WHITHER ARE WE DRIFTING?

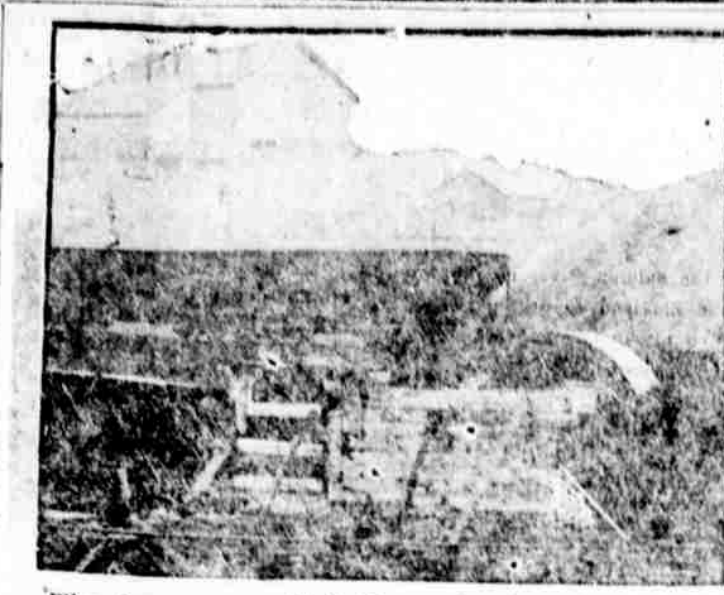

WE CANNOT shut our eyes to the concerted protest of the voters at the recent election against existing governmental conditions. Such sweeping changes, in many instances unexpected, indicate a general dissatisfaction, and a general desire for remedy. It is a protest against the high cost of government that has been saddled on the tax-payer by the growing drift of the last two decades toward bureaucracy and paternalism, toward federalized control and away from the original American idea of state rights and the broadest personal liberty compatible with good citizenship.

SAYS GERMANY UNABLE TO PAY

Sir Eric Geddes Declared His Predictions Have Come True LONDON, Nov. 14.—Sir Eric Geddes did some very plain talking about German reparations as the guest of the Thirty club, of London, recently. This club is an association of advertising experts. When in parliament Sir Eric was noted for his straightforward style of speech, and since he became a business man again he is more outspoken than ever. "In 1915 I was a politician," he said, "and I said then that we should not make a fetish of reparations; that we might find reparations a boomerang, and that the demand of great sums from Germany might be had. I nearly lost my seat over that statement, and I had to hedge a bit." "I have just come from Germany. They are desperate, and will never be a strong government until the people know that they can manage their own affairs. Until we and our allies come down to bed-rock, find out what Germany can pay, and tell them so, there will be no improvement. When we do that Germany will try to pay, if possible. But you cannot enslave a nation of 70,000,000 for generations." Brunswick phonograph motors are silent, powerful and built for lifetime service. Currin says so. 15 Currin for drugs. The fans upon which lives of miners buried in the Spangler, Pa., mine disaster depended. This fan was put out of commission by the force of the gas explosion. Rush crews immediately were put to work upon it and had it running again by noon, thus, it is believed, saving the lives of some of the miners. The boards shown in the picture were put up after the explosion.

"Experience" is an Important Ingredient

Modern methods in the compounding of recipes, prescriptions and all sorts of laboratory and pharmaceutical work require proper educational training, the right equipment and, above all, a sense of responsibility to the public. The only thing which can guarantee this responsibility is EXPERIENCE. We employ registered pharmacists with years of experience. Experience protects you—but it costs you nothing extra. The same is true regarding the quality of goods—there's no extra charge, but we enjoy a constantly increasing business because of the emphasis which we place on Quality.

Business is better. After being closed three years the Dover (N. H.) jail has 16 prisoners now. A well-preserved Egyptian mummy has been found in Mexico. Perhaps Egypt used to be in Mexico. Just when women were doing nicely in politics someone sprang the report it makes them fat. Pat McLaughlin, of Missouri, is 101 years old and a bachelor. Nothing like taking care of yourself. Business tip: Great many coal dealers are buying adding machines. One nice thing about your enemies is you can blame things on them instead of on yourself. Two Detroiters were arrested for fighting about the weather. There is too much weather to fight over.
