ATTEND CHURCH SOMEWHERE SUNDAY!

SOMETHING NEW UNDER THE SUN

The verdict of the crowds who followed Jesus was "We never saw it on this fashion," and miracles are still being worked today by the same influence. The power of Christ is old—yet ever new to each new life. It is the greatest reconstructive force among men.

The most extensive Armistice Day preparations since the signing of the armistice will be held in cities in Oregon by posts of the American Legion.

Plans for Armistice day festivities are already being arranged by local posts, and state officials of the American Legion.

The second annual encampment of Yamhill county will be staged at McMinnville, September 19th-20th-21st. In conjunction with the McMinnville county fair, McMinnville post American Legion will handle the three days entertainment for the crowds expected to attend.

Patrick Evans, a patient in the U. S. Veterans' hospital at Palo Alto, California, has appealed to the Oregon Legion to locate comrades who served with him in the 116th engineers. Evans needs affidavits in order to assist him in showing present sickness resulted from his service in the world war. Anyone having served

with Evans is asked to communicate with state headquarters American Legion at Portland.

State officials of the American Legion have announced for the one way round trip fare to the national convention, New Orleans, October 16th to 21st, sale dates will be October 8th to 15th, with final return limit of November 30th, allowing for extended stop-overs in cities. Housing and identification arrangements are handled thru the state adjutant of the American Legion.

Essays on "How the American Legion can best Serve the Nation" are arriving at state headquarters in Portland. School children in Oregon will have until October 6th to present their essays, extension being granted in order to give students an opportunity of consulting with their teachers. Prizes as follows, will be given winners: National, \$750.00, first; second \$500.00; third, \$250.00. To be used for scholarships. The essay must not be over 500

words in length. Any boy or girl between the ages of 12 and 18 may complete. All essays must be in the hands of the state adjutant of the American Legion in Portland not later than October 6th. Selection will be made by legion judges of three best essays and these will be forwarded and entered in the national contest. National winners will be announced during November.

A round-up with all the trimmings will be held by the Fossil American Legion post during the Wheeler county fair, Buckeroos from surrounding communities will enter the legion event. The post will also hold dances during the fair and furnish music from their newly installed radio to the public.

American legion posts in central Oregon are in a flourishing condition, reports Harry N. Nelson, department adjutant, who has just returned from a tour of that section of the state.

The only out of doors dance hall maintained by the legion in the state was found at Redmond, where the post has club rooms and a swimming tank. A home for the local post is being constructed at Madras, he asserted.

The \$80,000 athletic club of the Percy A. Stevens post at Bond was inspected by the department adjutant, who found it an example worthy of emulation in many other cities. Extensive preparations for the fall and winter activities are being made among the posts of the central counties and a great deal of interest in the American Legion is being shown, declared Nelson on his return to Portland, where state headquarters of the legion is located.

Preparations for the annual Armistice

day edition of The Pacific Legion, official publication of the American Legion departments of Oregon and Washington, are now well under way. This magazine, which has been characterized by National Commander MacNider as the "best state publication of the American Legion," has gained a national reputation through the excellence of its annual armistice number, which it expects to maintain this year with special articles, humor and fiction features of interest to ex-service men.

ALGOMA

George Hagelestein had the misfortune to cut off the end of his middle finger as he was trying to take a weed out of the sickle.

A driver lost control of his truck at the foot of Algoma hill, going through the state highway fence, plunging over a 15-foot bank and passing through the Algoma Lumber

company fence. Neither the man or the truck was injured.

Mr. and Mrs. Win Graf went to Susanville, Cal., where Graf has accepted a position as yard superintendent. He was formerly employed by the Algoma Lumber company as yard boss.

Mr. and Mrs. Geo. Harrison have also left for Susanville. Harrison was employed by the Algoma Lumber company as assistant yard foreman.

Mr. and Mrs. A. McCully and family moved to Algoma from the old Algoma Lumber company ranch which he has been taking care of. He is driving the delivery team.

John Hagelestein went to Klamath Falls Tuesday on business.

School started Monday. It was reported that there was a fair attendance.

Mr. and Mrs. J. Clark of Visalia, California, visited Mr. and Mrs. Geo. Hoffmann last week. They made a trip to Crater Lake.

NATURE'S OWN METHOD OF PROTECTION

ONLY one method that gives absolute protection in burial has ever been discovered. This is the "diving bell" idea—based on a natural law that the air within an inverted vessel keeps out all water. A child proved this principle by placing an inverted glass in a pan of water.

This principle has been utilized in the Clark Grave Vault and made permanent by the use of twelve gauge Keystone copper-bearing steel which positively resists rust and corrosion and will not leak. (Stone, brick and concrete vaults allow water to seep in, and act as a basin to hold it.) Over a period of twenty years the Clark Grave Vault has proved this principle by completely satisfactory results in all climates and soils.

Supplying the Clark Grave Vault is in accord with our policy of rendering the most valuable service.

It's in the Examination

No matter how well glasses are made and fitted, the best results do not ensue unless it has first been intelligently determined what the eyes ACTUALLY NEED. We are SPECIALISTS in eye examination for the need of glasses. See us and see best.

THE MILL TOWN OF KLAMATH COUNTY

CHILOQUIN is destined to become the great mill town of Klamath County. Of all Chiloquin "West Chiloquin" promises to be the center of this rapid development.

WHY? It is situated along the west bank of the Williamson river gently sloping southward to the waterfront; It is provided with pure water and there is no pollution by drainage from any undesirable sections; the main road, rock-surfaced and well drained, passes through the townsite.

THE ONLY SCHOOL in the Chiloquin community is at West Chiloquin; it is less than one thousand feet to the S. P. depot. Today houses to rent are in great demand, and industries are needed and will soon be underway.

WEST CHILOQUIN

The long waited for opportunity has arrived. The place for Homes and for Business. Desirable lots are now being offered for \$150.00 AND UP

And there are very few UP lots. You can purchase on terms if you desire.

This sale will last only 30 days from this date. All this property will be higher next spring when active building starts. Then the more desirable lots will be sold this fall.

Get in now while this property is DIRT CHEAP. Office on townsite is now being erected. See me or write

R. C. SPINK, Owner Postoffice, Chiloquin, Ore.

The saw milling industry is the largest asset to this town and there is ample assurance that it is only in its infancy. There are now four going prosperous mills.

But mills are not all the industries that adjoin this town. There are large farming, cattle raising and dairying interests here.

Many train loads of logs are cut in this vicinity and hauled to mills in other places, some of these mills will move to West Chiloquin.

This is the paradise of the fisherman and the greatest place for a summer home in this county.

Chiloquin mills will run all winter as Williamson river at this point never freezes over. The only place in Eastern Oregon or Northern California where naturally open mill ponds can be maintained.
