

The Office Cat

BY JUNIOR

Seeing through an idea is good—seeing an idea through is better.

J. M. Evans says a man's home used to be his castle, now it's his wife's card club headquarters.

Seen So!

The last member of the famous Light Brigade has died again! These boys are certainly immortal.

"U. S. has half of the world's gold."—headline. If you don't believe it look at people's teeth.

The Difference

The main difference 'twixt me an' my boy Jim," explained William Griffith farmer, "is that when I put in a day at work I don't feel like runnin' round nights, and when Jim puts in a night runnin' round he don't feel much like workin' days."

In Delaware there is a town that boasts of a female fire company. Chances are that they use silk hose.

Pointers

Audacity is the stepfather of success.

Men are different. Husbands are alike.

Even a tall man may not be above criticism.

It is far easier to love somebody than to respect them.

Men like to be laughed at for their wit, but not for their folly.

Charles DeLap says and to think that just about two years ago that word "prescription" had a fine reputation!

A Helpful Hint

"Hey, you!" called a disgruntled customer in the rapid fire restaurant. "My cocoa's cold!"

"Well, why'n't ya put on your hat?" briskly returned Heloise the waitress.

The old man found he could not go up a flight of stairs as fast as he once could, giggles Glenn Parker. But he could come down as fast as he ever did.

We admire men for their perfections. We love them for their failings, for it makes them one of ourselves.

Modern Epitaphs

Mary Snooks has gone from hence. Synthetic gin is not good sense.

L. F. Hansen says some men are born rich, some acquire riches, and some give up—and call it filthy lucre.

The vamp went up the winding stairs. The kick behind her bothered. She stepped and stooped to tie her shoe—

His chewing gum he swallowed.

"Fifty thousand dollars stolen in Chicago found in Los Angeles"—money goes further than it did once.

His Choice

Tommy was permitted to go in and see his new twin brothers. After looking at them a moment he said, "Keep the red-headed one, ma, 'cause he'll be the best fighter."

There has been no mitch rain recently that we are inclined to believe the picnic season has opened.

That Artistic Plunk

The new silver dollar may be improvement from an artistic point of view, but it is just as hard to earn and just as easy to spend as the old one.

'TWOULD BEEM SO

New York man wooed and won his bride by mail, which is the most expensive correspondence school course known.

104 homes in Klamath Falls use electric ranges, is your home one of the 104? Link River Electric Co.

LONG-BELL CO. COMING WEST

Largest Lumber Manufacturing Concern Transfers Activities From South to New Fields

The largest manufacturer of southern pine lumber, owner of large tracts of timber in Klamath county and one of the largest lumber producers in the world, the Long-Bell Lumber company of Kansas City is arranging a gradual transfer of its interests from the southern states to the fir forests of the northwest, where the company owns more than 70,000 acres of what is said to be the finest stand of timber in the world.

At the confluence of the Columbia and the Cowitz rivers, just opposite Kelso, Washington, the company has purchased several thousand acres of land, on a part of which construction will presently begin of sawmills, docks, storage yards, railroad yards, machine shops, hotels, homes, retail business and amusement centers and all the incidental equipment and conveniences of the most modern logging communities.

Returning to Kansas City recently from the northwest, where he examined the progress of the development, R. A. Long, founder and chairman of the board of directors of the company, announced immediate construction plans for the new project.

The plant will be located 50 miles inland from the Pacific ocean, about half way from Portland, Oregon to the ocean. Large ocean freight vessels traverse the Columbia river from Portland to the Pacific, passing this location and will find loading for same at the docks of this company. Three trunk line railroads, the Great Northern, the Northern Pacific and the Union Pacific, will distribute Long-Bell lumber to the interior points of the United States. This means that the entire world will be a market for the product of the lumber company's new manufacturing center.

The two big mills, which will operate day and night, will be located on the Columbia river. Another mill located in the immediate vicinity will be built somewhat later. These mills will have an approximate annual capacity of 600,000,000 feet, or nearly 100,000,000 feet more than the company is producing at present in its 11 big southern pine mills.

The first construction will be that of the two fir mills. These mills will stand side by side with a 25 acre log pond between them. This pond is to serve immediately these mills, while a larger pond of about 160 acres will serve as a storage pond.

