

A Fit Before a Fight

Jack Dempsey isn't waiting until his coming fight to "knock 'em dead." Here Charles Tactaglia, Los Angeles tailor, is fitting him in an outfit that would astonish a ghost.

Personal Mention

Mr. and Mrs. L. G. Van Bellen were hosts yesterday on a motor trip to Crater lake when they took as their guests Mr. and Mrs. J. J. Parker and E. E. McMichael, superintendent of the American Express company, who was here for several days from Sacramento on business. McMichael said this morning before taking the train for the south that he was very much elated over the Crater lake trip and particularly was he pleased with the Fort country, with its miles of green fields covered with natural clover and wild hay dotted here and there with thousands of head of cattle. After spending a few hours at Crater lodge the motor party drove on round the Rim road.

Mr. and Mrs. C. H. Underwood and Mr. and Mrs. W. O. Smith were other Klamath Falls folk who enjoyed a day at the lake yesterday.

Many outing parties were caught in the storm last night on their way home from outlying points. Among them were Mr. and Mrs. Charles I. Roberts and party, Miss Marjorie Dezell, Mr. and Mrs. R. E. Wright, Rudolph Jacobs and Ina Roberts, who were on their way home from the Lake o' the Woods, where they had spent the day at the summer cabin of Mr. and Mrs. Will Baldwin, when the storm broke.

Mr. and Mrs. J. A. Gordon spent the week-end at their cabin at the Lake o' the Woods, returning home last evening.

Mrs. Will Baldwin and son returned home last night from the Lake o' the Woods where they have been spending several weeks and will be in town for the next few days before returning to the lake for the remainder of the summer.

Nish Chapman is a business visitor here this week from Eugene. Chapman represents Tiffney and Cokey of that city.

Mr. and Mrs. F. M. Lucas and family were at Crater lake for Sunday, returning home last night.

Dr. George Merriman and family spent the week-end at the D. B. Campbell camp on Spring creek.

T. M. Cunningham of the Mt. Laki district was a county seat visitor here Saturday afternoon.

C. Bowman was in town over the week-end from his ranch home near Merrill attending to business affairs.

Fred Houston, of the K. K. K. store, left Saturday night for Rocky Point where he spent the week-end with his family who are spending several weeks at their cabin there.

Miss Marjorie Black left this morning for Alaska, continuing a vacation trip which she started early this summer from Flint, Michigan. Miss Black stopped in Klamath Falls for the week-end to be with her brother, S. R. Black, forest supervisor.

Mr. and Mrs. Elbert Lenox returned this morning to their home in Copco after several days spend here looking after matters of business.

Miss Faye West spent yesterday with her family on the West ranch south of town.

Charles Gaddes was a guest at the Eagle Ridge tavern over the week-end.

Mr. and Mrs. C. M. Ramsby accompanied by Miss Minnie Barnum, left Saturday night for Rocky Point and stayed there fishing and resting until Sunday evening when they returned home.

Roy Hickman visited in Klamath Falls from the Fort over the week-end.

Jay Fairlo a rancher from the Mt. Laki district was in the city Saturday afternoon after supplies. Walter G. Brown, of Chiloquin, was here on business Saturday.

M. J. Lytell made a flying trip into town from his Bonanza farm Saturday after men to help with his crops.

A group of prominent California people stopped over here Saturday night at the White Pelican hotel on their way to Harriman lodge where they expect to spend a brief outing period. They were Mr. and Mrs. H. T. Thompson who were the hosts, and Mr. and Mrs. V. E. Palmer and son of San Francisco and Mr. and Mrs. S. Manning, of Sacramento. Thompson is private secretary for Herbert Fleischacker.

J. S. Elliott has returned from Susanville where he has spent the past two and one-half months installing a boiler for the Lassen Lumber and Box company and a half dozen fireplaces in private homes. He expects to start at once on the installation of another boiler for Ackley Bros. mill here.

Eugene—New method prune dryer being built.

FISHERMEN USE FLYING BOAT

Fish Spotted From Altitude of 500 Feet; 200-Pound Catch Is Made

LOS ANGELES, Calif., July 31.—Rivaling the flying fish as an object of interest to the sporting world in the "flying fisherman" introduced to Southern California recently when a party of sportsmen hopped off in a flying boat, sailed to the fishing grounds, and spotting their game from an altitude of 500 feet, landed and caught 200-pounds of assorted varieties of fish.

