THINK IT OVER

(Medford Mail Tribune)

CALIFORNIA has three times as many people per square mile as Oregon. Washington has two and one-half times.

What's the matter? Oregon is older than Washington and almost as old as California. Oregon has equal resources, and in many ways a better climate.

At the coming fall election for example, there are the usual crop of wild-eyed constitutional amendments. One would introduce single tax, and scare every business man in the country away from the state.

Of course most of the half baked measures will be defeated. They should be. But there is always the danger that merely by the law of chance, one or more will go through.

Nothing would do Oregon more good than an aroused public opinion against political experimentation, a general determination on the part of the people to stand under with their voice any untried political innovation.

An excellent rule for the average voter as he scans the ballot this year will, therefore, be "When in doubt, vote no." That is to say, unless you understand the measure thoroughly, and know by actual personal knowledge and experience that it is a measure that you want, take no chance, hit it on the head.

One Year of Republican Rule Shows Tremendous Savings... Reduction of Over Billion in Public Debt and Nearly Two Billions in Public Expenses—Congress Cuts Budget Requests.

President Harding took office on March 4, 1921. The first complete fiscal year of government business under his administration began on July 1, 1921, and closed on June 30, 1922.

The total public debt of the United States on June 30, 1921, one year ago, was \$22,977,000,000. This sum had been reduced on June 30, 1922, to \$22,042,000,000, a reduction of \$935,000,000.

The policy of the administration has been a return to normal conditions in public expenditures. How well this has been accomplished is amply reflected by a glance at the expenditure figures of preceding years.

TWO DROWNED TO SAVE CREW... Men Left On Deck of Submarine When Ship Is Submerged

STOCKHOLM, Sept. 11.—Two men were drowned from a submarine under singular circumstances during the recent Swedish coastal fleet manoeuvres.

The submarine liers, it appears, fired a torpedo at a movable target and then came to the surface in order to see the effect produced.

Three of the men were washed off the deck, but the fourth clung to the submarine's periscope. The submarine rose again quickly and this man was rescued.

It is reported that the entire crew of the submarine would probably have been lost if the commander had failed to submerge immediately after the trouble was discovered.
