Russia Now Trades With England

The economic and political situation in Europe will depend in a large measure on the extent of trade between Soviet Russia and other nations. Even the Ruhr situation will be affected. Above is the "Proletary," first Russian trade ship to dock at London. It carried 400 tons of eggs.

DESIGN AERIAL RAMS TO DEMOLISH PLANES

LONDON, Aug. 6.—Heavily armored, steel-prowed battering rams, for use in the leviathan airships now being designed, are being constructed secretly by British aircraft experts, says the Daily Chronicle's aeronautical correspondent. These new terrors of the air will be launched at an immense height from the mother airships and will rush down, guided by a solitary man sitting protected within their hulls, ready to strike hostile airships or bombing planes.

"Without guns or any weapon save a knife-like, cutting bow," says the writer, "the pilot of the 'ram' will seek as his quarry the big, slow-flying troop planes or transports, or he will swoop in deadly attack toward a hostile battleship of the air. Before he strikes his blow he will have the power, by

operating interior mechanism, of drawing in his telescopic, metal wings. Then, with a fearful final plunge, like a great projectile, he will steer, not at the hull of the craft he seeks to cripple, but at vulnerable wings or control surfaces. Through these he will cut and rip his way, and the great craft he has rammed, stricken and put out of control, will reel earthward to destruction."

The writer then says the "air ram" will extend its wings again and check its pell-mell descent. The pilot will be able, after starting a powerful interior engine, to bring into action previously shielded air screws, and by aid of these he will steal upward, regaining his mother airship and then prepare for another devastating dive.
