GLASS OF SALTS CLEANS KIDNEYS

If Your Back Hurts or Bladder Bothers you, drink lots of Water

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.—Adv.

Are You the Man Who "Never Reads Advertisements?"

Some men, who are neither blind nor illiterate, claim sincerely that they "never read advertisements."

Yet, if you could investigate, in each case you would find that the man who "never reads advertisements" used an advertised tooth paste or shaving cream or soap. If he owns an automobile it will be an advertised car. If you ask his opinion of any automobile he will reply in words that might have been lifted bodily from an advertisement of that automobile.

Advertising has formed his opinions to a great degree. He may

have received his information through others who obtained their knowledge from advertising. But it is a fact that no man can escape the effect of advertising even if he does say he "never reads advertisements."

Not one of us ever reasoned out entirely from his own mind that the earth is round. If we had not read it or heard it we would never have known it.

In these days of good, truthful, helpful advertising to say, "I never read advertisements" is merely your way of saying, "I don't read all advertisements."
