THE EVENING HERALD, KLAMATH FALLS, OREGON

WASHINGTON, Dec. 14 .- Assim flation of the foreign born, removal of illiteracy, adjustment of inequalities in educational opportunities, and inculcation of proper ideals concerning the American form of government, are paramount problems which the educational forces of the country must meet, in the opinion of Commissioner of Education Tigert as expressed today in his annual pepart.

"What we do or fail to do in pub-He education," he said, "will largely determine the future of our experiment in democracy."

Informed leadership in dealing with these problems, the report declared, is needed more now than ever before. It was pointed out that while some of the states, through years of experience and consecutive efforts of trained leaders have accomplished notable achievements in various phases of educational theory and practice, other states are still seeking the answers to many of the same questions, and laboriously and at great expense exploring ground that has already been carefully charted.

It is the work of the bureau of education, it was said, to promote the cause of education throughout the country, to dissominate such information, and to week inter-state co operation. Much of the coully duplication and experiment was declared to have been saved by the

bureau by making available tf all the states the experiences and achievements of the most progressive and most highly endowed, as E. M. Watson, of Eugene, is tes. far as its resources enable it.

Substantially increased support for the bureau, as a conservative in-

vestment, was recommended by Ti H. H.
