BLY

Those connected with the Bly Rodeo association who staged the rodeo at Klamath Falls last week have returned home, with the exception of J. N. Givan who will be busy at Klamath Falls for a few days more closing up the affairs of the association. The management of the association is highly pleased with the success of the show. With the unlimited support and co-operation of the merchants and business men of Klamath Falls and the good will of the public. The association expect much greater things in the next few years.

Miss Letha Driscoll of Salem is visiting her sister Mrs. E. T. Givan at this place.

Miss Jacquelin Weaver and Miss Edith Draper of Rock Springs, Texas, are the guests of Miss Weaver's sisters here, Mrs. C. W. Warren and Mrs. Marvin Cross.

Mr. and Mrs. James Driscoll were Sunday visitors at the home of Mrs. Driscoll's parents, Mr. and Mrs. Jess Parker.

Mr. and Mrs. Charles Collier expect to leave Monday for a visit to Collier's family in Eugene. From there they will go to Salem and Portland before returning home.

Holly Swigle of Bend who brought over 30 head of bucking horses for the rodeo at Klamath Falls spent Saturday night at the Givan ranch on his way home.

The county road crew is again at work on the roads from here to Klamath Falls. The recent rains put the roads in very bad shape and it is thought that a little work at this time will do a great lot of good for them.

A number of people of this valley who did not go into Klamath Falls for the Fourth of July enjoyed a picnic on the river.

The Ladies Aid society will meet with Mrs. James Dixon next Thursday and all members are asked to come.

Robertson, wire chief of the Lakeview Telephone company, was in Bly Tuesday inspecting the phone line through here.

Marvin Cross was a business visitor to Klamath Falls Monday and Tuesday.

Mr. and Mrs. Boss Richardson expect to leave for Yamnax some time this week, where they will make their home for the present.

A few of the ranchers have begun their haying already and within the next ten days haying will be well underway. An unusually good hay crop is predicted largely due to the successful fight made against the grasshoppers in the early spring.

LONE PINE

Nearly everybody in this neighborhood took in at least one day of the rodeo and are now very busy with their hay.

The C. R. Kiger family are the proud possessors of a brand new automobile.

Mrs. Glenn, Geneva Glenn, and Agnes Enman called on Mrs. Hugh O'Connor Monday.

Mrs. Clyde Barks who accompanied her mother and sister, Mrs. Minnie Dillard and Miss Florence Dillard, to Oakland has returned.

Hugh O'Connor and E. L. Hoonley are putting up their hay together this season.

J. E. Enman and sons, Chester and Walter, and Miss Phyrne Corum were the dinner guests of Mr. and Mrs. S. E. Enman on the Fourth of July.

J. E. Enman and Chester Enman inspected Jinnetta dairy herd the other day.

L. F. Geertson reports that the gulls are doing away with a great number of the grasshoppers down on Tule lake.

J. E. Enman sold a truck load of hogs to buyer from down near Dor-

ris recently.

The Kiger boys went to work for Jim Stevenson shortly after their return from Corvallis.

R. W. Enman is busily engaged building new racks, getting ready for haying.

WIRELESS AGE IS COMING DECLARES BRITISH SCIENTIST

LONDON, July 11.—Under the heading, "Coming of the Wireless Age," a British scientist contributes a striking article to a London newspaper, in which he predicts that wireless will be used in the near future for directing ships at sea, train and trolley services, traffic control on the road, fleets of battleships and aircraft. "It will be possible," he says, "to direct the path of everything moving on the surface of the earth, not even excepting human beings, by means of wireless."

The initial step in harnessing this potent and little known force was the establishment some weeks ago of a wireless lighthouse on Inchkeith island, in the Firth of Forth. By means of this "lighthouse," ships can be directed through the dangerous channels of the Firth by wireless, so that there is no possibility of their running ashore or being wrecked even on the darkest night or in the densest fogs.

Steps are being taken, in conjunction with the British board of trade and the meteorological office, to internationalize wireless direction of ships at sea. At the present moment there is lying in the port of London a ship that has been specially fitted with powerful wireless receiving sets to give demonstrations of this new method of navigation in all the principal ports of the world.

Setting out from London, this missionary ship will sail for China, via the Mediterranean, Indian ocean, and the straits, and thence on to North and South America, and back across the Atlantic to Europe and South Africa, giving demonstrations at every big port en route.

The most ambitious effort, however, will be a cross-Atlantic aeroplane flight which is to be made late in the summer. The machine will carry both pilot and observer, but their attentions will be confined to the actual flying side.

Setting out from Newfoundland, for the first 600 miles of its flight the aeroplane will be directed by the Glace bay wireless station. Then it will be picked up and nav-

igated by a wireless "lightship," cruising in mid-ocean, to a point where control will be transmitted to Onagar, the big operating station in this country.

The whole 2,000 miles of flight will be directed by wireless.

COMING EVENTS

- July 12.—Charter presentation to Kiwanis club at White Pelican hotel.
- July 26-27.—Visit of Rotary clubs of California and Oregon to Klamath Falls and Crater lake.
- August 19.—Community picnic at Crater lake.

C-T-C's Won't Skid

REMARKABLE compounding of the tread rubber is primarily responsible for the extraordinary road-gripping quality in the unrivaled C-T-C tires.

That compounding is under improved, secret processes which also gives the C-T-C tread greater toughness and durability, enabling it to deliver extra long-distance mileage without quickly wearing down.

Heavily buttressed and securely reinforced traction blocks surround deeply imbedded suction pockets as added insurance against slipping and side-swiping. C-T-C's are more powerfully hand-built of better materials.

My Hair

GROWS FINER, THICKER EVERY YEAR

By Edna Wallace Hopper

At my ripe age, my hair is such as any girl might envy. Heavy and luxuriant, fine and clean. I have never had gray hair, never falling hair, never a touch of dandruff. And every year, despite my age, it grows more beautiful.

It is my greatest glory, admired by all who see it. Yet I have stood in the limelight for 32 years as a musical comedy star.

Beautiful at 57

I owe this to my mother. She said, "Science knows some way to beautify the hair. Let us find it." So searched the world until we found the best that science offered.

Mother died at 57 with hair like mine today. Never a hair turned gray. I used what she used, and with like results. Scores of my friends have done likewise, and all have this beautiful hair. So I am convinced that millions can enjoy these benefits, and I am going to help them do it.

Hair is stifled. Experts tell me that hair health depends on a healthy scalp. An oil called Sebum accumulates there, grows hard and clogs the pores. Dandruff attacks the scalp. Then the stifled hair roots deteriorate or perish.

The pigment which gives hair its color, becomes stifled in a like way. Then some hair falls out, some loses its color, all ceases to thrive. Just as

flowers wither and perish when stifled by weeds.

So those scientists in France gave me the formula I use. It combats the dandruff, softens hardened oil, stimulates the hair roots, fertilizes the scalp. They told me it would multiply the beauty of my hair, and it certainly has done so.

With an eye-dropper

I call this formula my Hair Youth. I apply it with an eye-dropper once a day—just enough to dampen the scalp. It takes but a moment, and it doesn't muss the hair.

Now I offer this formula to all. I hope and believe it will bring to millions what it brought to me. I have never met anyone who has found a hair help to compare.

Edna Wallace Hopper's Hair Youth sells everywhere at 50c and \$1. with eye-dropper. Also my Facial Youth, my famous liquid cleanser. Also by Youth Cream—my fruitly cold cream. Also my White Youth Clay. My Beauty Book comes with each.

I hope that all who want lovely hair will see what my Hair Youth does. If the first bottle fails to please you, your dealer will return the price.
