### MADE ENTIRELY OF TWELVE GAUGE RUST-PROOF STEEL

THE heavy twelve gauge Keystone "copper-bear-ing" steel used in the Clark Grave Vault is the most perfect mat-proof steel or iron known. The protection is abso-lute, because the Clark Grave Vault is built on the "diving bell" principle, the only scientific way of scaling a vault water-tight and air-tight. It is guaranteed for fifty years and will undoubtedly last for centuries, (Stone, brick and contrete vaults allow water to

seep in and hold it.) The supplying of the Clark Grave Vault is typical of the conscientiousservice werender to the public.

"Much of it came from the Greek themselves," Ismet Pasha continued. "I waited until I hda a good supply on hand, collected by agents operating in Europe. I did not waste any of my supplies until I was ready for a general drive agtinst the Greeks in August. Like the American officers at Bunker Hill. I instructed my artillery and infantry officers to wait until they saw the whites of the eyes of the enemies, and then to shoot. When the Greeks began to retreat, we got the very large stores they had col-We were grateful to them for some very fine field guns, made in England.

"There does not seem to be much sentiment in this business of furnishing munitions to countries anxious to fight each other. The dealers will sell to all comers so long as cash is paid on delivery. There is a firm operating in Holland that will sell any kind of gun in any EVERETT TRUE quantity, and deliver it on the high seas, if ports are lacking. Firms in London will do the same. Trieste. at th chead of the Adriatic, has become notorious as a place to buy war munitions. There are other agents for war goods located in Alexandria.in Constantinople, in various places in the Balkans, and in Parie.
