Filings Close 9 a.m. Friday; Applications May Not Cover All Tracts

Nine o'clock Friday morning, October 27, is the closing hour for filing on the 10,000 acres of Tule Lake lands recently opened for homestead entry.

At the present rate of filing it is not probable that claims will be made on all the 174 tracts, according to H. D. Newell, project manager. The service men have 90 days preference but after January 27, if any tracts remain, they may be filed on by the general public.

Building Charge \$60 The building charge will be \$30 per acre, 5 per cent of which, or \$1.50 per acre, will have to accompany the water right application. The next installment will not fall due for 5 years. There will then be 5 annual installments, each of 5 per cent, followed by 10 annual installments, each 7 per cent. No interest will be charged on deferred installments. In addition there will be an annual operation and maintenance charge which may vary from year to year but is likely to approximate \$1.50 per acre per year.

Water Application Required

Every person desiring to acquire any public land must execute a water right application upon a form provided for that purpose and accompany the same by payment of the first installment of the building charge. Each water right application must be for a specified farm unit, and more than one person may make application for the same farm unit, but not more than one water right application can be made by the same person. The water right application must be filed with the project manager, United States Reclamation Service, Klamath Falls, Oregon, in person, by mail, or otherwise, within a period of four days, beginning 9 o'clock A. M., October 23rd, 1922, and extending to and including 9 o'clock A. M., October 27th, 1922. One successful at the drawing will be allowed 19 days in which to make homestead entry. He will have 6 months after making homestead entry in which to establish residence. If so desired a water right application can be mailed you which you can complete and return to this office with the first installment, thus participating in the drawing without great expense to you.

Average Area 56 Acres

The average tractable area of the various tracts is 56 acres, maximum 85 acres, minimum 17 acres. There will be a filing fee of about \$15.50 for a 40 acre tract and \$13.50 for a 40 acre tract. About 80 per cent of the lands are in California, 20 miles from Klamath Falls, the nearest shipping point.

Andorra Split by Cheese

Two Sides Show Strength

ANDORRA, Oct. 24.—A piece of cheese threatens to disrupt the peace of Andorra, smallest and oldest republic in the world.

Neither the size nor the fragrance of the cheese has anything to do with it. It's the quantity.

The question is this: shall the Bishop of Urgel be allowed as semi-annual tribute two cheeses, as formerly, or only one cheese?

Political strife and schism revolve around these cheeses—which are six feet in circumference!

The "two-cheese party" insists that the Bishop of Urgel be satisfied with ancient custom, which, according to the "Acts of Parsons" of 1258, the Magna Charta of Andorra, decreed that he should receive in addition to his salary of 450 francs two large cheeses and two hams twice a year.

Now comes the cry for government economy—and the birth of the "one-cheese party." These people believe that the bishop has been treating too highly of the joys of life, that in this area of the high cost of living one cheese should suffice for one man's needs.

The bishop refuses to say what his

cheese needs are, nor will he be content on his annual cheese capacity. He is going to let the people decide. And while they are deciding, this little republic of 175 square miles, perched high in the Pyrenean mountains, is far more disturbed than they were during the world war.

Woman Describes Double Murder to Authorities; Two Men, Two Women

NEW BRUNSWICK, N. J., Oct. 24.—The name of the woman reported to have witnessed the double murder of the Rev. Hall and Mrs. Mills, choir singer, became known today. She is Mrs. Jane Gibson, a widow, who with her son conducts a 60-acre farm on Hamilton road, in a sparsely settled section several miles from here.

Before the harvest time her fields were frequently entered at night and robbed. Shortly before the double murder she decided to end this thievery. Each night she lay in wait. Nearby was tethered a saddled mule for pursuit.

The night of the murder, she was said to have told investigators, she was riding down De Brunsey's lane through the Phillips farm, when she saw in the field the dim outlines of two men and two women. After hearing some loud talking she heard a pistol shot, and one of the men fell. Then a moment later, four more shots and one of the women dropped. The man and woman stood over the slain couple and the name of the man was spoken in horror by the woman. Mrs. Gibson then became frightened and rode home.
