## THE PUNCTUAL PUPIL

**A NEWS ITEM** from Passaic, N. J., reports that Jessie Skolkin, a high school junior, has answered present in school every day since she entered kindergarten 12 years previously. Considering how irregular average children are, this is an astonishing record. There are mighty few youngsters who go through 12 years of school age without bowing before the terrors of either measles, whooping cough, or scarlet fever. Such excusable absences place a black mark on the school register even if the pupil ardently desired to be present.

The majority of such absences however are not due to illness. Many parents keep their children out for slight whims, or because they want them to do work around the place. The bad boy of today does not play hockey much, but he keeps teasing his mother to let him go to some entertainment or game and takes advantage of her loving good nature.

A child who can go to school for even a year without an absence has made a remarkable record, and shown a quality of perseverance bound to be valuable in later life. When she keeps it up 12 years, she would seem to be making a powerful bid for the national non-stop school attendance competition. If more young people were trying for that form of marathoning, and fewer for non-stop dance honors, the country would be better off.

The world wants young recruits in business and industry who have this quality of sticking to a job through thick and thin. It indicates purpose, the setting of one's heart and mind on some fixed and worthy ideal and the determination to realize that aim, even at the sacrifice of much in the way of pleasure. It is safe to predict that Miss Jessie of Passaic will get a fine business job, and everything good that young womanhood desires will come to her.

## WOMEN'S CAPACITY FOR STUDY

**COLLEGES** for men have been running in this country since they started Harvard in 1636, when the bloody "Injuns" were still taking scalps in that classic neighborhood. But it was not until over 200 years later that the idea was accepted that women were mentally capable of pursuing the same hard studies that men could take.

L. Clark Seelye, president emeritus of Smith college, one of the earlier institutions to give girls college work just like men, has just issued a book giving the early history of that institution, and telling of the disheartening experiences the pioneers in that field had to go through.

When the earlier women's colleges started, the opinion was quite general that young women would break down nervously and physically under the same kind of work that men would do. The women of that day were a fragile type, given to the use of smelling salts and frequently fainting away. But these earlier schools soon began to turn out well rounded women who were fully equal to men in scholarship and just as healthy as anybody.

A comparison of men and women students today does not commonly show the girls to be inferior, and probably in the majority of cases they excel. They may not have better brains, but the sentiment of obligation seems to be a little higher in the female side of the race. This feeling impels them to stick to their tasks, while many men loaf time away with little feeling of obligation to the institution that gives them their opportunity and the parents who make sacrifices for their development.

Fifty years ago the women's colleges were few and their student bodies small, but today they are a tremendous power, for moulding life and opinion.

About now the family reunions begin, and the relatives love each other tremendously after they have had a big feed.

## DOUKHOBORS LOOK FOR MILDER CLIMATE

Vegetarianism and Rigors of Saskatchewan Climate Found Not To Be Compatible

WINNIPEG, Man., July 13.—Vegetarianism and the rigors of Saskatchewan winters are not compatible at least in the experience of the Doukhobors, a religious sect which is planning to migrate to a climate whose winter months can better be withstood without the aid of animal fats.

Peter Verigin, whose official position with the Doukhobors is president of the Christian Community of Universal Brotherhood, Limited, of Verigin, Saskatchewan, is authority for the statement that the vegetarians have found the Saskatchewan province winters too rigorous to be withstood on their diet. Verigin and E. Casloff, manager of the Doukhobor community, have gone east in search of a suitable tract, probably in the fruit lands of the province of Ontario, on which to locate their followers.

The leaders believe that the next settlement of the Doukhobors, after they have disposed of their Saskatchewan property, will be in the vicinity of the Niagara peninsula, where a jam making industry probably will be established, such as has been successfully operated by Doukhobors at Brilliant, B. C.

Verigin pointed out that persons who eat meat, perhaps use stimulants, and find solace in smoking, had found Saskatchewan's climate suitable, but that vegetarianism was one of the important features of the Doukhobor creed, and not to be altered because of climatic conditions. The migration will affect 1,500 persons.

## WALNUTS WORTH MANY MILLIONS

LOS ANGELES, Calif., July 13.—Eleven million dollars worth of walnuts and walnut by-products were marketed during the 1922 season by the California Walnut Growers' association, according to a report presented at the organization's annual meeting here. Handling an output of 40,111,800 pounds in competition with 48,000,000 pounds of consecutive year. Ralph McNeese, imported walnuts, the association packed and shipped 80.2 per cent of the entire California crop, the report stated.

The cost of marketing last year's crop was 5 1/2 per cent of the opening price value.

C. C. Teague was re-elected president of the association for the 11th vice-president, Carlyle Thorpe, general manager, and W. T. Webber, sales manager and secretary, were also re-elected.

## BRITISH EXPORTS TO BRAZIL NOW EXCEED THOSE OF U. S.

RIO DE JANEIRO, July 13.—American exports to Brazil, according to figures published by the federal department of commercial statistics, were surpassed by British shipments last year for the first time since the beginning of the war. The total value of American exports to this country in 1922 was almost equal to that of the year before hostilities began in Europe, but less than one-quarter of the total reached in the high tide year of 1920.

The reasons for this tremendous decrease in Brazilian imports of American products, according to opinions expressed by business representatives here, are the unfavorable exchange rates on Brazilian money, the relatively higher cost of doing business confronting American exporters, and the general retrenchment in Brazil.

# THEATRES MOVIES

AT THE LIBERTY

A production of more than ordinary interest is at the Liberty theatre today. It is called "Trooper O'Neil," and the star is Buck Jones. A reviewer in another city says of this film: "It is a breath of the Canadian woodlands. When the picture opens you are greeted by a scene where snow-capped peaks raise their crests, plumed with giant pines. That is the background for a story which is swift in action and engrossing in theme. The beauty of the settings is cleverly blended with the ever-increasing charm of this spirited romance. Situation follows situation in rapidly increasing succession to the final stirring climax. And rarely has a climax been more powerful."

"Trooper O'Neil" is today only.

AT THE PINE TREE

What is a "real man"? What is a "gentleman"? Those two terms are constantly in use of today's literature of several types.

Jack London's famous novel of the prize ring, "The Abysmal Brute," has been filmed today and Saturday as a Universal-Jewel special production starring Reginald Denny, the hero of "The Leather Pushers." This story has for its chief male-character, a young man who is all that would be called a "real man." At the same time he is courteous, intelligent and possessed of a refined nature. Yet he is a prize fighter, versed in the rough tactics of the ring and supposedly saturated with its atmosphere.

The heroine does not think so. The role is an exceptionally strong one, played by Mabel Jullienne Scott, an actress of the highest renown.

One of the strongest casts seen in any recent filmplay supports Denny in "The Abysmal Brute" and includes Mabel Jullienne Scott, Charles French, Nell Craig, Irene Halsman, Hayden Stevenson, David Torrence, Buddy Messenger, George Stewart, Harry Man, Kid Wagner, Tom McGuire and others. "The Abysmal Brute" opens at the Pine Tree theatre Friday and Saturday.