"It will be more than a year before the mills are completed," Long said. "The development now at hand follows two years of exhaustive preparation in surveying and mapping the entire timber holdings and clearing several thousand acres of land, preparing for the mills. Probably what is the first relief map of timber holdings in the history of the lumber industry has been made and on such a scale to permit officials in the Kansas City office to plan detailed operations, such as location of railroads, outlying logging camps and mills."

The main office and general sales office will remain in the R. A. Long building in Kansas City.

"We will not be through cutting in the southern pine district for several years, and will be shipping fir in large quantities long before our timber is exhausted in the south," Long added.

"Branding our lumber, first inaugurated by this company some three years ago, will be continued in the northwest. Every piece of lumber that leaves our mills will bear the trade-mark of the company."

Long said 4,000 workmen would

be needed when the mills were ready for cutting, and provision is being made to make home life there more attractive to families by providing of suitable and attractive homes for their use.

The Long-Bell Lumber company was founded in 1875 with one retail lumber yard. Today it is a \$30,000,000 corporation owning 11 pine mills and two hardwood mills, all located in the south, also a large white pine mill and sash and door factory at Weed, California, and 130 retail yards located in Kansas, Oklahoma, Missouri and Texas.

S. M. Morris is general western manager for the company, with headquarters at present at Kelso, Washington.

Recently representatives of the Loyal Legion of Loggers and Lumbermen visited the Long-Bell properties in the northwest, after which they issued a statement saying that the bunk houses and mess halls of the engineering crews were of the highest standard, a policy that will be carried out in all of the operations of this company.

Yes, It Was a Hot Day Thermometer Said 121 But They Played Ball

TONOPOH, Nev., August 2.—The "hottest" baseball game in the United States this year is believed to be that played at Death Valley Junction, Cal., on July 4, when the thermometer stood at 121 degrees while teams from the nearby borax mines and from the mining camp of Shoshone contested for the championship of that part of the Mojave desert. Two hundred spectators displayed much enthusiasm despite the fact they did not have any protection from the sun.

HIS EXCUSE

What do you mean by going out to get your hair cut in the firm's time? demanded the factory foreman of a machine hand.

The bland reply was: "air grows on firm's time, don't it?"

SALTS FINE FOR ACHING KIDNEYS

We eat too much meat which clogs kidneys, then the Back Hurts

Most folks forget that the kidneys, like the bowels, get sluggish and clogged and need a flushing occasionally, else we have headache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sorts of bladder disorders. You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and is harmless to flush clogged kidneys and stimulate them to normal activity. It also neutralizes the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts is harmless; inexpensive; makes a delightful effervescent lithia water drink which everybody should take now and then to keep their kidneys clean, thus avoiding serious complications. A well-known local druggist says he sells lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.—Adv.

EUROPE'S CHAMPION TERRIER

Ivo Rarebit. That's her name. It might be "rare bird," for she has been adjudged the best terrier in all Europe at the Cambridge dog show in London. Hamilton Adam, London, is the proud owner.

Booze Outkicked Frog

SPOKANE, Aug. 2.—Federal officers in a liquor raid to Mica Peak, thirty miles east of Spokane, Saturday took a quart jar sample of the moonshine seized and found a dead frog floating in it when they examined it closely.

"Either the frog was put there to give the stuff a kick," suggested one of the officers, "or, like Mark Twain's jumping frog, it had too much in its stomach. Only one thing is certain, the kick was too much for the frog."

The mystery of the frog was solved with discovery of a water supply pipe leading to the still from a spring sixty feet distant.

"You can fool some of the people all of the time, and all of the people some of the time," we don't try to fool any of the people any of the time. Carrins' For Drugs.

have been spending the summer and will move into their lovely new home on Pine street.

Charles Withrow left on the boat this morning for Rocky Point where he will spend the remainder of the summer at his summer cabin.

Mr. and Mrs. D. V. Kaykendall and sons, John, Bill and Vernon, arrived home last night from Crescent City where they have been spending a happy two weeks' vacation.

Mr. and Mrs. Jackson Kimball also arrived home yesterday from Crescent City where they have been resting up from the hot weather which has been Klamath's heritage this summer.

After a residence of many years here Mr. and Mrs. W. H. Dabney left this morning for Roseburg to make their future home. Dabney is a line-man with the California Oregon Power company and is being transferred by the company to the Willamette river valley division.

E. C. Bill was in town yesterday after a fishing license preparatory to taking a vacation trip into the wilds.

Mr. and Mrs. J. Percy Wells have returned from Portland where they have been spending the summer. Wells is superintendent of the city schools and is here to get things in shape for the opening in September.