Piloted by Paul Haaren, a local aviator, the big six-passenger flying boat, filled with "flying fishermen" and with tackle suitable for landing game fish aboard, nosed into the air. After a twenty minute run to Avalon, Santa Catalina Island, where the party dropped for luncheon, the party headed for the San Clemente fishing fields. Within a few minutes a school of albacore was sighted from an altitude of 500 feet. Haaren brought the seaplane to rest immediately over the fish, visible because of the clearness of the water.

Two lines were cast and the flying boat taxied over the surface trolling the bait. Results were instantaneous, two strikes of albacore furnishing excitement for twenty minutes before the fish were brought to gaff.

Having taken their share of that school, the "flying fishermen", took to the air again and located another finny tribe within a few minutes. The ship was brought to the surface and once again the fishermen got busy. Two more albacore and an eighty pound shark rewarded their efforts this time, and having enough of the sport for one day the sportsmen hopped back to their homes.

Silage is an insurance against a long winter and short hay crop, as well as an economical feed for sheep and cattle. The full value of the silo was felt in the late hard winter with hay out of sight. The Union experiment station has found that a combination of hay and silage produces twice the daily gains at half the cost of gains on hay alone.—O. A. C. Extension Service.

When ants become troublesome whole colonies may be destroyed by mixing a teaspoonful of tartar emetic with a tablespoonful of honey, spreading it on piece of bread and placing this bait in the path of the ants. They carry portions of the poisoned honey to their young as well as eat of it themselves.—O. A. C. Experiment Station.

Aphis on cabbage and kale plants are particularly bad this year in many parts of Oregon. Black leaf-40 diluted according to directions on the package will clean them out when

properly applied. A good soap suds rather than clear water will assist in spreading the solution, making it more effective and economical of labor and material.—O. A. C. Experiment Station.

The codling moth spray for summer protection was due in most districts before the end of July. Growers in doubt as to arrival of infestations can consult either the county agents or extension workers as convenient.—O. A. C. Experiment Station.

Land in the Willamette valley that is to be sown to fall crops can be diced to advantage before the fall rain. This puts the land in shape so that it can be plowed earlier, which is an essential thing for successful fall sown grain.—O. A. C. Experiment Station.

CORVALLIS, July 31.—Just how many world championships in egg laying contest have been annexed by hens of college breeding, was told by James Dryden, professor of poultry husbandry, to members of the American Association of poultry instructors and investigators in session on the campus. Professor Dry-

den is credited with having out the northwest on the map from an egg producing standpoint and that is said to be just why the most prominent poultry specialists of the country decided to meet in the northwest this summer.

The experimental breeding work of the college was well known as to its general scope but the specialists showed great interest in learning of the details of how the results have been accomplished.

CONFIRMS OIL STRIKE

Telegram Asserts Occidental Well Rated at 4,000 Barrels

A telegram received today by George Chamberlain confirms Saturday's announcement of a strike by the Occidental Petroleum company in the Santa Fe Springs field, and asserts that the well is rated at 4,000 barrels daily and pronounced by oil men as the best in the field.

Because the pipe line is not yet connected the well is not flowing full capacity but is making 300 barrels daily through a five-sixteenths inch pipe.

Coal Mine Fields Become Military Camps

Scenes like the above are now common throughout Pennsylvania coal mine fields where disorder is expected if attempts are made to reopen mines under the protection of military forces. The above was taken at Coakburg, Pa.

THE WILL TO GO AHEAD
With the proper spirit in Klamath Falls nothing can stop its GROWTH, AND PROSPERITY.
THIS IS THE TIME FOR ALL GOOD MEN to show their loyalty to the City of Klamath Falls—and by **LOYALTY WE MEAN:**
1. **BUILDING NOW**, so as to provide jobs for our own workers. You're going to build anyhow, sooner or later. This entails no sacrifice. Prices are down, some to such a low point that there is bound to be a rise.
2. **BUYING NOW** the things you need. Prices are down to rock-bottom and you gain nothing by waiting.
3. **BUYING FROM OUR OWN LOCAL MERCHANTS** in preference to houses in far-off cities. All we ask is to try them **FIRST**. You'll find that their prices are as low and their qualities as good as anywhere, and they're always here with a **SATISFACTION-OR-YOUR-MONEY-BACK POLICY**.
There's nothing wrong with this city, Prosperity is bound to return, sooner or later. If you, Reader, will act upon these suggestions, **WE WILL HAVE IT COME SOONER!**
Let us all get behind this movement. **CO-OPERATE!**
Build Now—Buy Now—Work More—Earn More
