THE NEWSPAPER

HE newspaper, especially the country newspaper, comes in for more criticism than any other line of business, says the Pacific Printing Trades Bulletin. It appears natural for a certain type of untry merchant, after he has attained some degree of success, to feel that his newspaper is not representative of his community. The merchant of this type, although he may not be able to spell the simplest of words and is a stranger to grammatical construction, knows how his town's newspaper should be run. You can go into his store which may e a miscellaneous collection of merchandise piled in with no view to system or efficiency, and stand around 5 or 10 minutes before you are walted on and the proprietor not seeing any of this, will readily point out to you where and why the town's newspaper does not measure up.

No doubt the man of this type is honest in his convictions and means well, but at that there are many to so-the newspaper man would cannot be delivered. like to change places with him for about 20 days in order to show him where real improvements could be

for measuring themselves and another for measuring their newspaper -they realize the handicap of small working capital and limited trade territory. They know it is impossible to become a merchant prince unless there is room to expand and know, too, that no one line of business is excluded from this economic environment. Along the line of clipped from the 'Olympian'' is perti-

When the first of the entombed miners were reached in the Spangler, Pa., mine disaster. A multitude' of relatives, friends and co-workers surged as close to the mouth of the pit as authorities would permit to hear the story of the first miners brought to the surface after the explosion and cave-in which cost more than a hundred lives. Picture shows rescuers bending over the rescue d men, administering first aid,

STOP THIS WASTE!

By DR. FRANK CRANE

(Copyright, 1922, by Frank Crane) The other day the postmaster at Chicago had placards put on the motor vehicles operating in the postal service reading as follows:

> STOP THIS WASTES 25,060,000 Pieces of Mail Matter Annually Are Delayed or Not Delivered at All Because They are In-correctly Addressed or Improperly Picked.

The fostal authorities call our attention to the fact that there are 25,000,000 pieces of mail that they must handle three to seven times over the week-end, visiting with her oftener than they would have to handle them if they had been property daughter, Miss Claudia. Mrs. Spink prepared.

And even after they have exhausted every means of identification and salvage, they succeed in delivering only slightly more than one fifth of that amount.

And this does not include vast quantities of circulars and newspapers times when-if he could afford to which are not properly addressed, and which are destroyed because they

In Chicago there is one building that is used as a storage place for mail of obvious value and for mail of first class which cannot be deliv-Twice a year the contents are auctioned off, because there is no ered.

way of finding the owners. In this building are bins of shoes, quan-titles of clothing, dress gouds, automobile parts and tires, sporting good, suit cases everything from a bird cage to a mouse trap. These are lost * Fortunately, this class of critic is not large. The majority of small to both the one who sent them and the one who should receive them. to both the one who sent them and the one who should receive them. because somebody was carelens in tying a knot ,or used filmsy wrapping itations and are broad-minded en-ough not to use two measures, one the drain of carelens more the people. The only reason the postoffice can stand the drain of carelens more the people. The only reason the postoffice can stand

this drain of careleseness upon its resources is that the people pay the bill.

Thre ought to be a general campaign of education with the object of impressing upon the people the importance of property preparing and addressing anything they put into the mail box. Another waste, caused by sheer thoughtlessness, arises from the cus-

tom of many business houses holding their mail until the close of the business day, when they release it in a perfect deluge. All day, cancel-ling machines, distributing eases, and other facilities for handling mail the practically idie, and just after 5 p. m. they are taxed beyond their capacity. If people would simply change their multing habits to the extent of depositing their mult over two hours earlier than they do at the Pelican Bay Lumber company's newspaper criticism, the following present, it would revolutionize the postal service. This articlo is written in the hope than many people will adopt the

You hear occasionally. a 10+1Gmouth proclaiming: "Gee, there's no news in the paper!" or "There's a mistake in the type!" or "That isn't what happened; the man didn't slip and fall, he stumbled "

It takes as many kinds of people to read a newspaper as it takes to make the world, and nobody has yet achieved the distinction of pleasing everybody, so it is not surprising that newspapers-no matter how conscientiously edited and printedhave severe critics, some of whom cannot, for lack of intelligence or understanding, see why mistakes are occasionally made in newspopers. and others who do not want to see hammers busy.

Now, few real newspaper men give a hang about such criticisms, so long as they, themselves are satisfied that they are doing the best that can be done within the limits of time and space allotted to each publication. The newspaper men know these critics don't know what they're talking about, and that if they did, they wouldn't talk loud enough for an intelligent person to hear them.

Of course, newspapers make mistakes. Every newspaper does. The perfect newspaper is yet to be published. Newspapers must be so human that they have all the weaknesses of humanity as well as all the virtues. To err is certainly human. Often judges and juros take weeks to decide what are the facts of an event that a newspaper must chronicle in five minutes. Facts do not change, but no two persons see with the same eyes, and sometimes more than one version is correct although each seems at first glance to include all facts having an important bearing upon the principle occurrence.

Many are called but few are chos-Most of the "many" have the d sense not to heed the "calling." isregard the promptings of "inon," surrondering to them only of a baimy summer's day and Pine Tree Theatre.

idea of paying better attention to their mail matter. After all, the postoffice is the great public servant, and it behoaves old position with the California every citizen of the country to make that servant as officient as possible. Much of the criticism leveled at the postoffice is due to the carelasness of the general public.

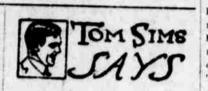

then burning the flery product in a camp fire or throwing it under a hammock.