Michael F. Bolaney and Lydia M. Pockrotsky, and James Henley Wilson and Alice Bell, all of this city, were married at the Methodist parsonage Tuesday afternoon by the Rev. S. J. Chaney.

Mrs. Bessie Nelson and two children, who have been visiting Mr. and Charles House have gone to Chiloquin for a while before returning to their home in California.

The Painless Dentist

Dentist (prodding a patient's gum in search of a fragment of tooth): "That's funny, I don't seem to feel it."

Patient: "You are lucky"

Good music makes for home contentment. A Brunswick Phonograph will furnish the world's best music. Carrins' For Drugs.

ANCIENT SKULL DRAWS INTEREST

Anthropologists Speculating on What May Result From Valuable Find

SAN FRANCISCO, Aug. 2.—Amateur anthropologists and students interested in man's beginning in North America are speculating on what may result from the Smithsonian Institution's study of the skull of the Stanford man. This human fragment, encased in cemented gravel, recently was unearthed from the bank of San Francisco creek on the western boundary of the campus at Stanford university and forwarded to the institution. Its antiquity apparently is unquestioned, but the place it will occupy in the history of man's prehistoric development remains for science to determine.

The fact that the skull was found 18 feet below the level of the surrounding plain indicates, according to Dr. Bailey Willis, professor of geology of Stanford University, that its age may be from two thousand to ten thousand years. The structure of the skull differs from that of the American Indian and has the prominent bony ridges above the eyes, which is a characteristic of the primitive man.

There have been no discoveries of human fossils of extreme antiquity on the North American continent and in scientific circles it is generally agreed that man's first appearance on the western hemisphere was long ages after he had settled himself in the valleys of Central Europe. If that theory is accepted, the Stanford man was comparatively a modern individual, although he may have antedated civilization by many centuries.

The oldest human relic yet discovered glories in the name of "Pithecanthropus erectus," otherwise the erect ape man and he belonged to an age so remote that no other trace or record of his kind ever has been found. "Pithecanthropus" flourished, as nearly as science can estimate, one million years ago. The relics consist of his skull, a thigh bone and a cou-

CHINESE HOPE TO END SMUGGLING

PORTLAND, Ore., Aug. 2.—Local Chinese will hold a mass meeting soon to decide what steps may be taken to break up smuggling rings in Chinese seaports which attempt to smuggle Chinese into this country, according to R. P. Bonham, inspector in charge of the immigration service in Oregon.

ple of molar teeth and they were found in Java by a Dutch surgeon in 1891 under fifty feet of strata. So far as it was possible to draw conclusions from him after a reconstruction of the fragments, it was evident that he was something less than a man and something higher than an ape. He was between the two extremes and probably belonged to a species from which the human race was evolved. Java, when "Pithecanthropus" and his kind foregathered, was a part of the Asiatic mainland, in scientific opinion.

Before this oldest scrap of mankind came to light and intrigued the imagination of the scientific world, other human relics had been discovered in Central Europe, but their age was as naught compared with the man of Java. The Heidelberg man whose only relic is a single bit of jawbone, was unearthed at a depth of about 80 feet in the Mauer sands near Heidelberg, Germany, in 1907. His age was estimated at about 500,000 years, or half that of his ancestor, Pithecanthropus.

The Pithecanthropus, whose remains consist of skull fragments, was turned up in a gravel bed at Pithecanthropus, Sussex, England, in 1911. Great as was his antiquity, science fixed his time on earth as about 250,000 years ago. In 1856 a skull cap and other parts of a human skeleton came to light near Dusseldorf, Germany. His age was figured at about 100,000 years and he became known in anthropology as the Neanderthal man.

The great ages of these fossils dwarf almost into insignificance anything that might be expected of the Stanford man, but students nevertheless believe that a reasonable antiquity can be established for this latest find in the link of the human chain.

We don't know it all. If you have a suggestion that would improve our drug service to you, we would appreciate having you mention it to us. Carrins' Says So.

Why a round tin for TEA?

Because a round tin is the best shape which will hold a vacuum—and as flavor protection for your FOLGER'S GOLDEN GATE TEA (Black or Green) is now vacuum-packed.

It's the same delightful soothing flavor that you always found in Folger's Golden Gate Tea—only you can now use less tea per cup. Ask your grocer.
