French champion played with a brilliancy that marked her entire performance.

HENLEY, July 8.—Walter M. Hoover, American, today easily defeated J. Beresford Jr., England, in the finals for the diamond sculls.

FILE SHERIFF RECALL

Action Started Against Jackson County Official by Citizens

ASHLAND, July 8.—The petition for the recall of Sheriff Terrill has been filed at last, and it is found that the greatest number of signatures to the petition are those of Ashland citizens. The filing was made yesterday by the Rev. W. Judson Oldfield, pastor of the Congregational church of Ashland; Stella Leavitt, said to represent the W. C. T. U. of Ashland, and Minnie Bryant, said to represent the W. C. T. U. of Medford. The petitioning party was accompanied by Attorney H. A. Canaday and Frank Redden of Medford, and two women.

No specific charges are filed against Sheriff Terrill, the recall being based upon the following allegations:

"Non-performance of the duties of his office.

"For malfeasance in office as set forth in the published report of the 1921 grand jury, of which J. W. Eldon was foreman."

With the filing of the recall petition rumor got busy and on all sides it is reported that the crusade against the sheriff is only the beginning, and that petitions will later be filed in an effort to make a clean sweep of the county offices.

KLAMATH CO. PRAISED

Selo Residents Impressed During Sight-Seeing Trip

Residents of Selo and vicinity who recently accompanied A. Kalina of Malin in a sight-seeing trip through Klamath county by truck returned home with warm praises for the hospitality shown them by Malin people as well as for the rich farming country they viewed, according to the Selo Tribune. The Tribune further says:

"From the green trees, fields, and gardens, almost overnight they reached sage brush and barren ground, and it was a surprise and a wonder that confronted them. They had wound up a mountain side some 8000 feet and down again and they could see this vast inland empire in all its nudeness with here and there a garden spot. They soon discovered that where settlers could get water to irrigate there was the green spot, and an abundance of alfalfa.

LODGE HAS OPPONENT

BOSTON, July 8.—Sherman L. Whipple announced today that he is a candidate for democratic nomination for United States senator against Senator Lodge. William A. Gaston previously announced his candidacy for the democratic nomination.

MARKET REPORT

PORTLAND, July 8.—Cattle, sheep and hogs steady. Eggs quiet, steady; butter firm. Wheat \$1.09 to \$1.15.

SHALL MORALS BE DETERMINED BY TEST TUBES?

Nation-Wide Controversy Aroused; Opinions of Many Presented

By NEA SERVICE
(Copyright, 1922, by NEA Service)

Can right and wrong be determined by test tube and microscope? Shall moral laws of the future be written from data compiled in the laboratory of the scientist instead of from ancient ethical traditions handed down in sacred books?

The suggestion that morals be taken from the field of religion and placed in the domain of science, advanced by Professor William Morris Davis, Phi Beta Kappa orator at the Harvard commencement, has stirred up nation-wide discussion and has become a center of conflicting opinions.

Through NEA Service The Herald presents today opinions of prominent scientists, clergymen and leaders of thought on Davis' suggestion. This is the passage in the professor's address which has aroused the discussion:

"Just as surely as all questions of a geological or astronomical or evolutionary nature have now been permanently taken over from religion by their respective sciences, so conquest will be made of all questions concerning right and wrong by that division of science which concerns itself with the natural history of goodness as a matter of purely human experience in contrast to goodness as a matter of supernatural revelation.

"Two great and growing, though still young, branches of modern science will contribute powerfully to this conquest: they are eugenics and psychiatry."

Every shade of opinion, favorable and adverse, is reflected in the statements of nationally and internationally known leaders of thought that have been gathered.

The Rev. John A. Ryan, professor of moral theology and industrial ethics, Catholic University of America, Washington, says:

"Professor Davis believes science will take possession of ethics and reduce it to a history of human goodness. The professor confounds 'is' with 'ought.' He forgets history can tell us only what men have done, not what they ought to do. History can provide no standard of right, no distinction between right and wrong. Eugenics and psychiatry may forecast certain effects; they cannot determine the moral quality of these effects. No physical science can disclose ethical standards or yield ethical judgments.

The mental confusion betrayed by Professor Davis is a pathetic refutation of his thesis. It indicates that the physical scientist should let ethics alone; that the shoemaker should stick to his last."

Lothrop Stoddard, author of "The Rising Tide of Color" and "The Revolt Against Civilization":

"When Professor Davis proclaimed the application of science to ethics he uttered a message of good cheer for our troubled times. Science is our pole star. It is alike our guide for the present and our hope for the future. What distinguishes our civilization from past civilizations is scientific knowledge and the scientific spirit. To us have been revealed secrets of life our forebears never knew. And to us has been vouchsafed a passion for truth such as the world has never seen. This unquenchable love of truth, this spirit of science which combines knowledge and faith in the synthesis of a higher wisdom, is our best promise for the cure of present ills and for the regeneration of the race."

Charles P. Steinmetz, inventor and scientist, consulting engineer of the General Electric company:

"I entirely agree with Professor Davis that all questions of right and wrong belong to the field of science, where they can be intelligently studied, and not to the emotional fancies of religion. So it was in the classical civilizations of
