Farm Water Systems
 This is the time of the year to think of water systems. Think of the many steps to be saved during the cold winter days by the use of a modern water supply plant. A turn of the faucet gives you an abundant stream of water under pressure and free from the danger of freezing up when you need it most. Water is the cheapest feed you can give the stock when preparing them for the market. No time is lost in giving them all they can drink with a modern plan. There are several types you can see in operation at our store. Let us demonstrate what they can do.

WASH KIDNEYS IF THEY HURT
 Take Salts to Flush Kidneys If Back Pains You or Bladder Bothers
 Flush your kidneys with salts occasionally, says a noted authority, who tells us that too much meat and rich food may form uric acid, which almost paralyzes the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you suffer with a dull pain in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to see a doctor two or three times during the night.
 To help neutralize these irritating acids, to cleanse the kidneys and flush off the body's urinous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate sluggish kidneys; also to neutralize the acids in urine so it no longer irritates, thus often ending bladder weakness.
 Jad Salts is inexpensive; cannot injure and makes a delightful effervescent lithia water drink.
